

F.A.S.T. Product Guide

Public portfolio · UI showcase · Data redacted

F.A.S.T. is Detroit Axle's operations workspace — catalog & kits, customer service tools, logistics, quality assurance, forecasting, audits, and file automations — delivered as one permission-gated web application.

This public showcase walks the **sidebar product areas** and main **partner portals**, with UI screenshots of each surface. Personal, customer, and operational data in screenshots has been **redacted** for sharing outside the company.

Role	Product / full-stack engineering on F.A.S.T.
Employer	Detroit Axle
App	Single-page workspace at / after login
Scope	Internal tools + external partner upload portals
Access model	Role-based view permissions (User Access)

12. External portals and special pages
13. Appendix

1. Introduction

What is F.A.S.T.?

F.A.S.T. is Detroit Axle's web application for day-to-day operations: catalog fitment and kits, customer order tools, sales and market reporting, warehouse and ocean logistics, QA coaching, FedEx/fraud audits, and file automations. Most work happens inside one logged-in shell; a few partner flows use separate tokenized pages.

Who uses it

Role	Typical areas
Listing / catalog	Listing Toolset, Kit Builder, Aces
Customer service	DC3, CS Support, Price Matching, eBay Retention, Follow-Up
Sales / forecasting	Statistical Projection, Sales Report/Dashboard, Market Share, Amazon Market Report
Logistics / ops	Bay Logistics, Container Tracking, Netsuit Parser, Audit PT Invoice, Locations, Factory Intake
QA leadership & agents	Quality Assurance group
Admins	User Access, Activity Logs, Settings, Breaks management
External partners	Factory Intake, ISF broker upload, freight-forwarder BOL/delay pages

Getting started

- 1 Open the F.A.S.T. URL and sign in at /login (email/password; some accounts use MFA or passkeys).
- 2 First login may force a password change (/login/first-login-password).
- 3 Forgot password uses /login/forgot-password (email reset flow).
- 4 After login you land on **Dashboard**. Sidebar items appear only for permissions your role grants.
- 5 Open **My Profile** (Dashboard widget or profile overlay) for language, theme, and logout.

Permissions

- 1 Admins assign keys in **Personal** → **User Access** (Users / Roles).
- 1 Keys are grouped like the sidebar (Dashboard, Listing, Customer, Follow-Up, Forecast and Sales, Personal, Logistics, QA, Audit, Automation, System).
- 1 Super-admins see the full catalog; restricted users only see allowed nav buttons.
- 1 Factory-portal-only accounts are limited to Factory Intake paths.

Deep linking

Share a view with:

```
/?start_view=view-sales-report  
/?start_view=view-listing&... (Listing also uses subtabs such as fitment-check)
```

Exact `start_view` values match the sidebar `data-target` attributes (for example `view-fitment-v2`, `view-container-tracking`).

Tips

- 1 Sidebar items appear based on the user's role permissions.
- 1 Heavy reports may show a short loading state before charts or tables appear.
- 1 Deep links open a specific tool after login: `/?start_view=<view-id>`.

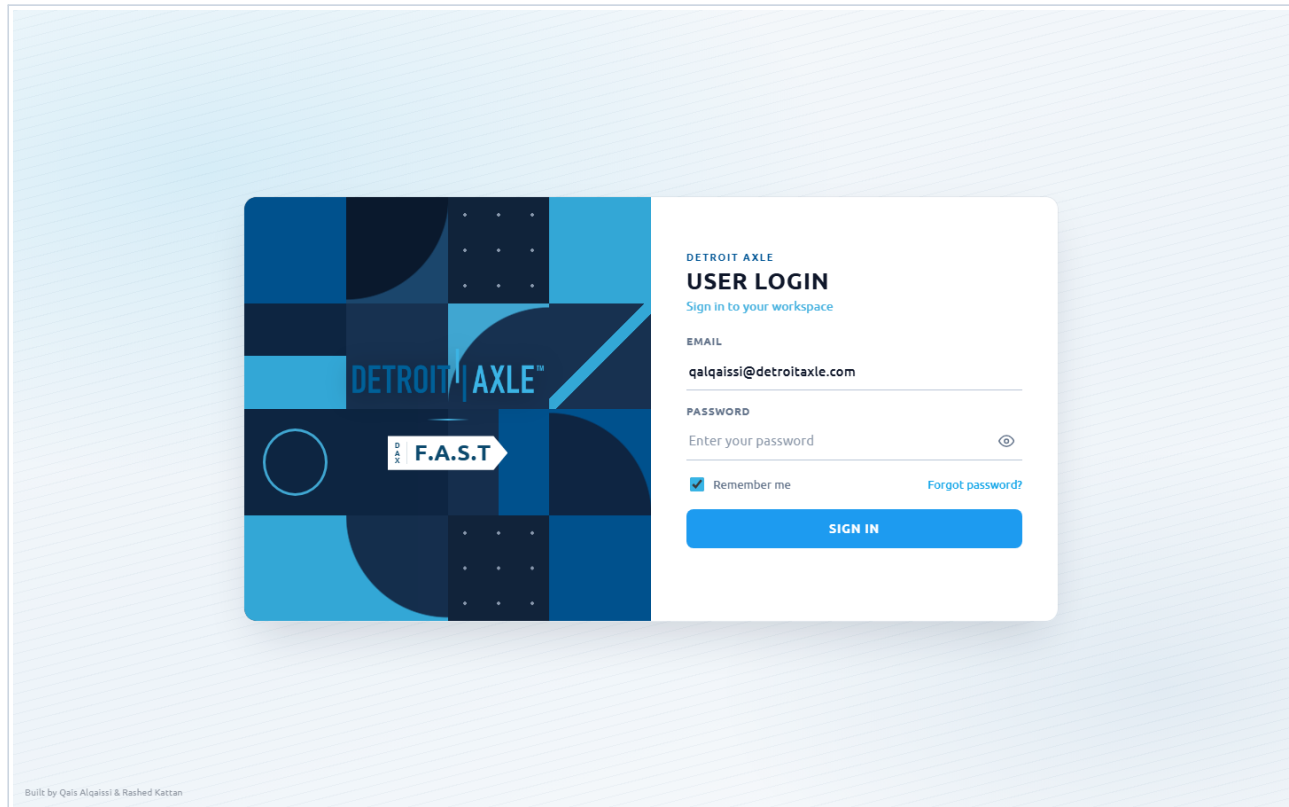

Figure — Introduction — login

2. Shell and Dashboard

Application shell

Menu path: Always visible after login

Permission: Session (logged in)

What it is

The SPA chrome around every internal view: brand sidebar, collapsible nav groups, topbar title, break quick action, announcements, and the main content pane.

Main UI areas

- 1 **Sidebar** — Dashboard plus groups (Listing, Customer Info, Follow-Up, Forecast and Sales, Personal, Logistics, QA, Automation, Audit); search box filters nav labels.
- 1 **Topbar** — Burger (collapse sidebar), current view title, break control, notification/announcement bell.
- 1 **Content** — Active #view- * section; modules lazy-load when first opened.
- 1 **Welcome modal** — Shown on first login / welcome flows.

What you can do

- 1 Expand a nav group and click a view to switch the main pane.
- 2 Use sidebar search to jump to a tool by name.
- 3 Start/end breaks from the topbar when Breaks is enabled for you.
- 4 Open profile for language, theme, and sign-out.

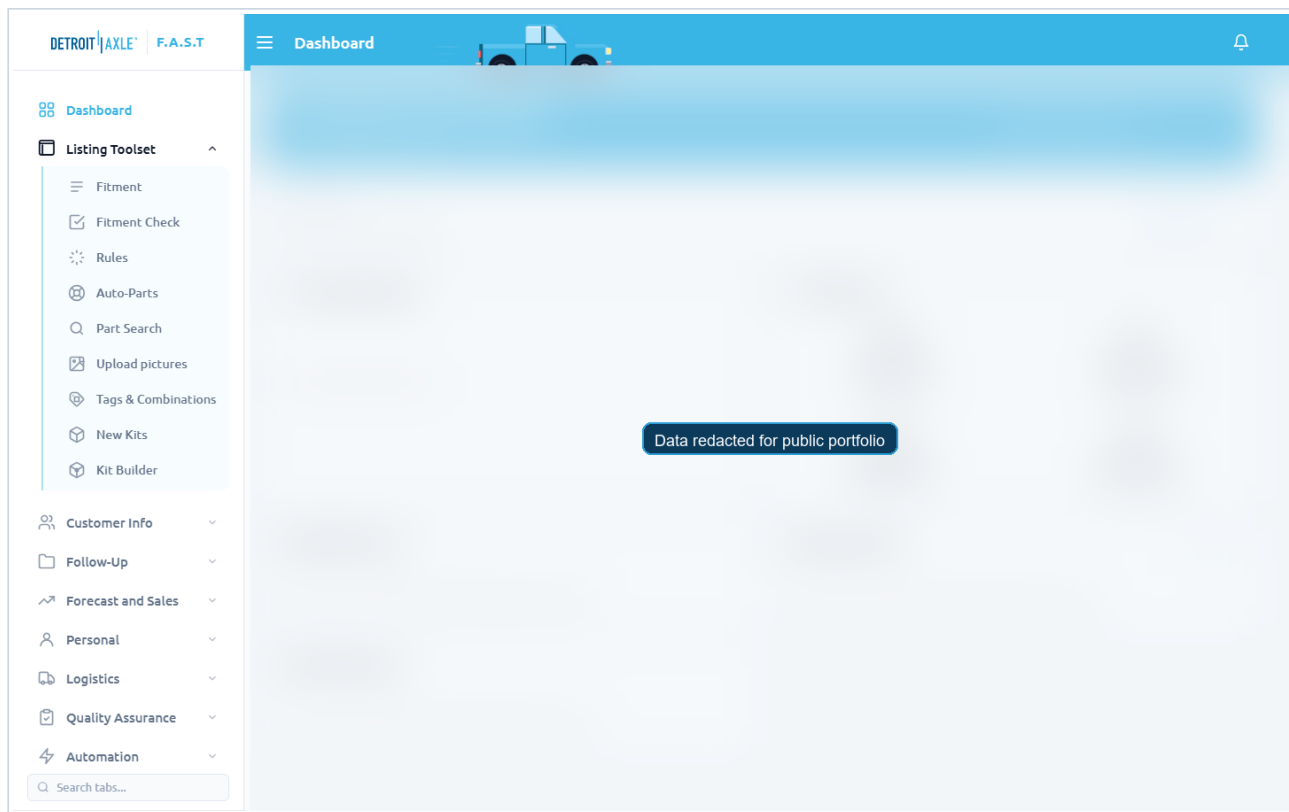

Figure — Shell — sidebar and topbar

Dashboard

Menu path: Dashboard

View ID: view-dashboard

Permission: view-dashboard (configure widgets: manage-dashboard)

What it is

Main landing view with configurable widgets: greeting, profile shortcut, recent tabs, office clocks, courses, QA summaries, forecast highlights, and geo maps.

Main UI areas

- 1 Widget grid (user-configurable when manage permission is granted)
- 1 Weather / office clock carousel (where enabled)
- 1 Shortcuts into recent views and personal profile

What you can do

- 1 Review today's operational snapshot after login.
- 2 Open **My Profile** from the profile widget.
- 3 Jump to recent tabs you used earlier in the session.
- 4 Admins with manage rights rearrange or enable widgets from the dashboard catalog.

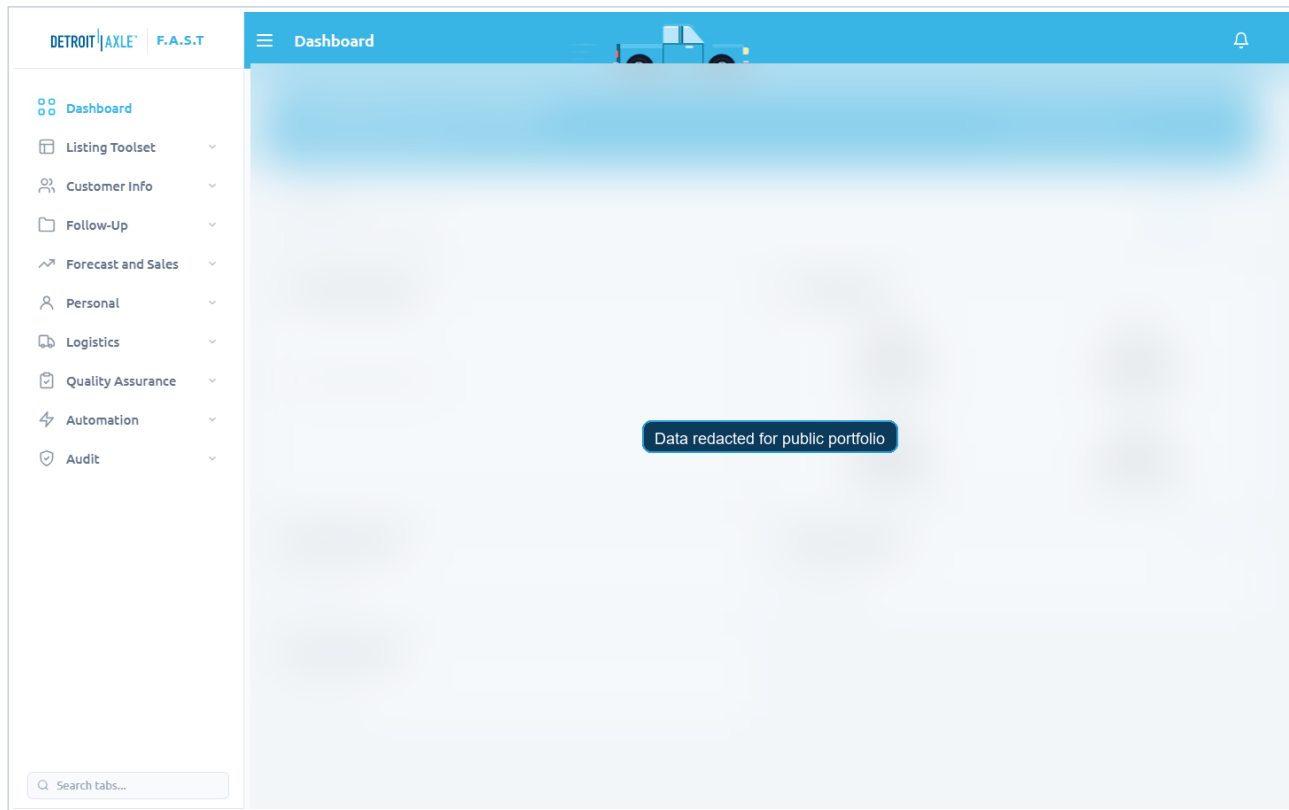

Figure — Dashboard

Profile

Menu path: Dashboard → My Profile (overlay)

View ID: view-profile

Permission: Session

What it is

Account overlay for identity, locale, theme, and logout — not a primary sidebar item.

What you can do

- 1 Confirm your signed-in user and department context.
- 2 Switch language (English / Chinese where enabled).
- 3 Toggle light/dark theme.
- 4 Sign out of the current session.

3. Listing Toolset

Tools for catalog fitment, marketplace listing helpers, images, tags, kits, and kit building.

Fitment

Menu path: Listing Toolset → Fitment

View ID: view-fitment-v2

Permission: view-fitment-v2

What it is

Fitment V2 catalog runner: paste a part number and fitment lines, run matching, review YMM/status results, and export for ACES Listing, Amazon, or Mercado (including queued exports).

Main UI areas

- 1 Part / fitment paste input and **Run**
- 1 Results table (year/make/model and status)
- 1 Export and queue-export actions
- 1 Modals: form edit, disambiguation, export options, queue status

What you can do

- 1 Paste part number and fitment text; run the parser.
- 2 Review matched rows; resolve ambiguities in the disambiguation modal.
- 3 Export to the needed marketplace format or queue a larger export job.
- 4 Edit form attributes when a row needs correction.

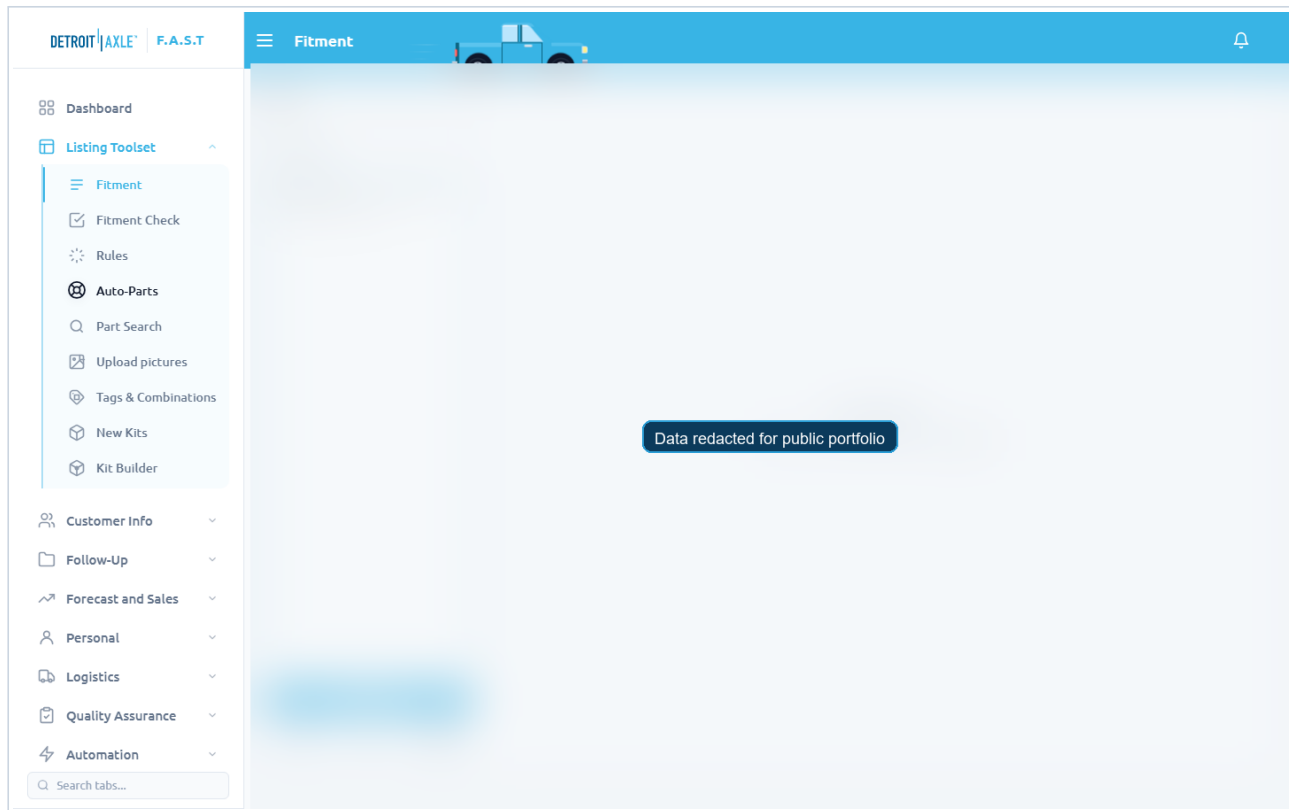

Figure — Fitment V2

Fitment Check

Menu path: Listing Toolset → Fitment Check

View ID: view-listing+subtab fitment-check

Permission: view-listing:fitment-check or review-fitment-check

What it is

Listing subtab for reviewing and checking part fitment before publish; supports paste/upload and HTML export for eBay/Amazon.

Main UI areas

- 1 Parts rail and main review pane
- 1 Paste / upload entry points
- 1 Export HTML (eBay / Amazon)
- 1 Review workflow controls for checkers

What you can do

- 1 Select or paste parts into the check queue.
- 2 Walk each part's fitment and mark review outcomes.
- 3 Export listing HTML for marketplace paste workflows.

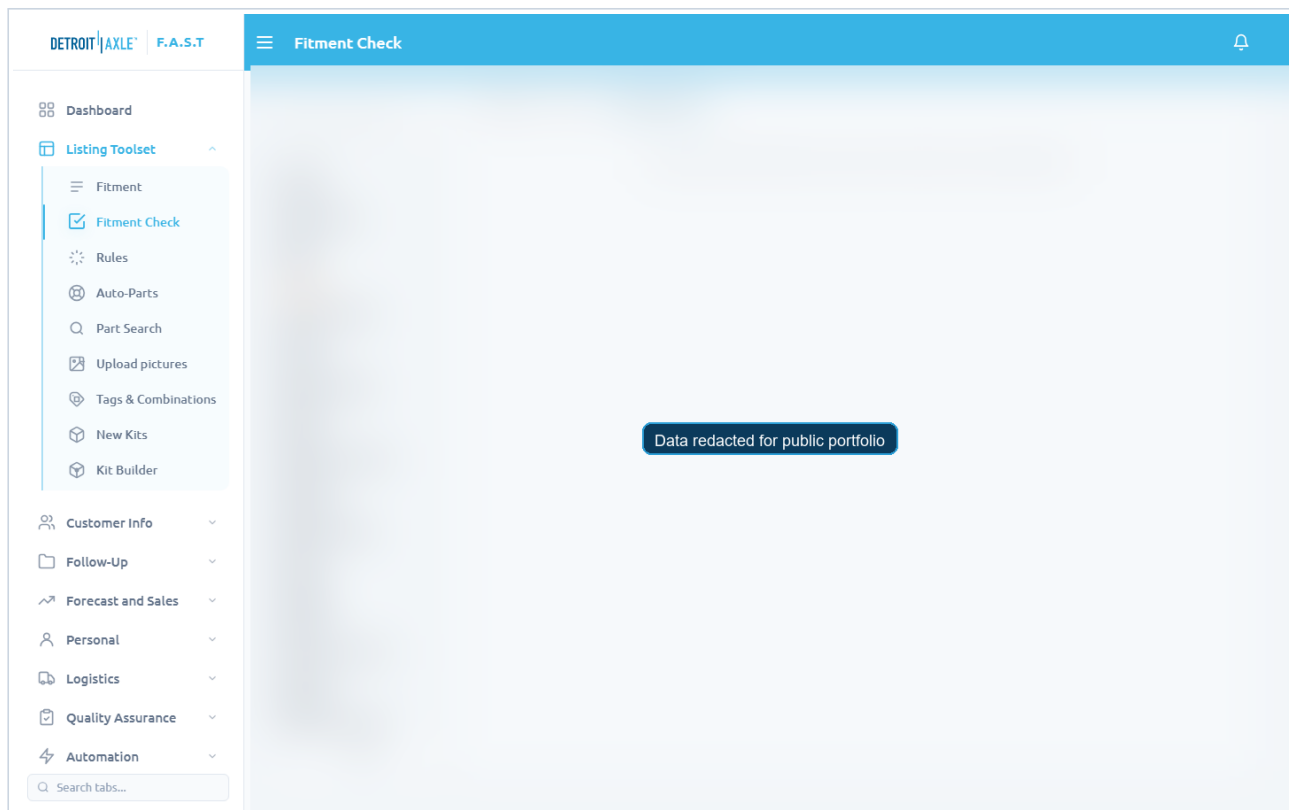

Figure — Fitment Check

Rules

Menu path: Listing Toolset → Rules

View ID: view-rules-v2

Permission: view-rules-v2 / manage-rules-v2

What it is

Fitment rules editor V2 — maintain attribute callout rules that map free-text fitment into catalog columns, eBayNote, and ACES notes.

Main UI areas

- 1 Rules table with filters
- 1 Add / edit rule modal (pattern → target fields)

What you can do

- 1 Browse and filter existing rules.
- 2 Add or edit a rule (regex/callout → catalog / notes columns).
- 3 Save changes (manage permission required for writes).

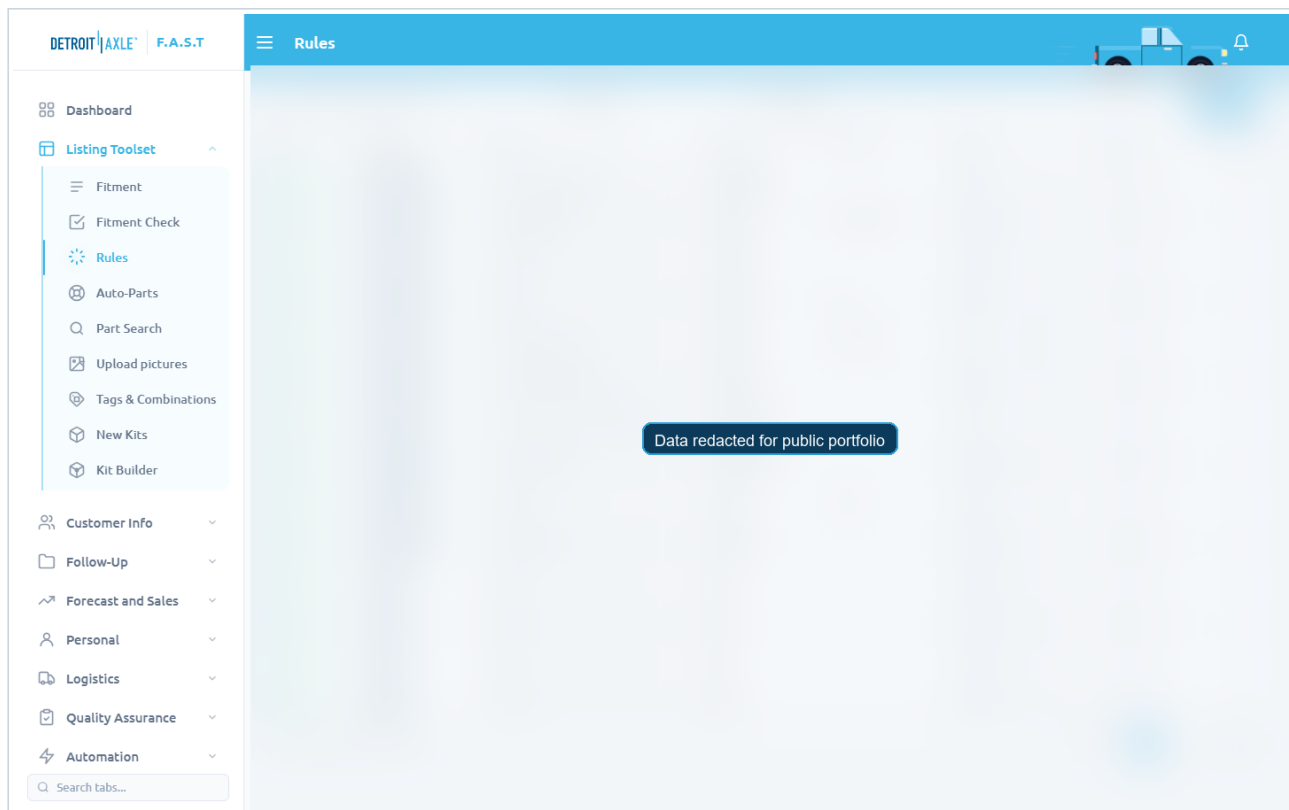

Figure — Rules V2

Auto-Parts

Menu path: Listing Toolset → Auto-Parts

View ID: view-listing + subtab auto-part-pro

Permission: view-listing:auto-part-pro

What it is

Auto-Parts Pro listing helper: search by SKU or YMM vehicle (including A-Premium / Cardone contexts) and open fitment details.

Main UI areas

- 1 SKU search and vehicle (YMM) search
- 1 Results grid
- 1 Fitment detail modal

What you can do

- 1 Search a SKU or compatible vehicle.
- 2 Open a result to inspect fitment and listing imagery context.
- 3 Use results to support listing or competitor research.

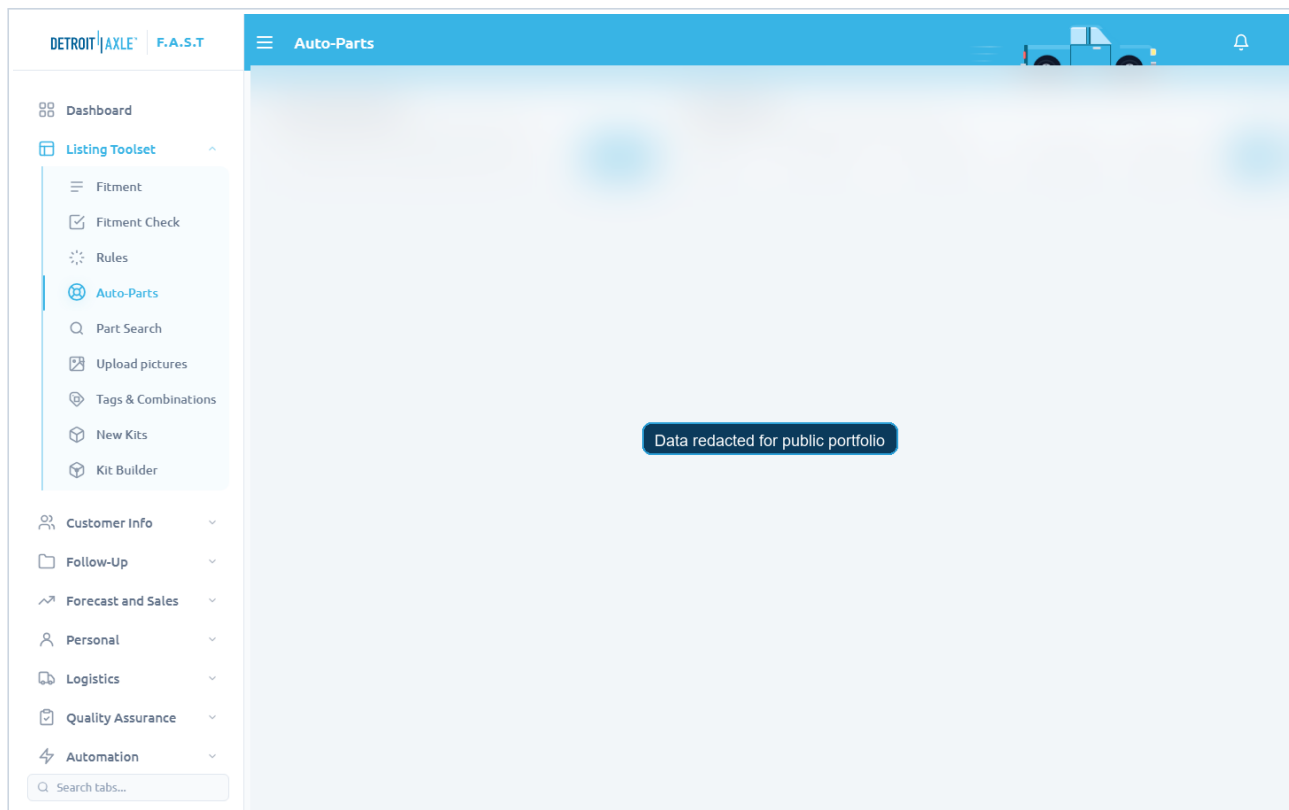

Figure — Auto-Parts

Part Search

Menu path: Listing Toolset → Part Search

View ID: view-part-search

Permission: view-part-search

What it is

Cross-marketplace SKU search that opens marketplace destinations (Amazon, Temu, eBay, Detroit Axle) for a part.

Main UI areas

- 1 SKU lookup field
- 1 Marketplace action buttons

What you can do

- 1 Enter a SKU.
- 2 Click a marketplace button to open the matching listing search/page.

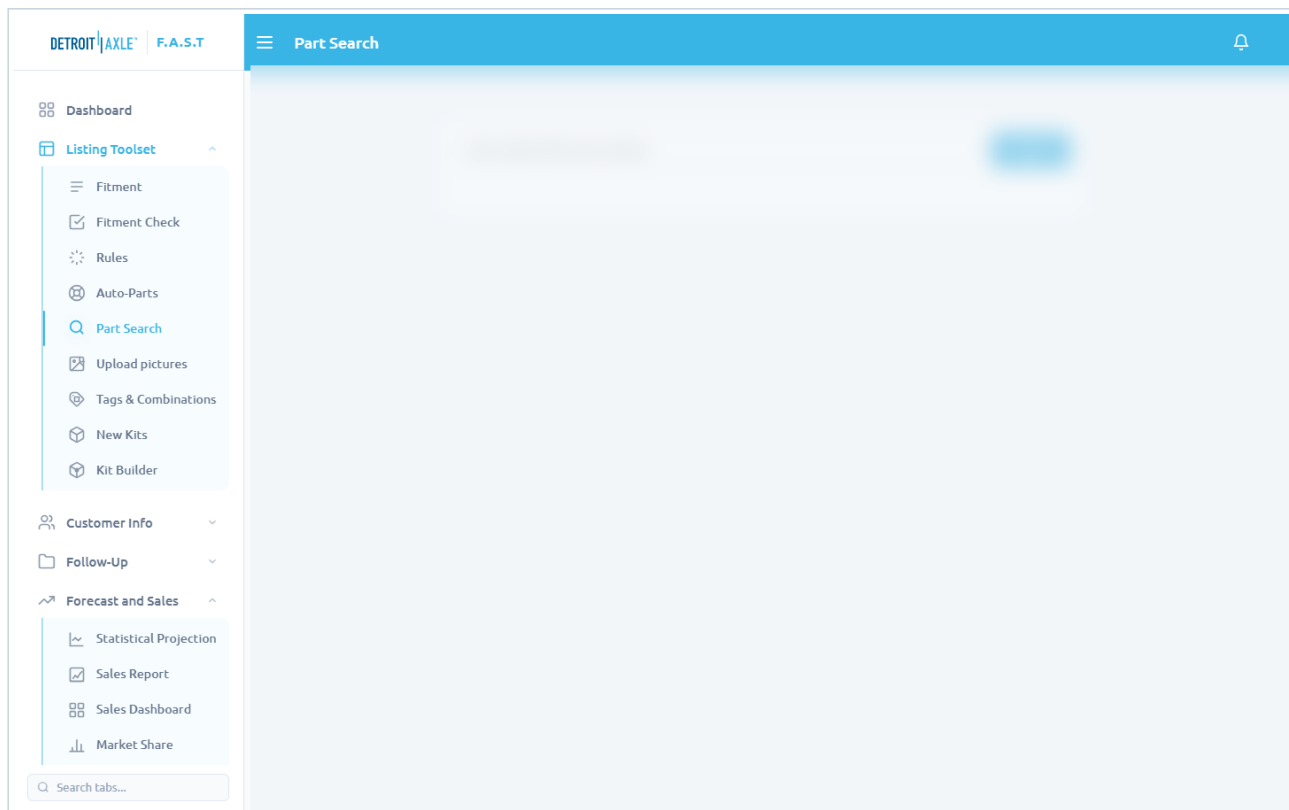

Figure — Part Search

Upload pictures

Menu path: Listing Toolset → Upload pictures

View ID: view-listing + subtab upload-pictures

Permission: view-listing:upload-pictures / manage-upload-pictures

What it is

Listing picture upload workflow: drop images into the library, search, and export CSV of picture inventory.

Main UI areas

- 1 Drop zone
- 1 Image library grid with search and pagination
- 1 CSV export

What you can do

- 1 Drag-and-drop or select product images.
- 2 Search and page through the library.
- 3 Export a CSV of picture metadata for listing ops.

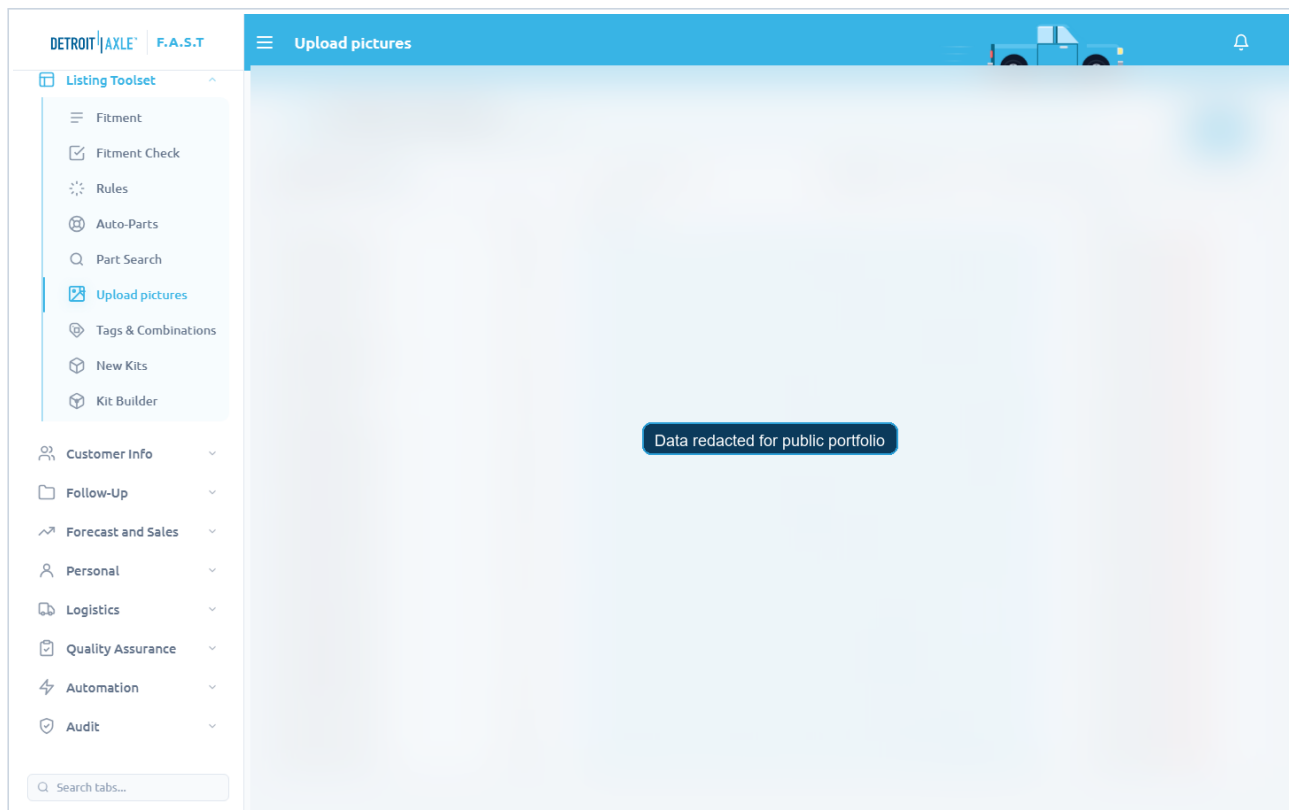

Figure — Upload pictures

Tags & Combinations

Menu path: Listing Toolset → Tags & Combinations

View ID: view-listing+subtab-tags-combinations

Permission: view-listing:tags-combinations / manage-tags-combinations

What it is

Product tags and kit combination editor with separate **Combinations** and **Tags** subtabs.

Main UI areas

- 1 Combinations table + add combination
- 1 Tags table + CRUD
- 1 Manage actions when permitted

What you can do

- 1 Maintain tag definitions used on listings/kits.
- 2 Create and edit combinations that group parts.
- 3 Export or update rows as listing ops require.

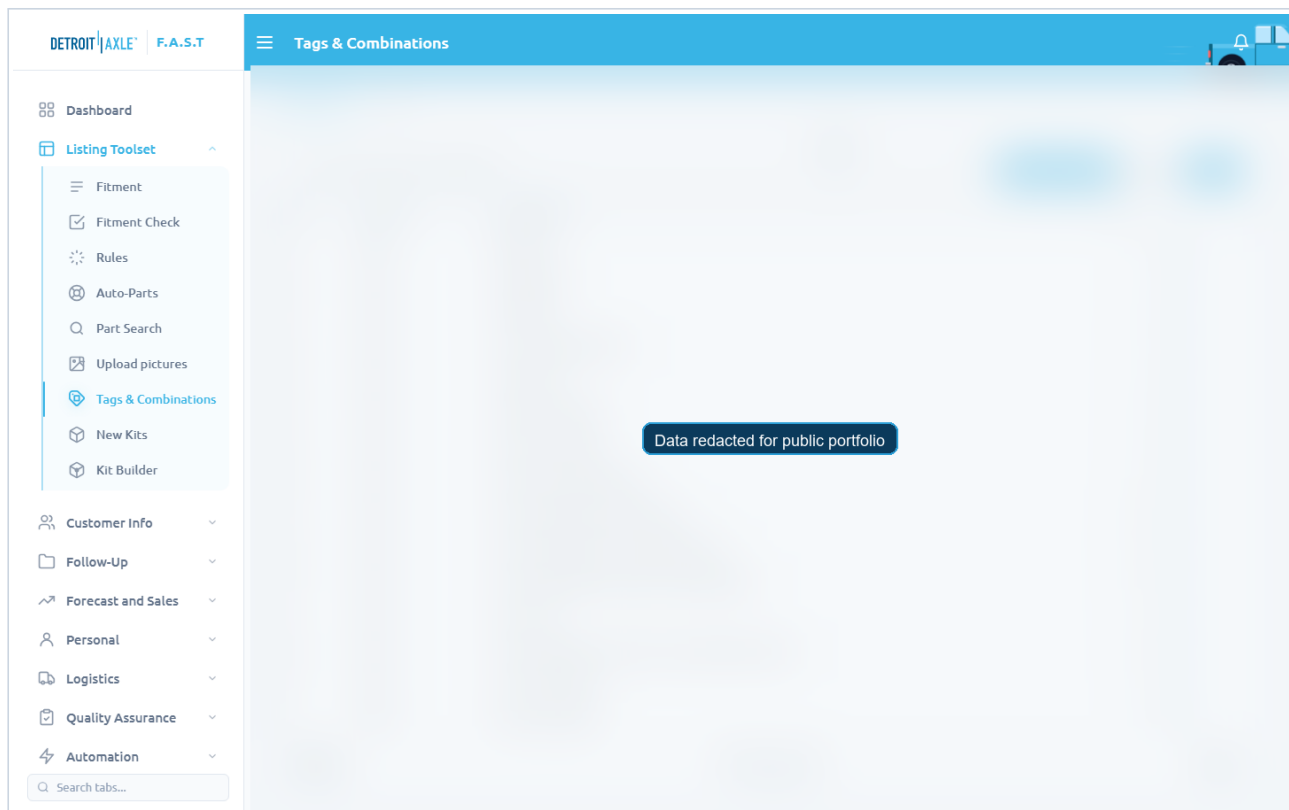

Figure — Tags & Combinations

New Kits

Menu path: Listing Toolset → New Kits

View ID: view-listing + subtab new-kits

Permission: view-listing:new-kits / manage-new-kits

What it is

New kit intake table: filter by category / buy flags / kit number, open kit details (components + fitment), and download CSV.

Main UI areas

- 1 Filterable kit table
- 1 Kit Details modal (components and fitment)
- 1 Download CSV

What you can do

- 1 Filter the new-kits queue.
- 2 Open a kit to review components and fitment.
- 3 Download CSV for offline review or handoff.

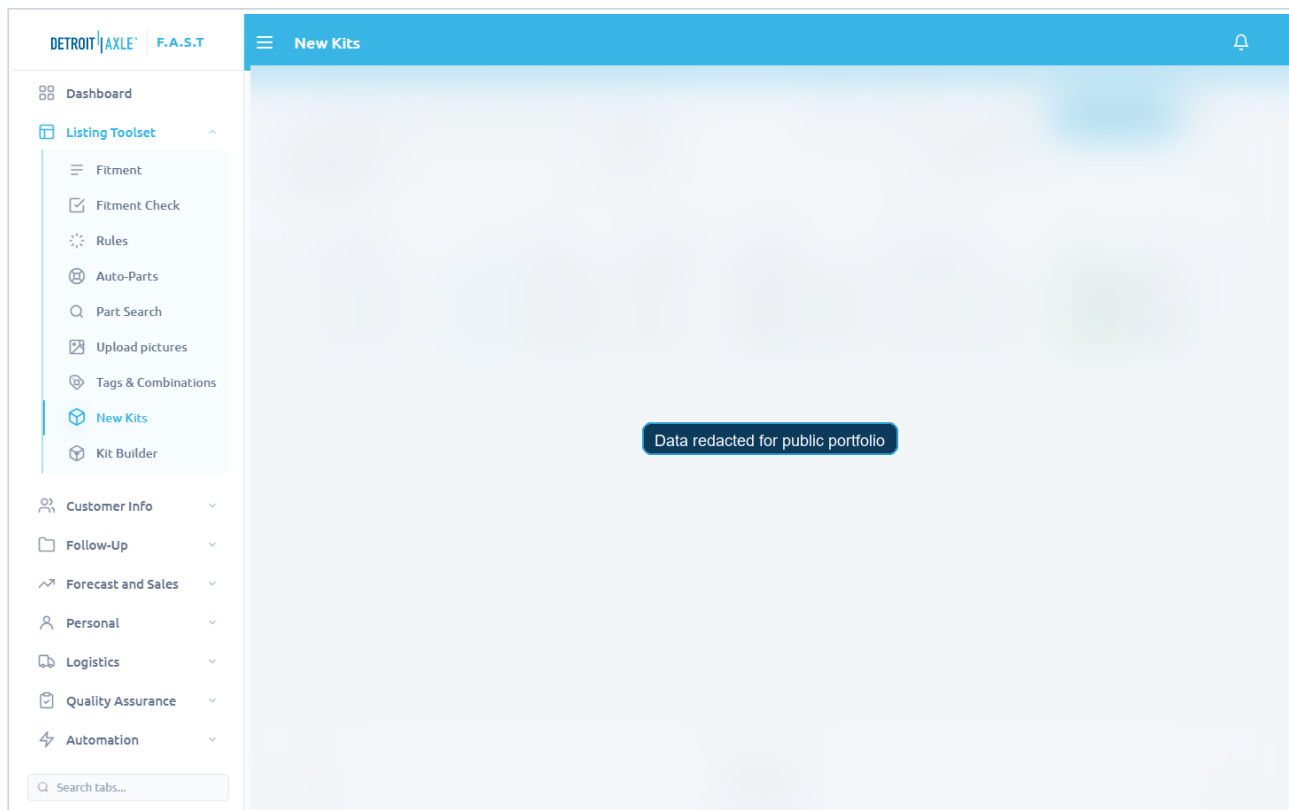

Figure — New Kits

Kit Builder

Menu path: Listing Toolset → Kit Builder

View ID: view-kit-builder-v2

Permission: view-kit-builder

What it is

YMM kit builder with live combination suggestions, notes/tags, needs-buy / no-buy flags, and CSV/ZIP/report downloads.

Main UI areas

- 1 YMM and SKU filters
- 1 Live suggestions list
- 1 Notes / Tags and buy flags
- 1 Download CSV / ZIP / reports
- 1 Tag-fix modal

What you can do

- 1 Filter by vehicle and SKU context.
- 2 Accept or reject live kit suggestions and set buy flags.
- 3 Attach notes/tags; download work products for listing teams.

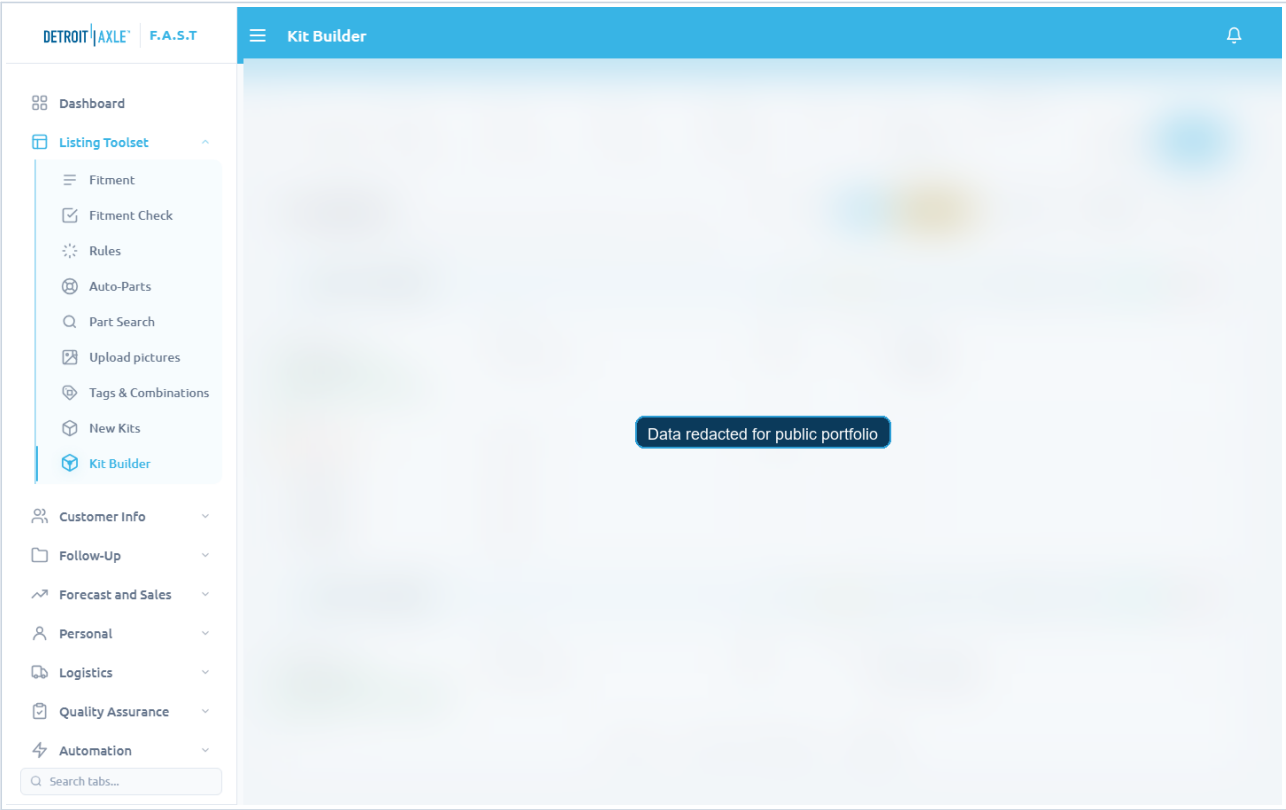

Figure — Kit Builder V2

4. Customer Info

Order lookup, support queues, price match helpers, and eBay retention tooling.

DC3

Menu path: Customer Info → DC3

View ID: view-dc3

Permission: view-dc3-search / manage-dc3-cases

What it is

DC3 customer and order search with escalation / case handling. Deep-link pages also exist for order detail and wrap-up outside the main shell.

Main UI areas

- 1 Multi-field search (order #, reference, SKU, address, and related)
- 1 Results cards
- 1 Escalation / case panel when managing cases

What you can do

- 1 Search by order or customer identifiers (order #, ref, SKU, address, item name).
- 2 Open a result to review order context.
- 3 Escalate or manage DC3 cases when permitted.
- 4 Use /dc3/order and /dc3/wrapup for focused order workflows (opened from a result or notification with order query params).

Tip: The landing state is a search box — users query by order/ref/SKU to open results.

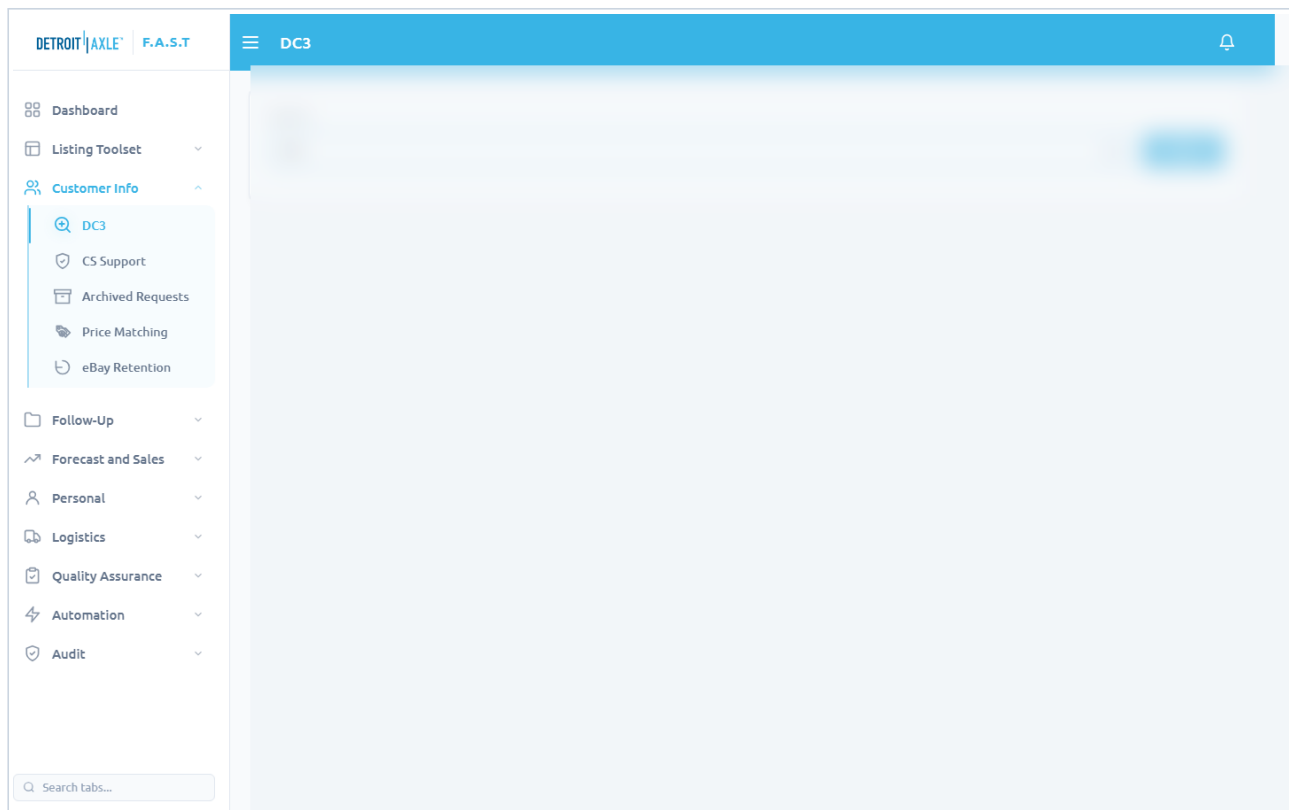

Figure — DC3

CS Support

Menu path: Customer Info → CS Support

View ID: view-customer-service-support

Permission: view-customer-service-support-supervisor (and related CS keys)

What it is

Customer service waiting pool for live support requests supervisors and agents work from.

Main UI areas

- 1 Waiting pool list
- 1 Request detail modal
- 1 Decline / disposition controls

What you can do

- 1 Monitor the waiting pool.
- 2 Open a request, handle or assign it.
- 3 Decline with reason when appropriate.

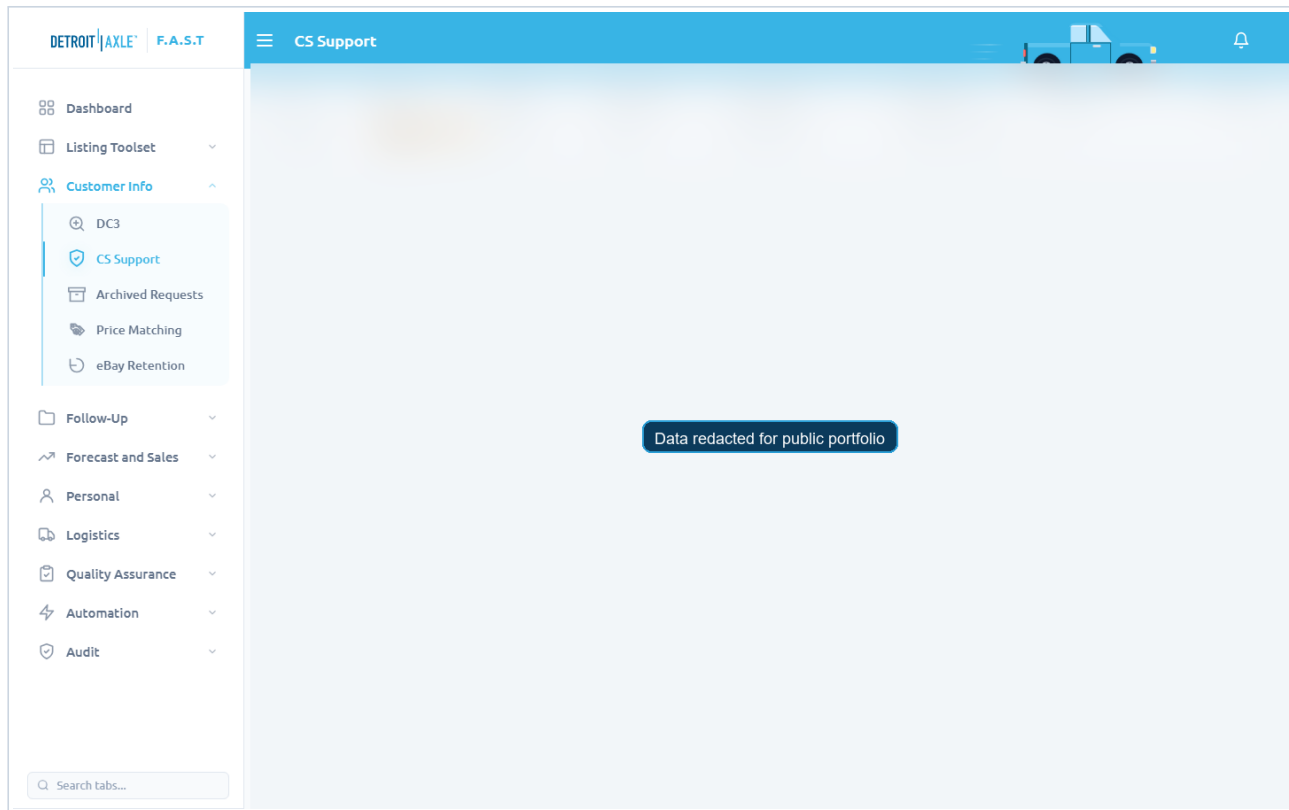

Figure — CS Support

Archived Requests

Menu path: Customer Info → Archived Requests

View ID: view-cs-support-archived

Permission: CS Support keys; delete archived requires manage-cs-support-archived-delete

What it is

Historical CS support requests with filters and pagination for audit and follow-up.

Main UI areas

- 1 Filters: order, customer, employee, dates, status
- 1 Archived list + pagination
- 1 Detail view; delete when permitted

What you can do

- 1 Filter archived requests by order/customer/employee/date.
- 2 Open historical detail for training or dispute.
- 3 Delete archived rows only with delete permission.

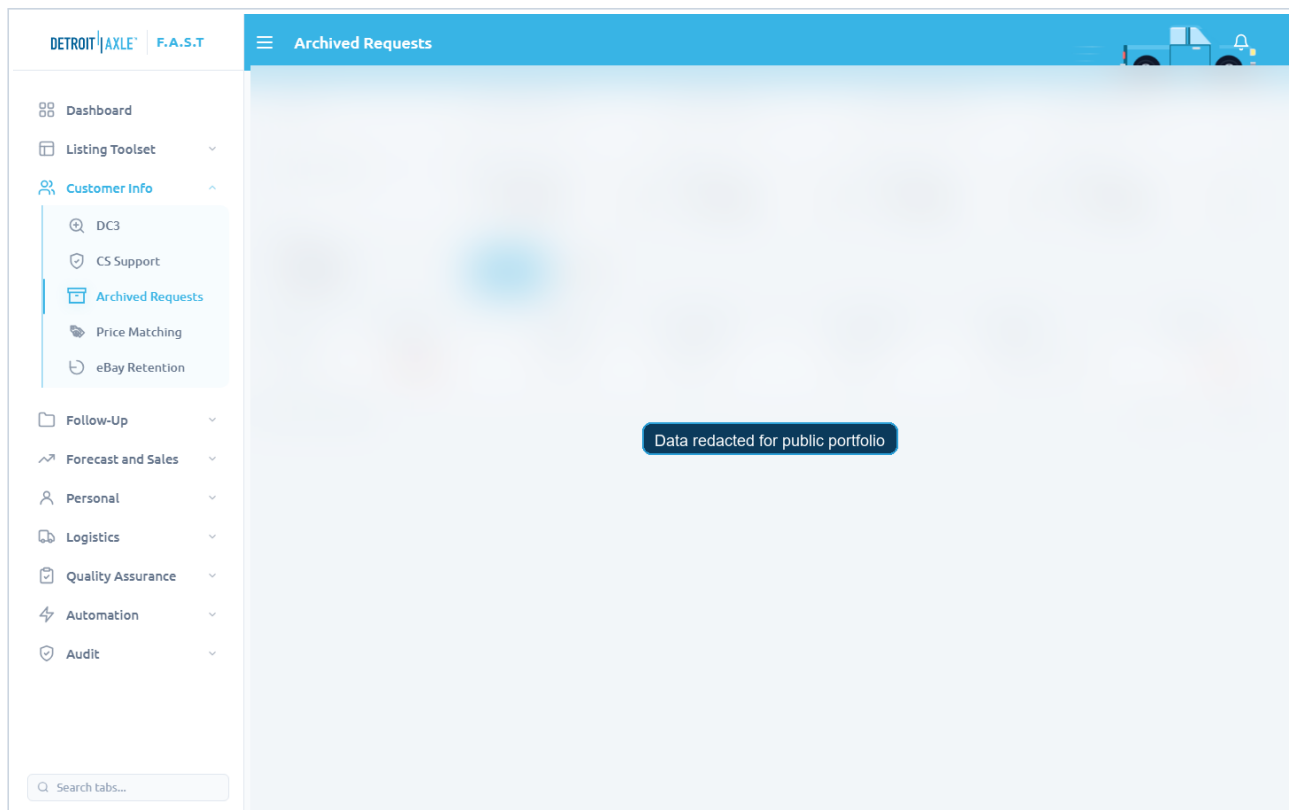

Figure — Archived Requests

Price Matching

Menu path: Customer Info → Price Matching

View ID: view-price-matching

Permission: view-price-matching (+ percentage-refund, tax-calculation subkeys)

What it is

Price match lookup workflow: load an order, review items, and work in Default / Warranty / Exchange modes with refund and tax helpers when enabled.

Main UI areas

- 1 Order lookup hero
- 1 Items column
- 1 Mode switch: Default / Warranty / Exchange
- 1 Exchange and sidebar calculation columns

What you can do

- 1 Look up an order number.
- 2 Select mode (default, warranty, or exchange).
- 3 Calculate match / refund / tax as your permissions allow.
- 4 Use results while speaking with the customer.

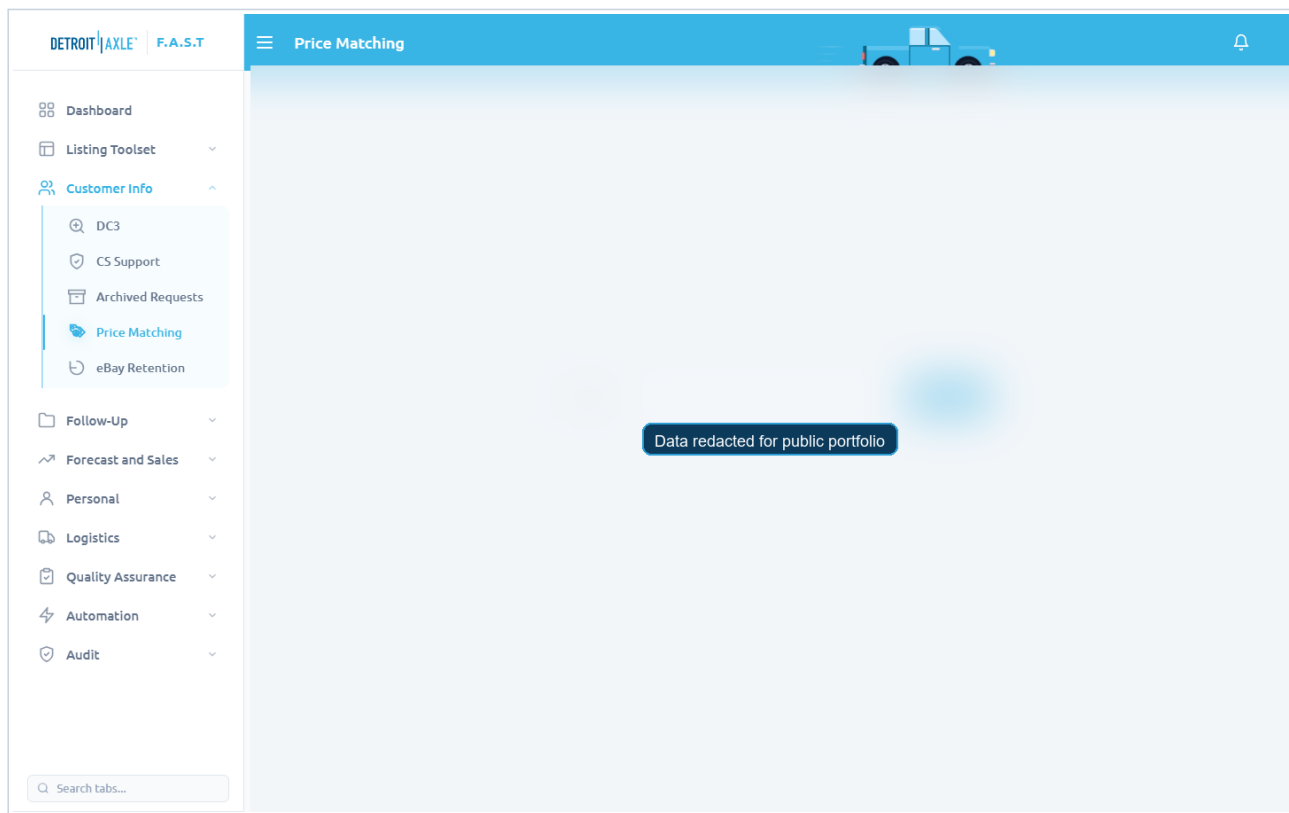

Figure — Price Matching

eBay Retention

Menu path: Customer Info → eBay Retention

View ID: view-ebay-retention

Permission: view-ebay-retention / manage-ebay-retention

What it is

Paginated eBay retention / eDesk ticket table with paste intake, order link, reason management, and email modals.

Main UI areas

- 1 Ticket table
- 1 Paste / order / reason filters
- 1 Manage reasons (manage permission)
- 1 Detail and email modals

What you can do

- 1 Browse and filter retention tickets.
- 2 Paste new ticket context and associate an order.
- 3 Maintain retention reasons (managers).
- 4 Open detail and send or preview related email.

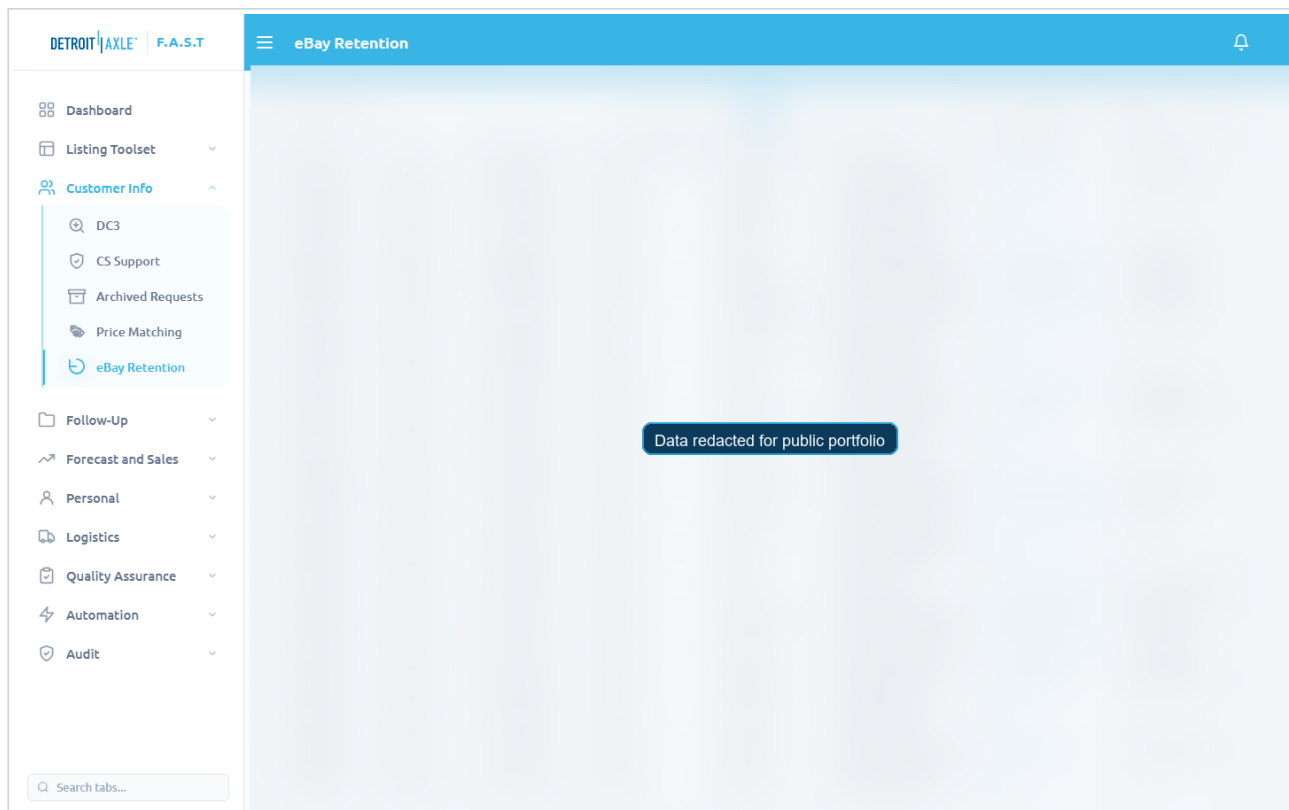

Figure — eBay Retention

5. Follow-Up

Outbound follow-up email operations: queues, templates, DC3 case batches, and order classification.

Email's

Menu path: Follow-Up → Email's

View ID: view-follow-up-emails

Permission: view-follow-up-emails

What it is

Follow-up email send workflow: upload/select customers, preview, and send (including Power Automate-backed delivery).

Main UI areas

- 1 Tabs: with / without manual; Pending / Emailed
- 1 Date filters and bulk select
- 1 Settings, confirm, and missing-manuals modals

What you can do

- 1 Filter pending vs already emailed customers.
- 2 Select recipients in bulk.
- 3 Preview and confirm a send.
- 4 Resolve missing-manuals blockers before sending.

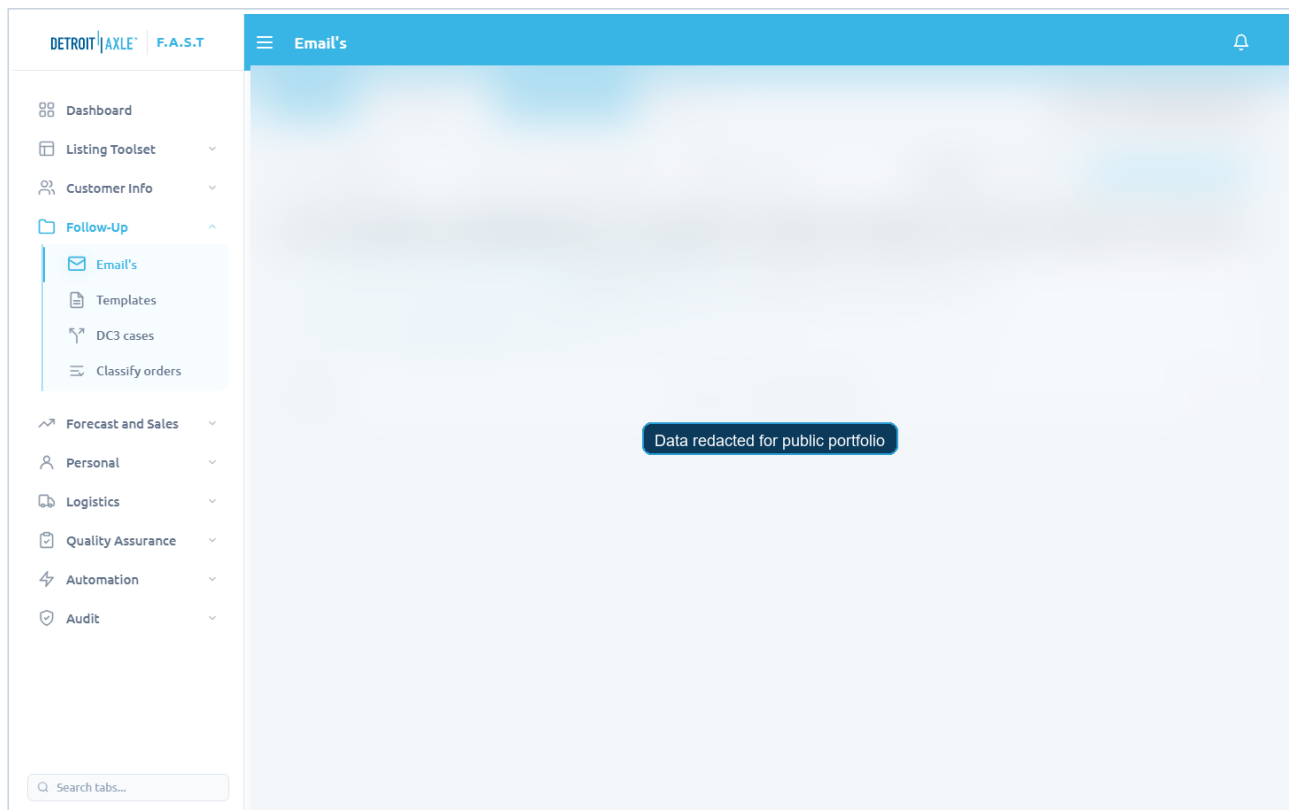

Figure — Follow-Up Emails

Templates

Menu path: Follow-Up → Templates

View ID: view-follow-up-templates

Permission: view-follow-up-templates

What it is

CRUD for follow-up email templates used by the Email's and DC3 cases send flows.

Main UI areas

- 1 Template list
- 1 New / edit compose modal

What you can do

- 1 Browse existing templates.
- 2 Create or edit subject/body content.
- 3 Keep templates aligned with current CS messaging.

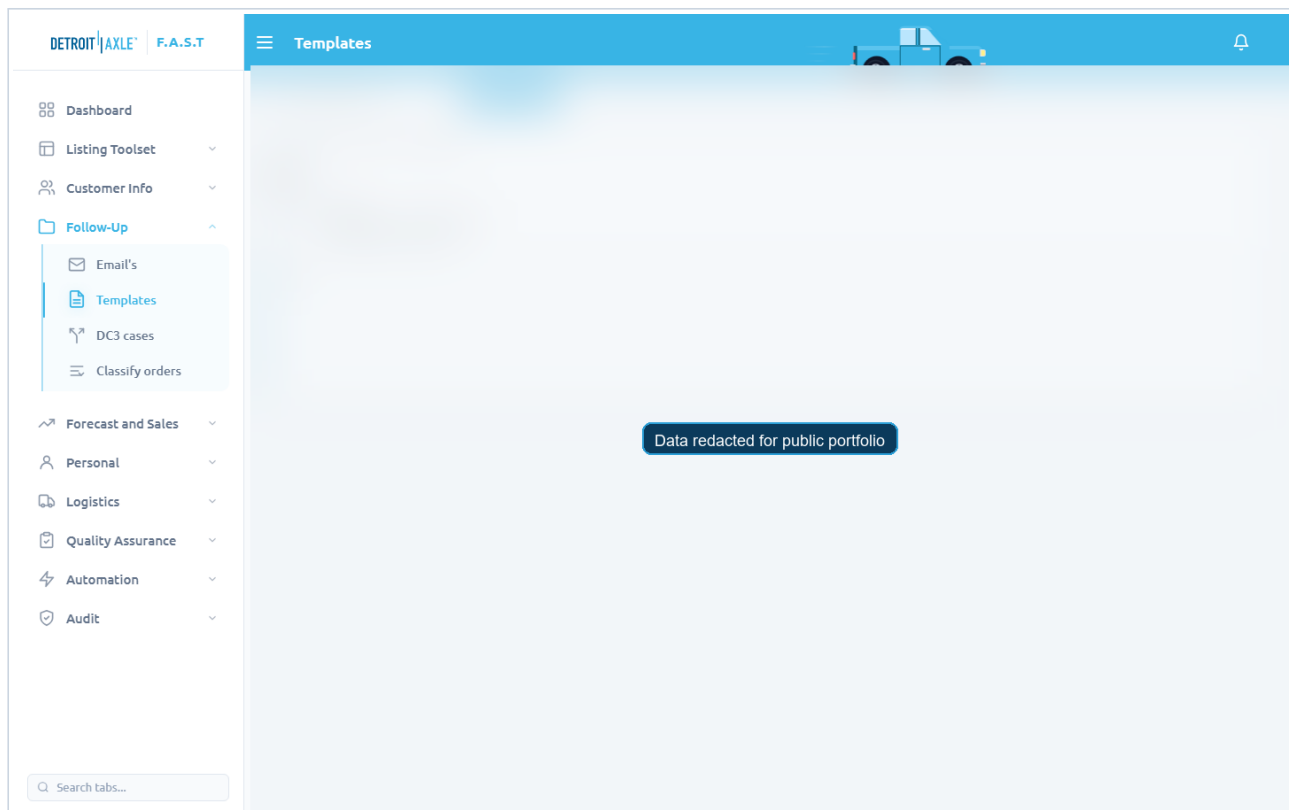

Figure — Follow-Up Templates

DC3 cases

Menu path: Follow-Up → DC3 cases

View ID: view-follow-up-cases

Permission: view-follow-up-cases

What it is

DC3 case follow-up queue with batch send sidebar (preview / Power Automate), case detail, and email render modals.

Main UI areas

- 1 Cases table
- 1 Send batch sidebar
- 1 Case detail and rendered email modals

What you can do

- 1 Work the DC3 follow-up case list.
- 2 Build a batch and preview messages.
- 3 Trigger send via the integrated automation path.
- 4 Open a case for full context before contacting the customer.

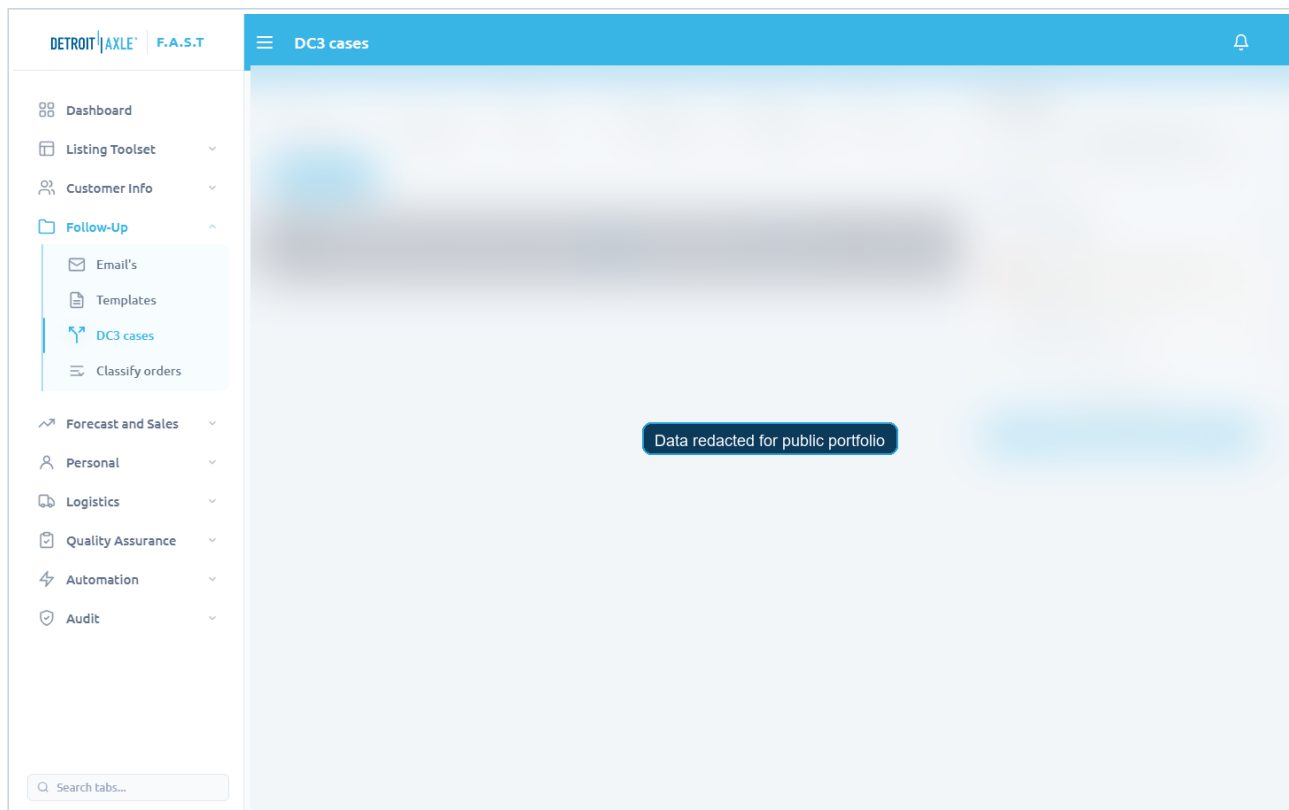

Figure — Follow-Up DC3 cases

Classify orders

Menu path: Follow-Up → Classify orders

View ID: view-follow-up-classify-orders

Permission: view-follow-up-classify-orders

What it is

Order classification UI so follow-up teams tag orders into the correct outreach buckets.

Main UI areas

- 1 Order classification workspace (filters and classification actions)

What you can do

- 1 Load orders needing classification.
- 2 Assign the correct follow-up class.
- 3 Feed classified orders into Email's / cases workflows.

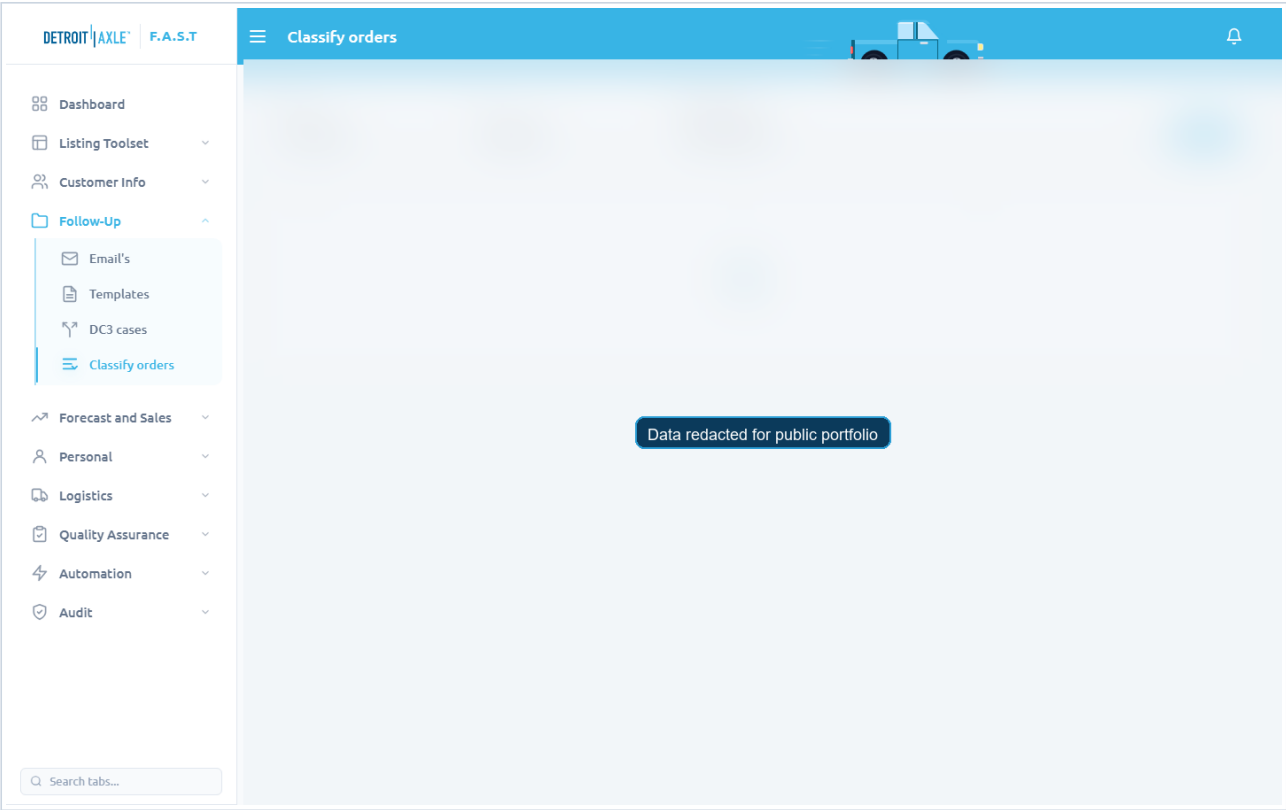

Figure — Classify orders

6. Forecast and Sales

Statistical projections, geographic sales reporting, dashboards, market share, and Amazon market uploads.

Statistical Projection

Menu path: Forecast and Sales → Statistical Projection

View ID: view-forecast-advanced

Permission: view-forecast-advanced

What it is

Macro / SKU statistical projection charts: math breakdown, volume, month matrix, and channel revenue share (year toggles).

Main UI areas

- 1 Math breakdown table
- 1 Volume chart and month matrix
- 1 Channel revenue share (e.g. 2025/2026 toggle)
- 1 Additional forecast cards below the fold

What you can do

- 1 Review projection math and volume trends.
- 2 Toggle years / channels for share analysis.
- 3 Use hero SKU / call highlights when shown on the page or dashboard widgets.

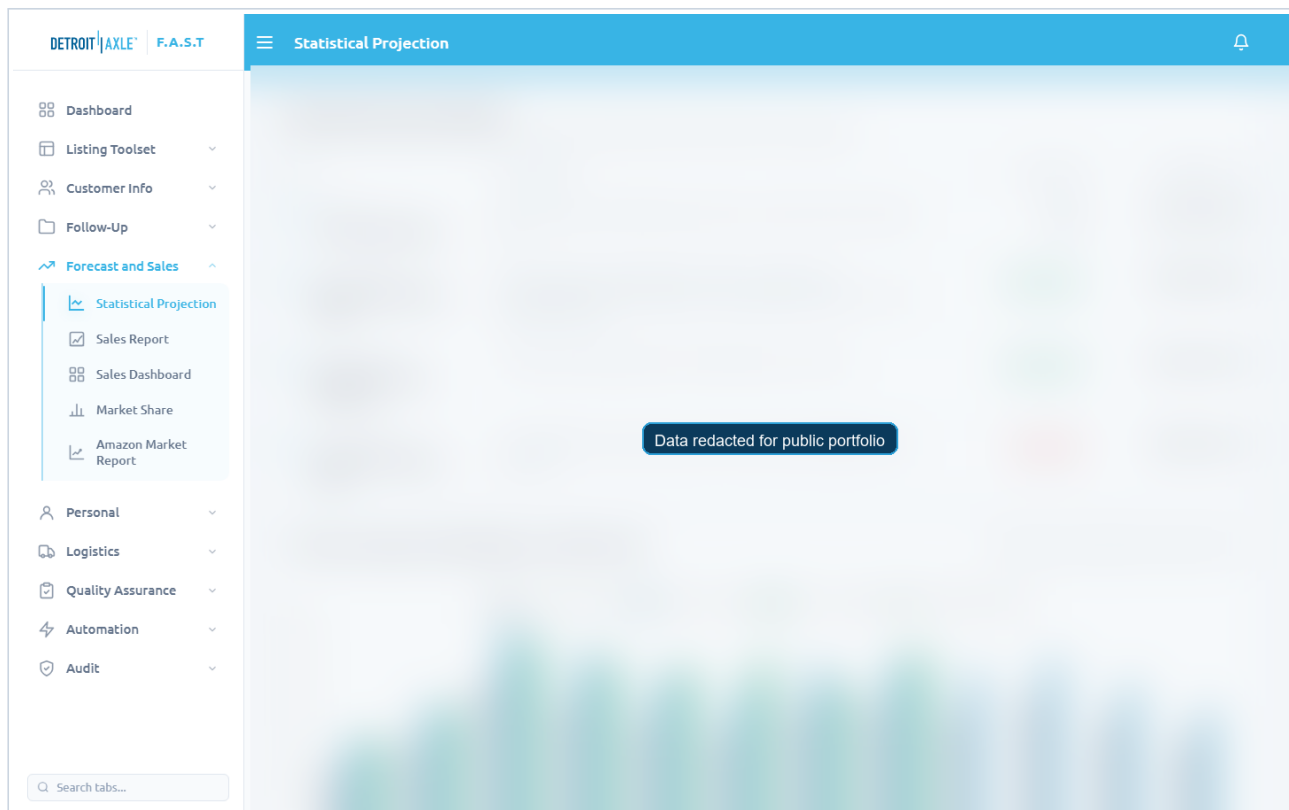

Figure — Statistical Projection

Sales Report

Menu path: Forecast and Sales → Sales Report

View ID: view-sales-report

Permission: view-sales-report

What it is

Geo / county / city sales report with map interaction, period compare, and exports.

Main UI areas

- 1 US map with zoom
- 1 Period comparison controls
- 1 Top counties (and related geo) panel
- 1 Export actions

What you can do

- 1 Select periods to compare.
- 2 Zoom the map into regions of interest.
- 3 Review top counties/cities and export results.

Tip: Open the period picker (A / B dates), then click **Apply** to generate the geo map and county panels. First generation can take a minute.

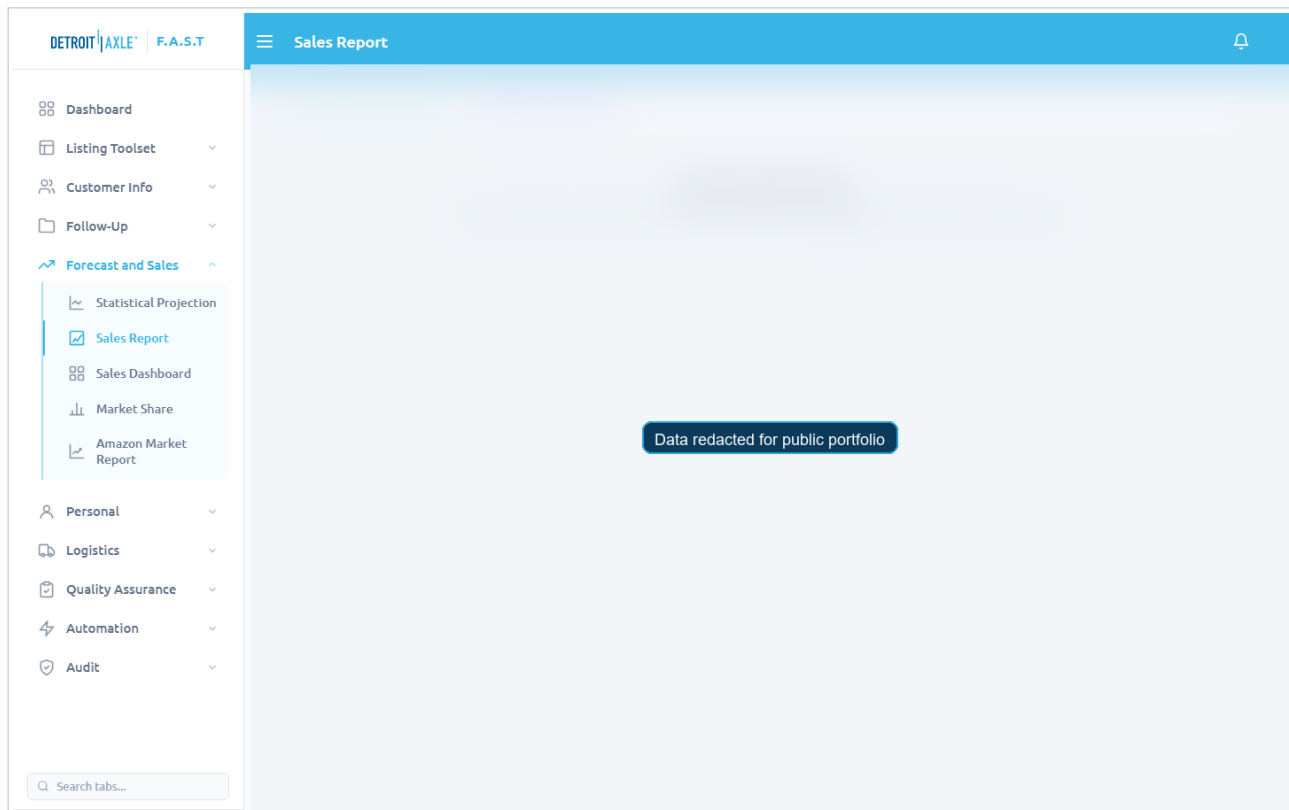

Figure — Sales Report

Sales Dashboard

Menu path: Forecast and Sales → Sales Dashboard

View ID: view-sales-dashboard

Permission: view-sales-dashboard

What it is

Sales heatmap-style dashboard with marketplace / year / month filters and weekly / weekday charts.

Main UI areas

- 1 Marketplace, year, month filters
- 1 Weekly trend chart
- 1 Weekday distribution chart

What you can do

- 1 Filter by marketplace and calendar period.
- 2 Read weekly and weekday patterns.
- 3 Share screenshots or exports for sales meetings.

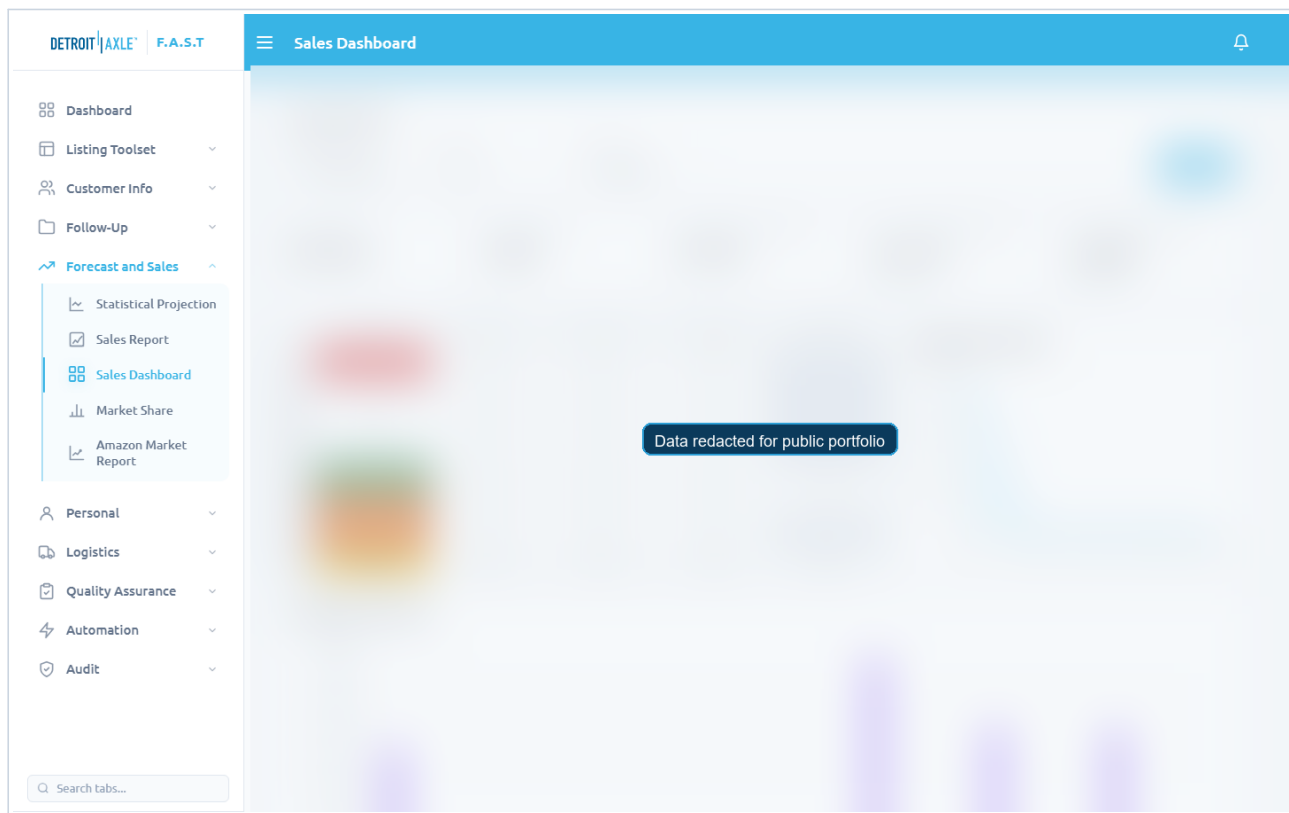

Figure — Sales Dashboard

Market Share

Menu path: Forecast and Sales → Market Share

View ID: view-msa

Permission: view-msa

What it is

Market Share Analyzer: upload market data, filter by week range, chart overall share and category analysis, export Excel.

Main UI areas

- 1 Upload and week-range filters
- 1 Overall share chart
- 1 Category analysis
- 1 Excel export

What you can do

- 1 Upload the weekly market input files.
- 2 Set the week range and refresh charts.
- 3 Drill category share and export an Excel workbook.

Related: MSA weekly digest can be emailed via Power Automate.

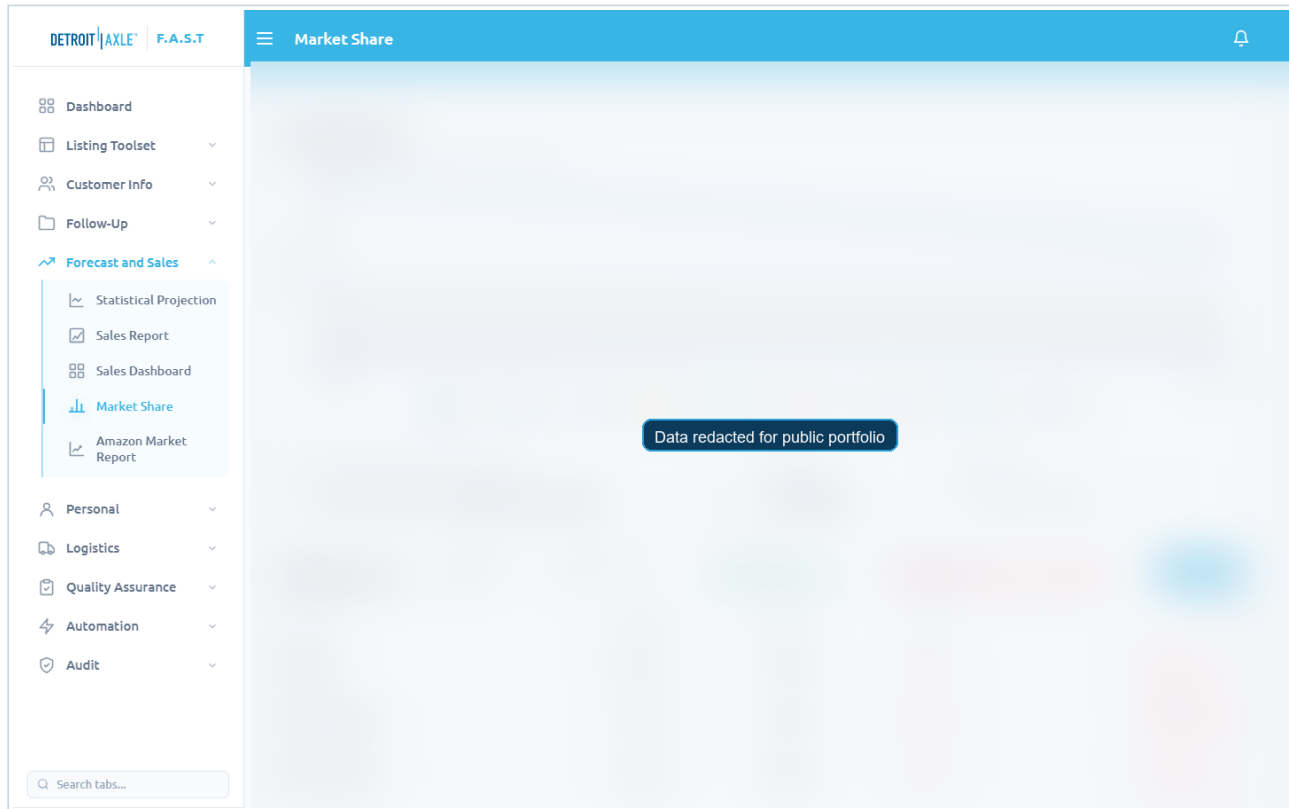

Figure — Market Share

Amazon Market Report

Menu path: Forecast and Sales → Amazon Market Report

View ID: view-amazon-market-report

Permission: view-amazon-market-report

What it is

Amazon market report analyze / export: choose report type, set dates, upload weekly CSVs, and run analysis.

Main UI areas

- 1 Report-type toggle
- 1 Date filters
- 1 Weekly CSV upload

What you can do

- 1 Select the report type and date window.
- 2 Upload the weekly Amazon market CSV(s).
- 3 Run analyze / export for the selected period.

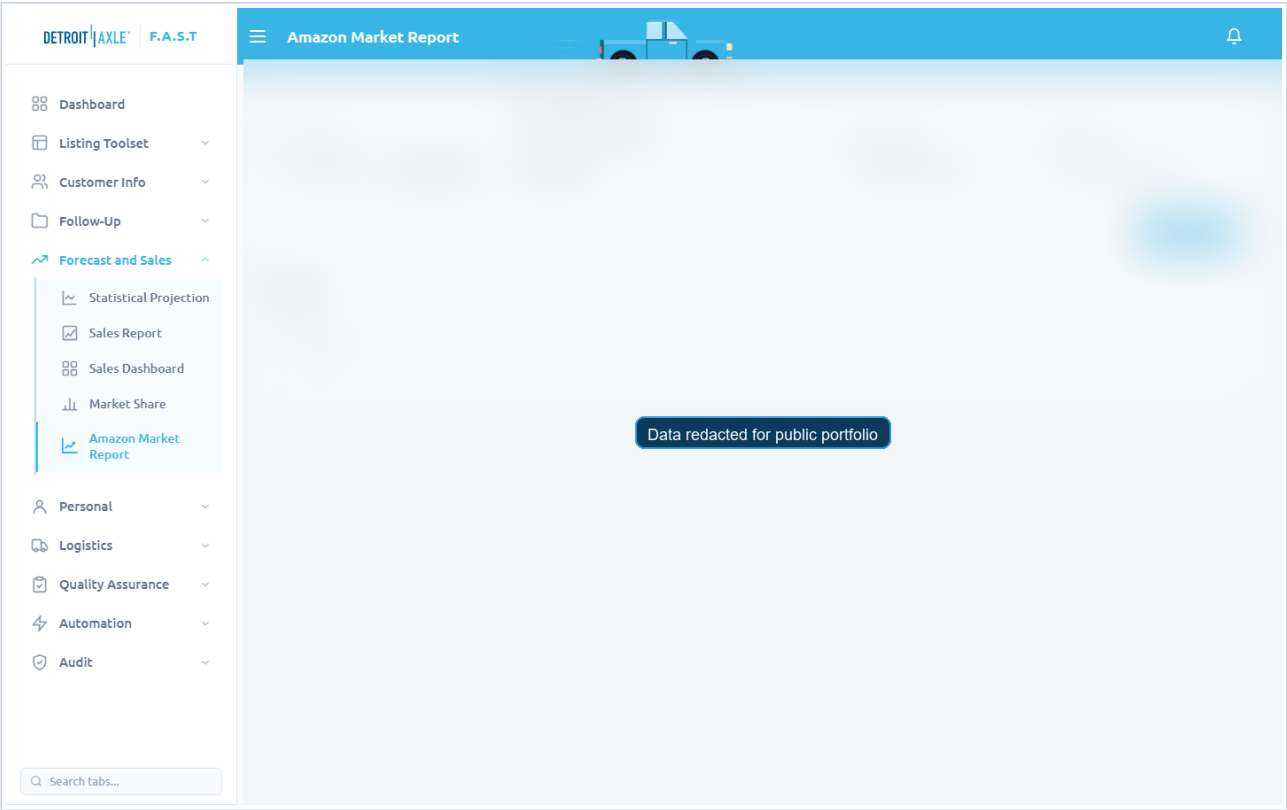

Figure — Amazon Market Report

7. Personal

Breaks, shared snippets, user/role administration, and activity logging.

Breaks

Menu path: Personal → Breaks

View ID: view-breaks

Permission: view-breaks

What it is

Real-time break tracking for employees, plus a manager shell for caps, schedules, QR codes, department reports, and user history. Floor scanning uses the standalone Break QR portal.

Main UI areas

- 1 Employee break clock / request UI
- 1 Manager shell (when permitted): concurrent/daily caps, schedule mode, QR codes
- 1 Department report and user history modals

What you can do

- 1 Request or start/end a break from the Breaks view or topbar control.
- 2 Managers set concurrent/daily limits and schedule modes.
- 3 Generate QR codes for floor scan check-in.
- 4 Run department reports and inspect user break history.
- 5 Partners/floor staff open /break/scan with a QR token.

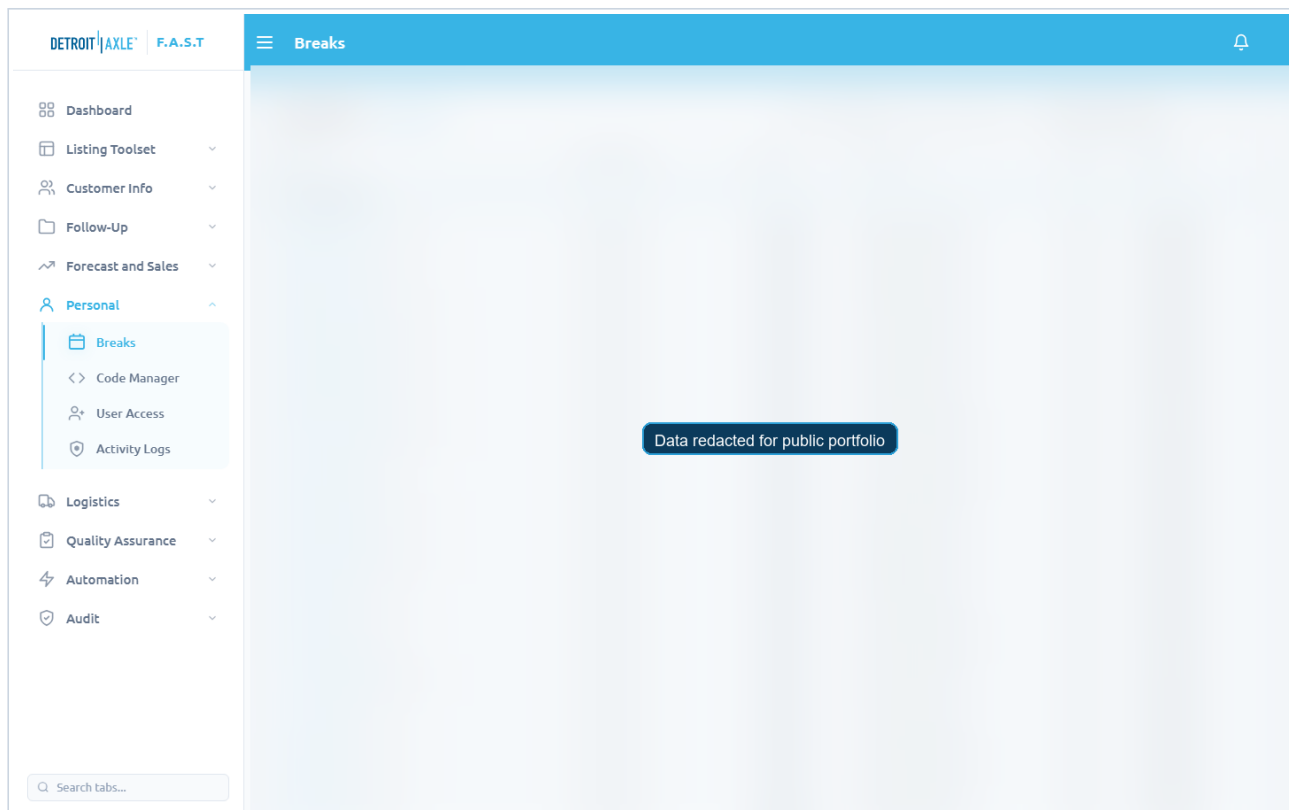

Figure — Breaks

Code Manager

Menu path: Personal → Code Manager

View ID: view-code-manager

Permission: view-code-manager

What it is

Shared code snippet library for teams to store and reuse small scripts or paste blocks.

Main UI areas

- 1 Snippet library list
- 1 New / edit snippet modal

What you can do

- 1 Browse shared snippets.
- 2 Create or update a snippet.
- 3 Copy snippet content into your workflow tools.

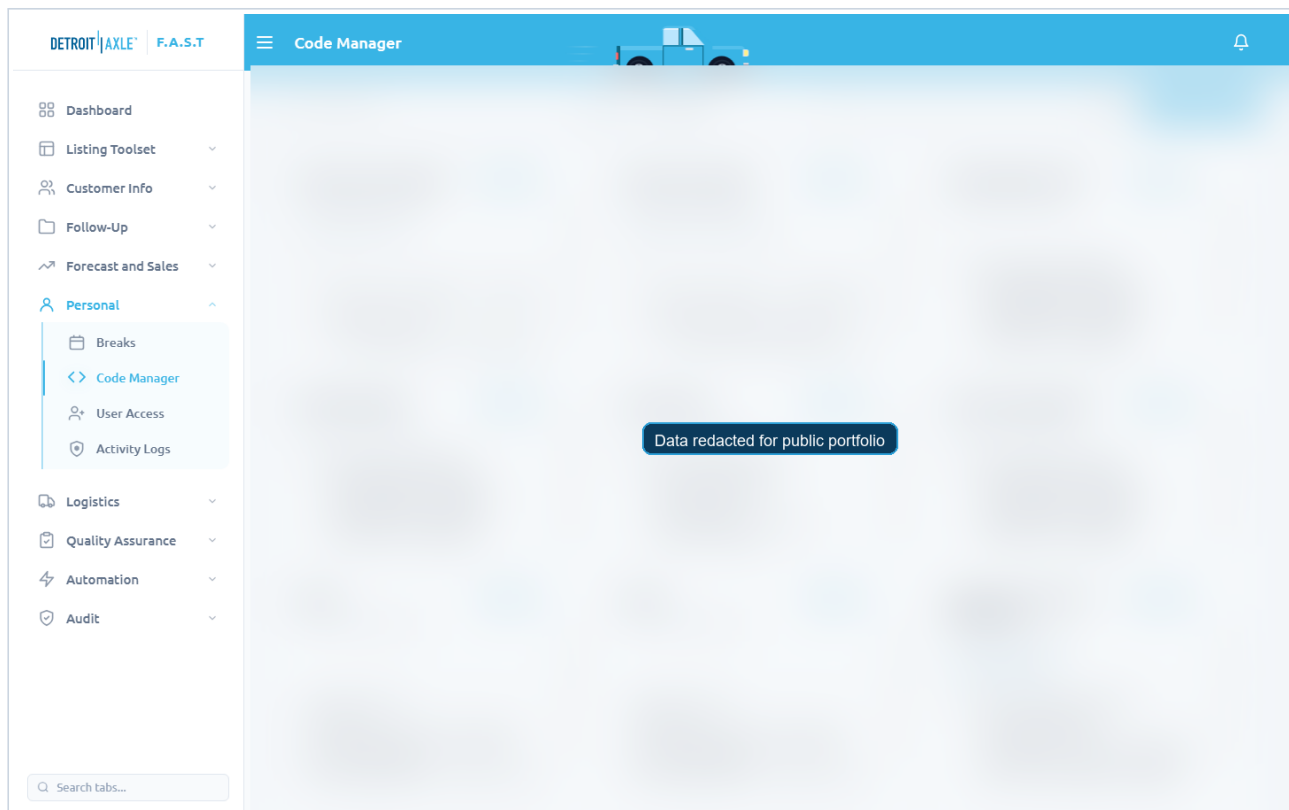

Figure — Code Manager

User Access

Menu path: Personal → User Access *(permission-gated)*

View ID: view-user-access

Permission: view-user-access

What it is

User, role, department, and team administration for F.A.S.T., including the permission matrix that controls which sidebar views appear.

Main UI areas

- 1 Tabs: Users, Roles, Add user, Departments, Teams, Import, Widgets, System banner
- 1 Modals: profile, edit user, permissions, bulk password, invite, department editors

What you can do

- 1 Invite or add users; assign roles and departments.
- 2 Edit role permission checkboxes to match the live sidebar catalog.
- 3 Import users in bulk when available.
- 4 Configure dashboard widgets and the system banner.
- 5 Reset or bulk-update passwords per policy.

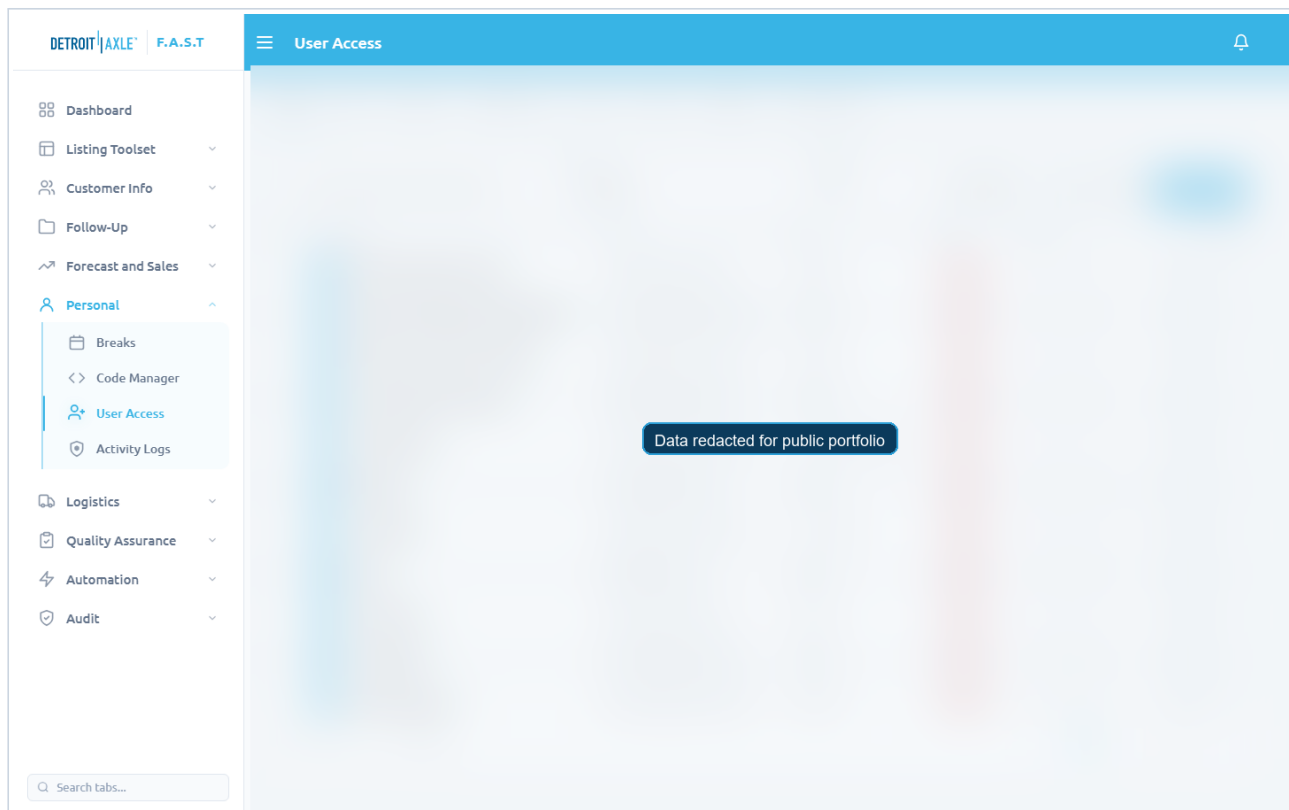

Figure — User Access

Activity Logs

Menu path: Personal → Activity Logs *(permission-gated)*

View ID: view-activity-log-v2

Permission: view-activity-log-v2

What it is

Live activity / security log with request charts, filters, pagination, and export — for investigating usage and detections.

Main UI areas

- 1 Time range and live filters
- 1 Request activity chart
- 1 Paginated log table
- 1 Export modal

What you can do

- 1 Set a time range and enable live refresh when monitoring.
- 2 Filter and page through requests / events.
- 3 Export logs for offline review or escalation.

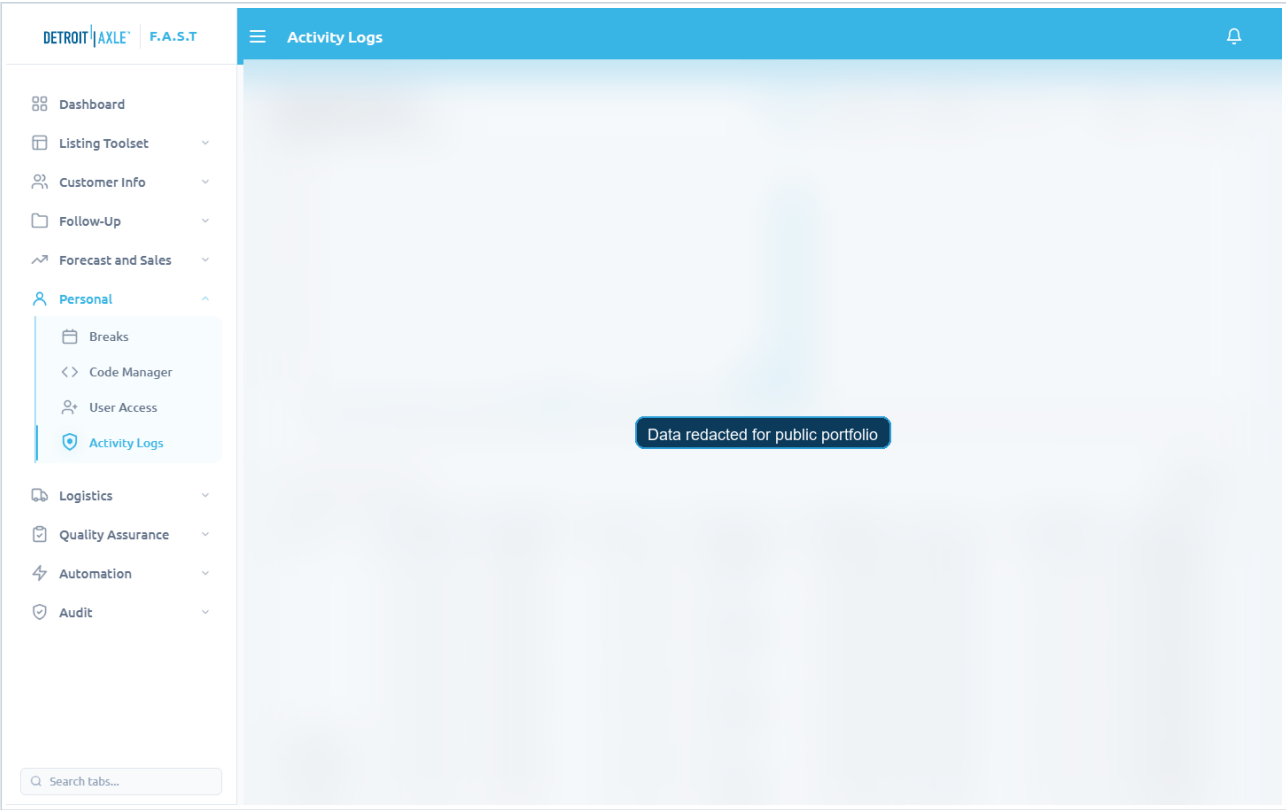

Figure — Activity Logs

8. Logistics

Warehouse bay reporting, ocean container tracking, NetSuite invoice parsing, PT invoice audit, and location mapping. Partner-facing factory and customs portals are covered in **External portals**.

Bay Logistics

Menu path: Logistics → Bay Logistics

View ID: view-bay-logistics-report

Permission: view-bay-logistics-report

What it is

Bay logistics report generator: upload the required source files, choose MS target (1.5 / 1.0 / Both), generate inventory outputs, and download results.

Main UI areas

- 1 Four source-file upload slots
- 1 MS target selector (1.5 / 1.0 / Both)
- 1 Generate action and download grid for outputs

What you can do

- 1 Upload each required input file into the matching slot.
- 2 Select the MS target mode.
- 3 Run **Generate** and wait for job completion.
- 4 Download the produced inventory / bay reports from the results grid.

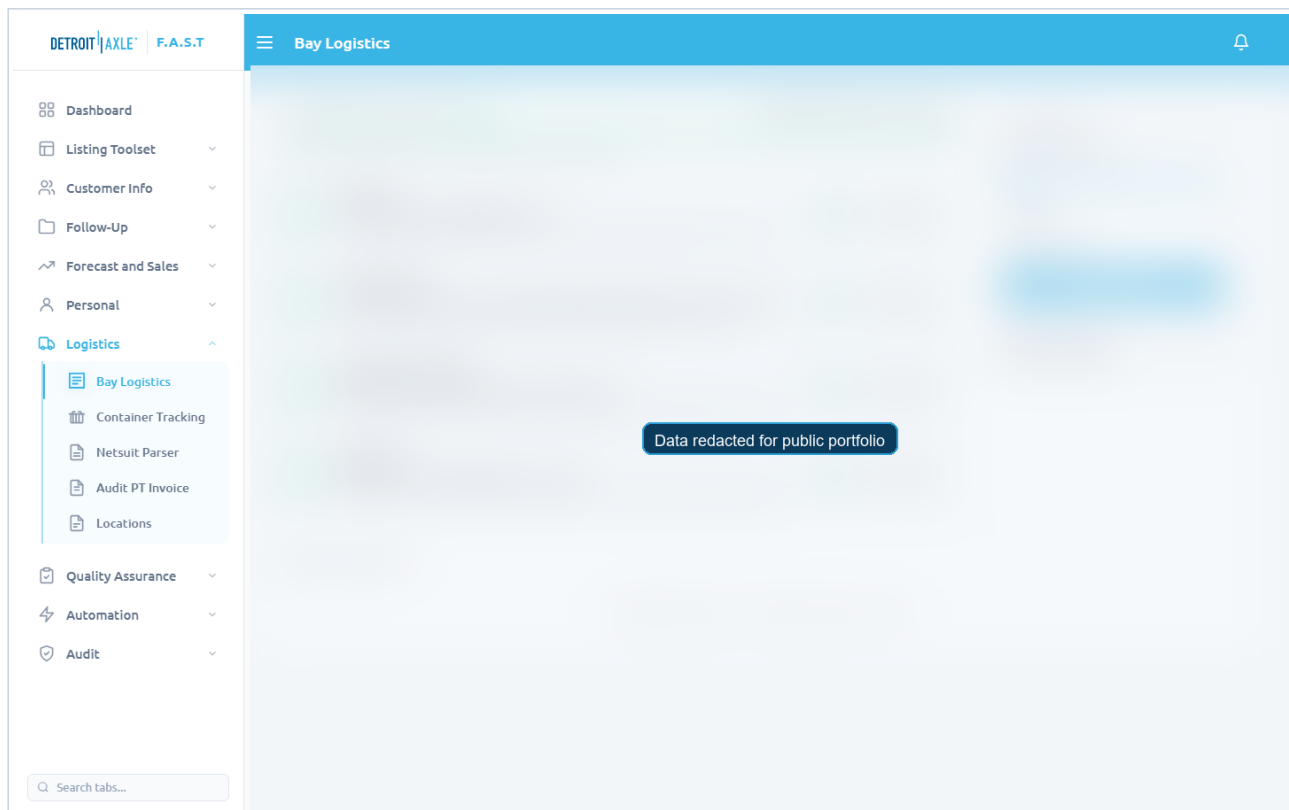

Figure — Bay Logistics

Container Tracking

Menu path: Logistics → Container Tracking

View ID: view-container-tracking

Permission: view-container-tracking

What it is

Ocean container tracking with documents, Terminal49 integration, factory Excel upload wizard, production/FIR review, and export. Container documents can sync to SharePoint; Terminal49 webhooks keep status current.

Main UI areas

- 1 Summary strip and main containers table with filters
- 1 Container **detail** page (status, milestones, documents)
- 1 **Upload factory Excel** wizard
- 1 Modals: add container (single/bulk), Terminal49, more filters, export columns, production review, factory reject

What you can do

- 1 Filter and scan the container list; open a container for detail.
- 2 Add containers singly or in bulk; pull Terminal49 tracking.
- 3 Upload factory Excel packs through the wizard.
- 4 Review production / FIR items; reject factory submissions when needed.

- 5 Export selected columns for stakeholders.
- 6 Attach or review customs/logistics documents on the container.

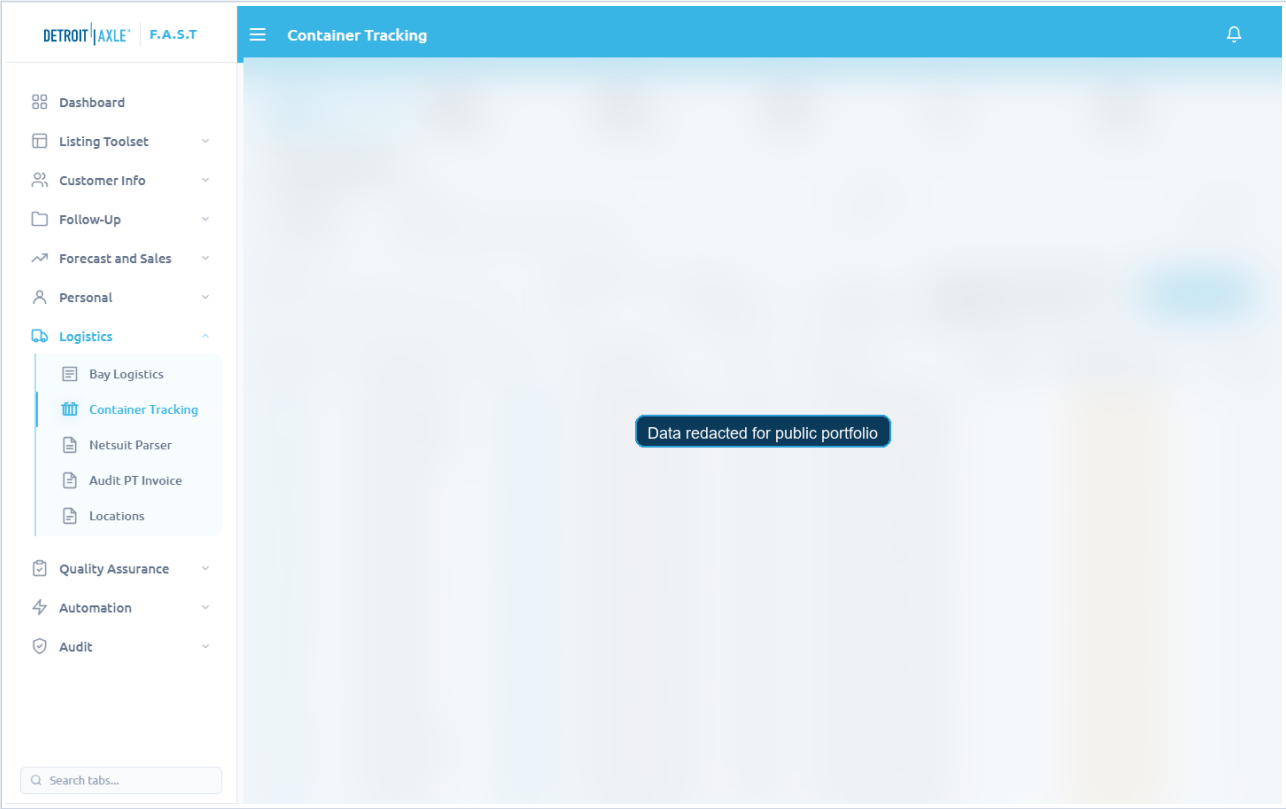

Figure — Container Tracking — list

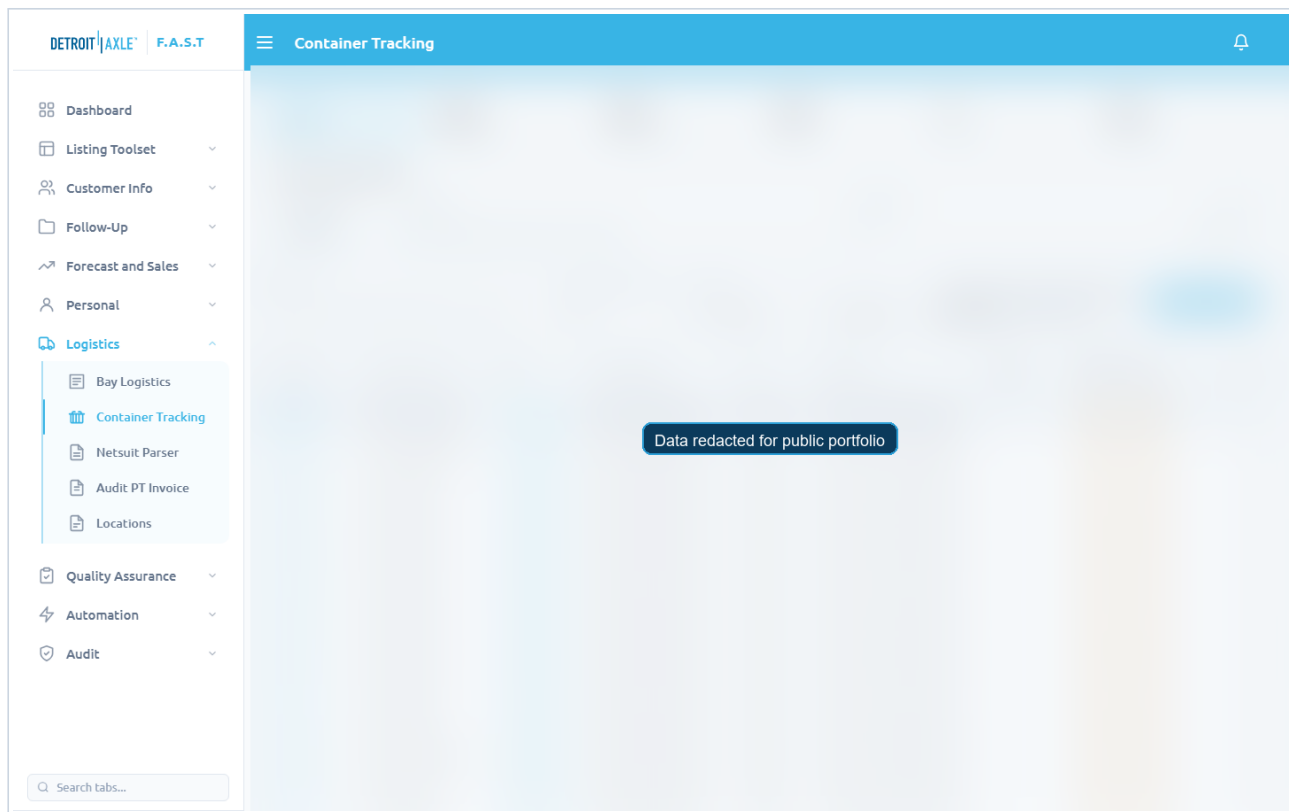

Figure — Container Tracking — detail

Netsuit Parser

Menu path: Logistics → Netsuit Parser

View ID: view-inbound-master

Permission: view-inbound-master

What it is

Inbound Master / NetSuite CSV builder: drop commercial invoices, extract line data, preview, and download MASTER CSVs for NetSuite. Email intake and weekly digests can run via Power Automate.

Main UI areas

- 1 Commercial invoice drop zone
- 1 Upload list and **Extract** action
- 1 Admin panel (where permitted)
- 1 Preview of extracted / built CSV content

What you can do

- 1 Drop vendor commercial invoices into the uploader.
- 2 Run extract / build jobs for the selected files.
- 3 Preview results and download MASTER CSVs.
- 4 Use admin tools for retries or job oversight when enabled.

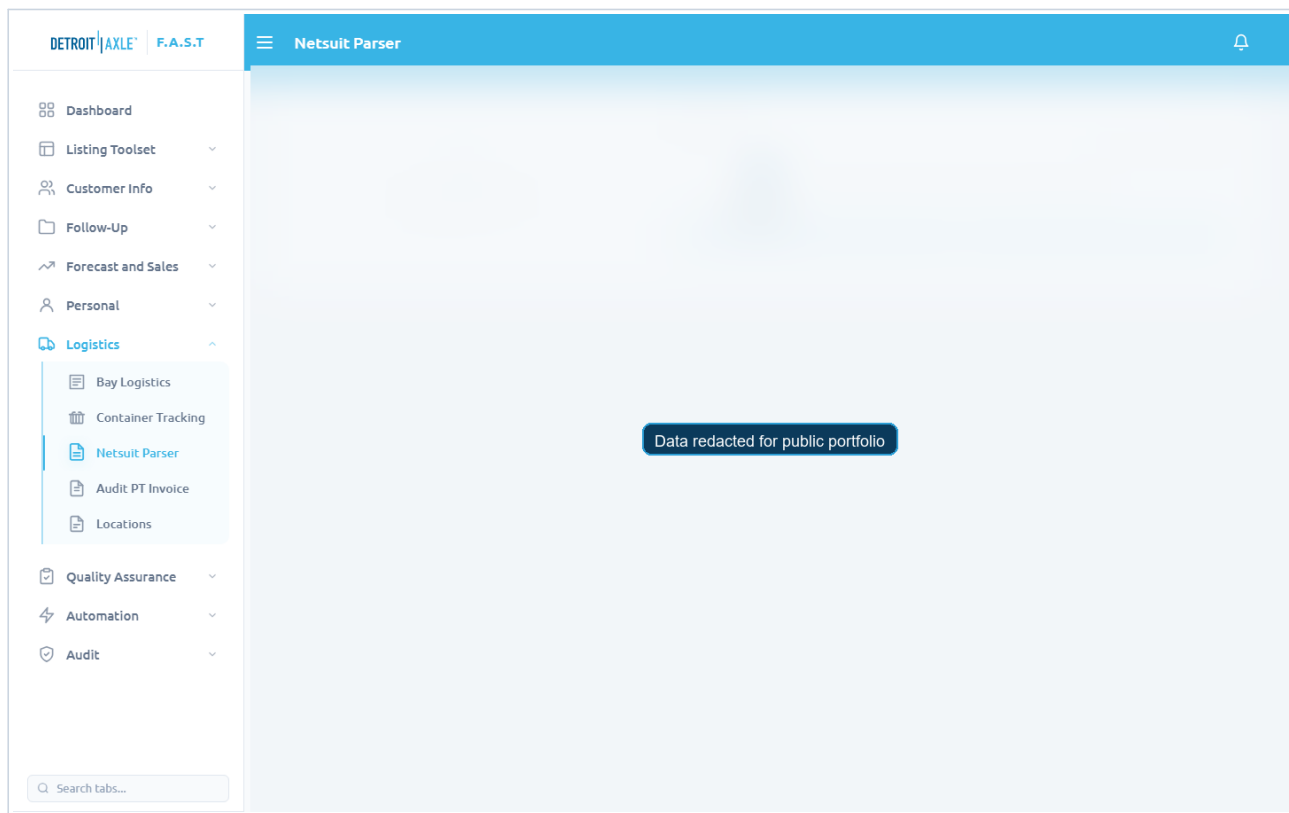

Figure — Netsuit Parser

Audit PT Invoice

Menu path: Logistics → Audit PT Invoice

View ID: view-audit-pt-invoice

Permission: view-audit-pt-invoice

What it is

PT invoice audit against 321 price reference CSVs: upload PT PDFs and 321 CSVs, reconcile, filter results, and download audit reports. Jobs and alerts can publish to SharePoint / email digests.

Main UI areas

- 1 Dual drop zones: PT PDFs and 321 CSVs
- 1 Reconcile / job controls
- 1 Filterable results grid and downloads

What you can do

- 1 Upload PT invoice PDFs into the left (or PDF) drop zone.
- 2 Upload matching 321 CSVs into the reference drop zone.
- 3 Run the audit job and filter mismatches / exceptions.
- 4 Download audit workbooks for finance or purchasing follow-up.

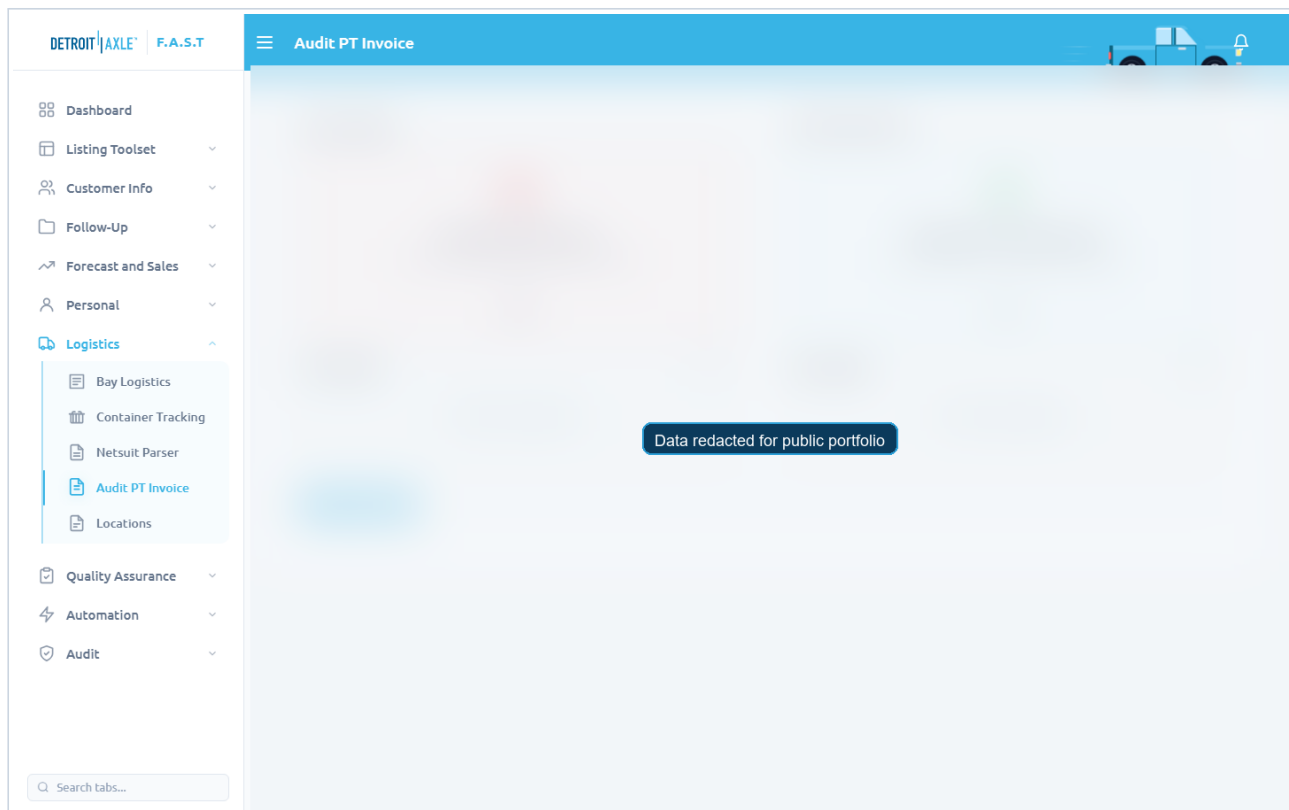

Figure — Audit PT Invoice

Locations

Menu path: Logistics → Locations

View ID: view-dev-1

Permission: view-dev-1

What it is

Location tooling: pick NetSuite containers (optional commercial invoice upload) and map stock-unit CSVs to warehouse locations.

Main UI areas

- 1 NetSuite container picker
- 1 Optional CI upload
- 1 Stock-unit CSV → location mapping outputs

What you can do

- 1 Select the NetSuite container(s) in scope.
- 2 Optionally attach a commercial invoice.
- 3 Upload stock-unit CSV and generate location mapping files.

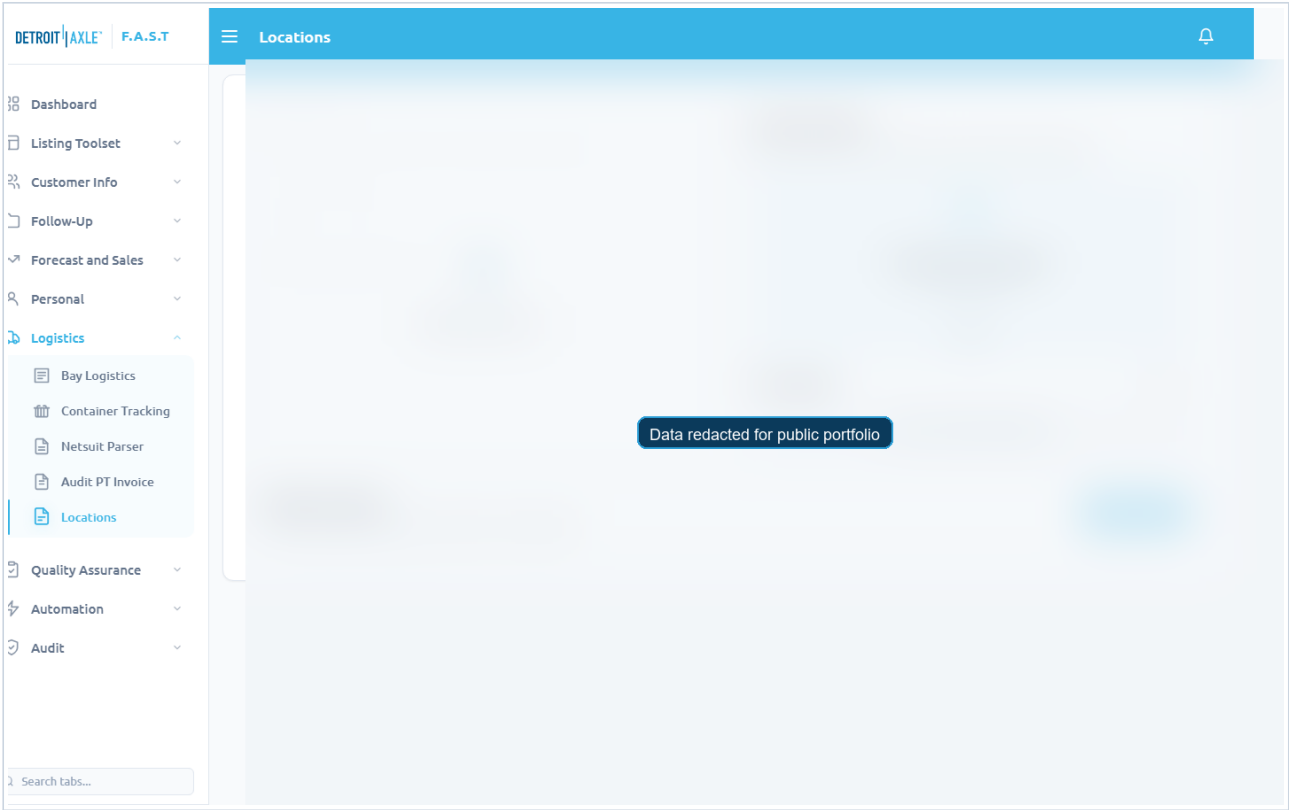

Figure — Locations

9. Quality Assurance

Native Detroit Axle QA inside F.A.S.T.: scoring, audits, release, production data, monitoring, feedback, supervisor workflows, heatmaps, and coaching.

Overview

Menu path: Quality Assurance → Overview

View ID: view-qa-overview

Permission: view-qa-overview (reports also use view-qa-reports)

What it is

QA analytics hub with Overview, Action Center, Rankings, Insights, and Reports tabs.

Main UI areas

- 1 Tabs: Overview, Action Center, Rankings, Insights, Reports
- 1 Team selector modal

What you can do

- 1 Open Overview for team QA health at a glance.
- 2 Use Action Center for items needing attention.
- 3 Compare rankings and insights; open Reports for packaged exports.

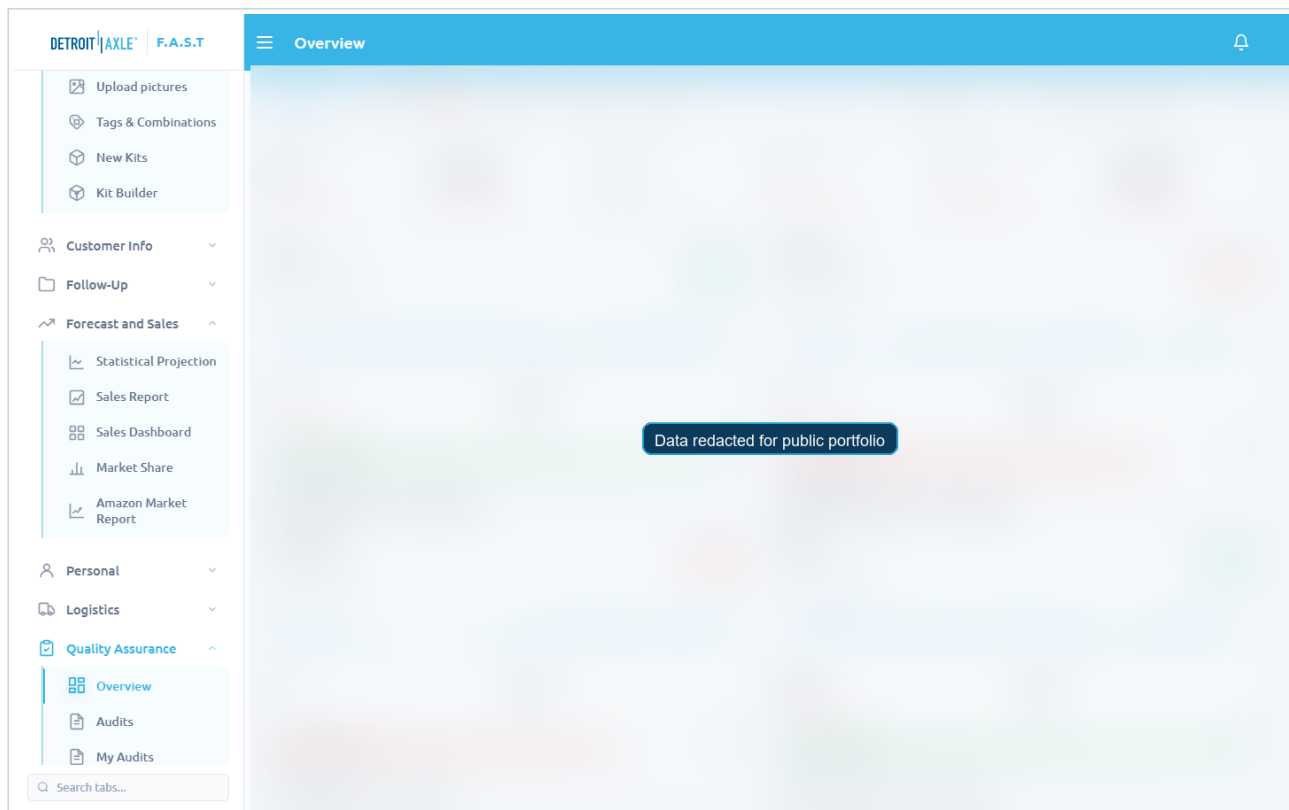

Figure — QA Overview

Audits

Menu path: Quality Assurance → Audits

View ID: view-qa-audits

Permission: view-qa-audits / manage-qa-audits / delete-qa-audits

What it is

Create and manage QA audits: filtered list, new-audit wizard, audit detail, and done-coaching modal.

Main UI areas

- 1 Filtered audit list
- 1 **New audit** wizard
- 1 Audit detail workspace
- 1 Done coaching modal

What you can do

- 1 Filter audits by agent, status, or date.
- 2 Start a new audit via the wizard and score the interaction.
- 3 Release / complete audits and capture coaching when done.
- 4 Delete audits only with delete permission.

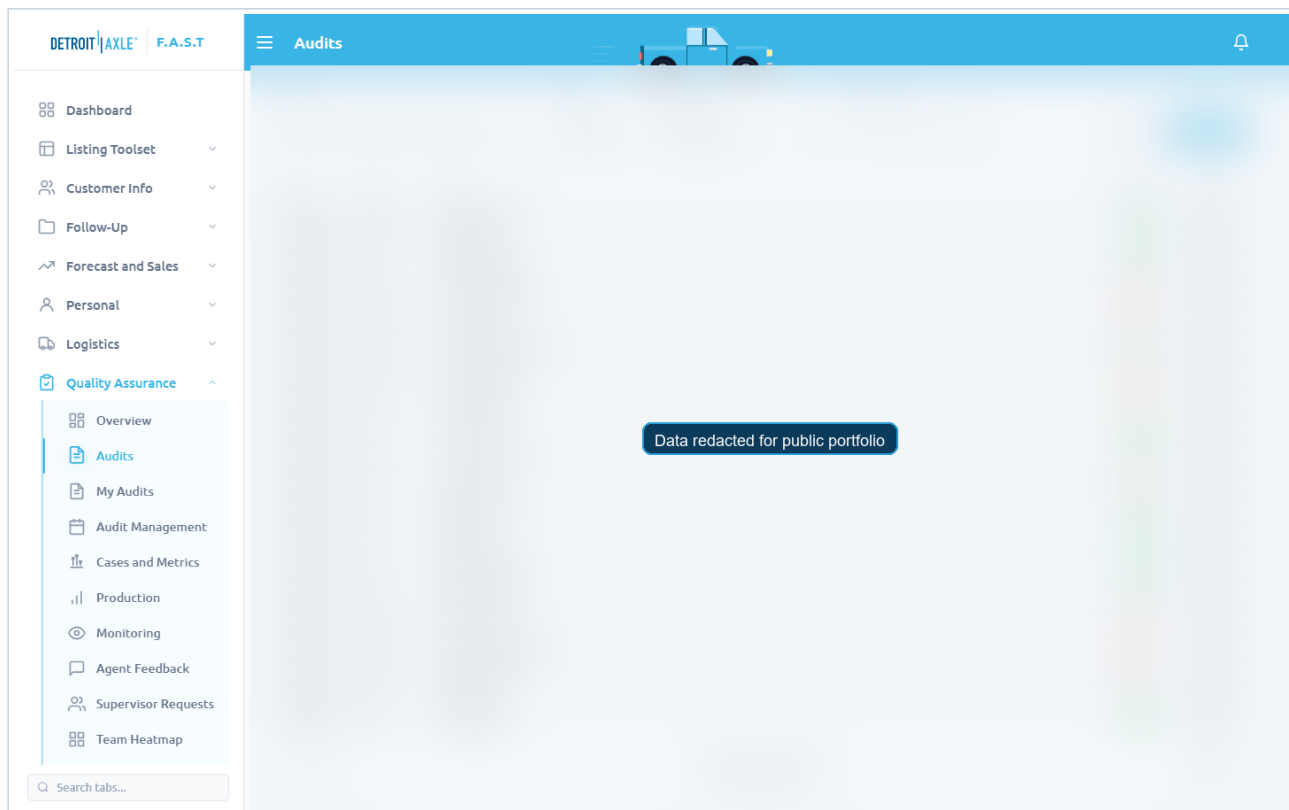

Figure — QA Audits

My Audits

Menu path: Quality Assurance → My Audits

View ID: view-qa-my-audits

Permission: view-qa-my-audits

What it is

Agent-facing list of released audits for self-review.

What you can do

- 1 Open audits released to you.
- 2 Review scores and feedback for improvement.

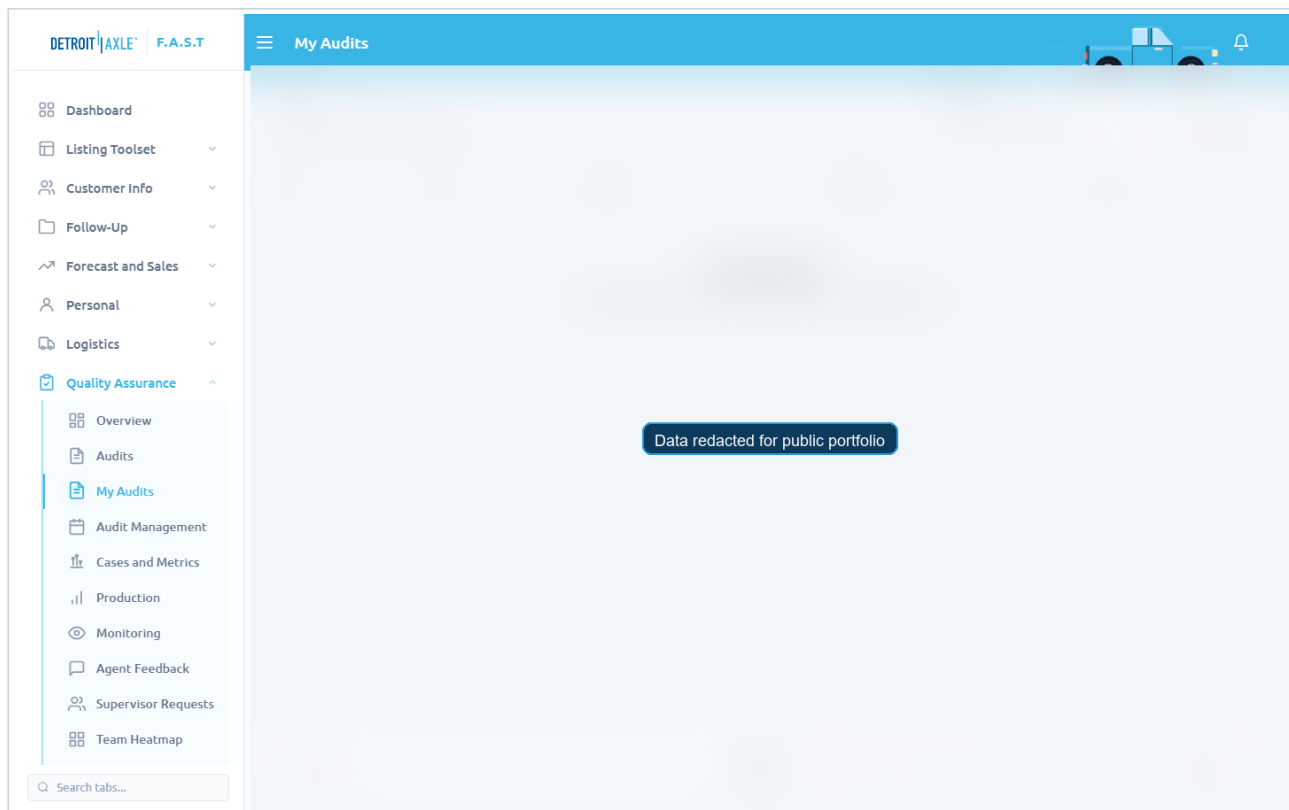

Figure — QA My Audits

Audit Management

Menu path: Quality Assurance → Audit Management

View ID: view-qa-audit-management

Permission: view-qa-audit-management

What it is

Admin view of evaluation progress and audit records, including share monthly QA wizard.

Main UI areas

- 1 Tabs: Evaluation Progress / Audit Records
- 1 Share monthly QA wizard

What you can do

- 1 Track evaluation progress across the team.
- 2 Browse audit records for compliance.
- 3 Share monthly QA packages with stakeholders.

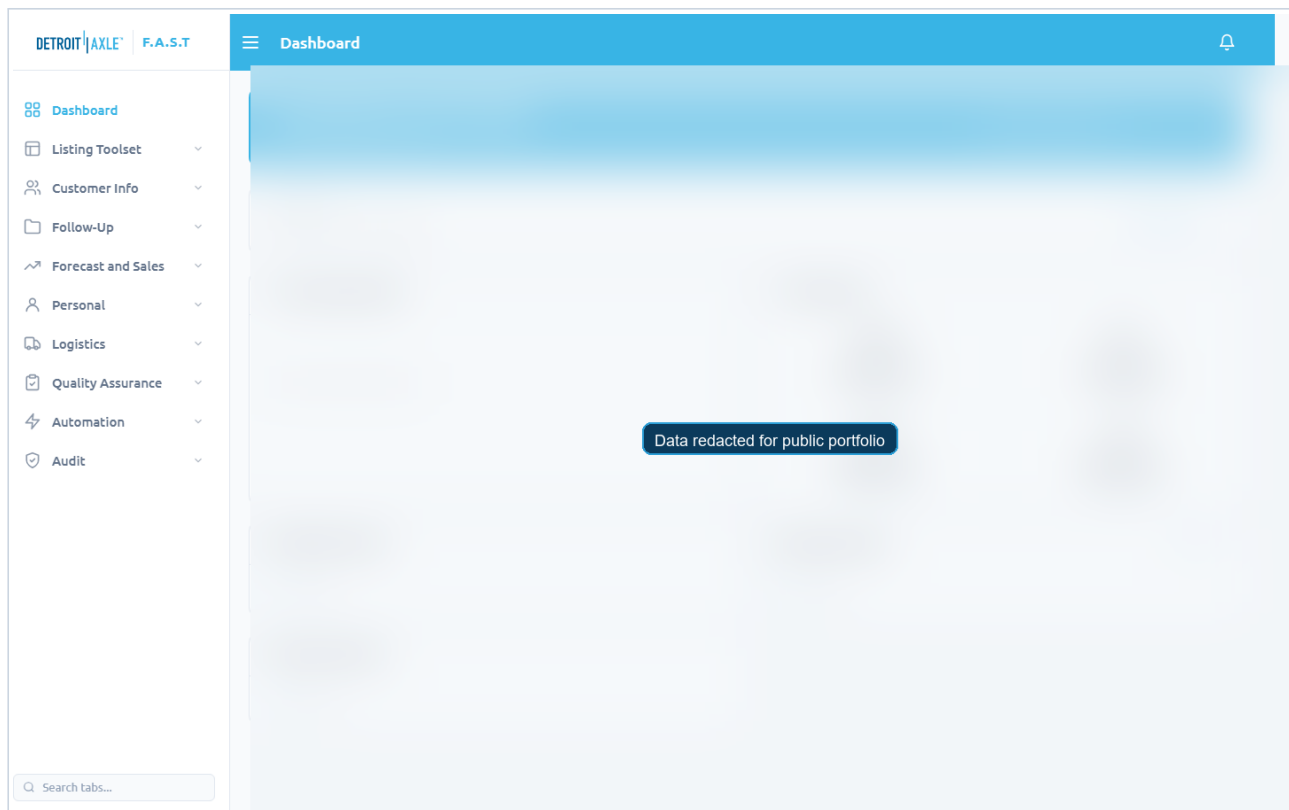

Figure — QA Audit Management

Cases and Metrics

Menu path: Quality Assurance → Cases and Metrics

View ID: view-qa-cases-metrics

Permission: view-qa-cases-metrics

What it is

Maintain QA metrics definitions and case types used across audits and reporting.

Main UI areas

- 1 Tabs: Metrics / Cases
- 1 Add metric / case modal

What you can do

- 1 Add or edit metrics.
- 2 Maintain case catalogs used in scoring.

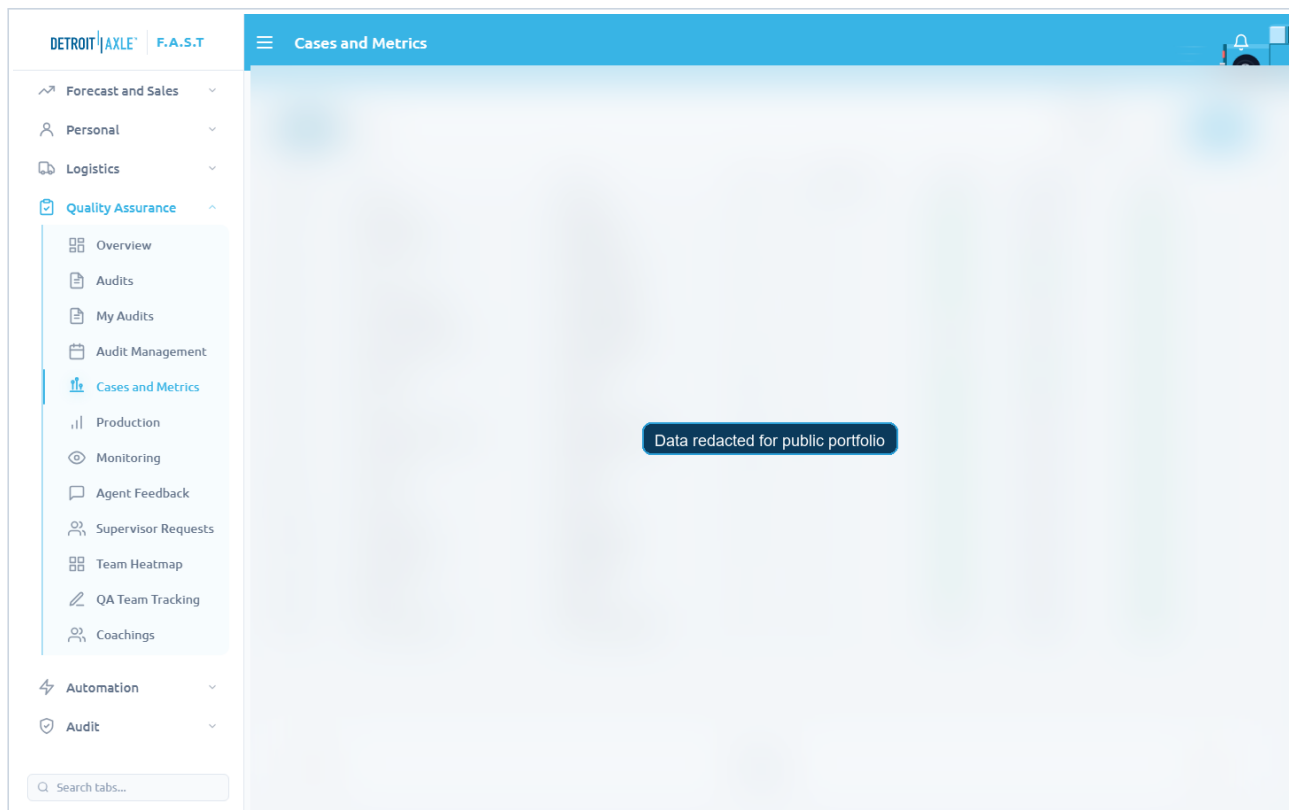

Figure — QA Cases and Metrics

Production

Menu path: Quality Assurance → Production

View ID: view-qa-production

Permission: view-qa-production / manage-qa-production

What it is

Production data intake for Calls, Tickets, Evidence, and Sales — CSV import plus add-one forms.

Main UI areas

- 1 Tabs: Calls / Tickets / Evidence / Sales
- 1 CSV import and single-row add forms

What you can do

- 1 Import production CSVs per tab.
- 2 Add individual production rows when needed.
- 3 Keep production volumes aligned for QA denominators.

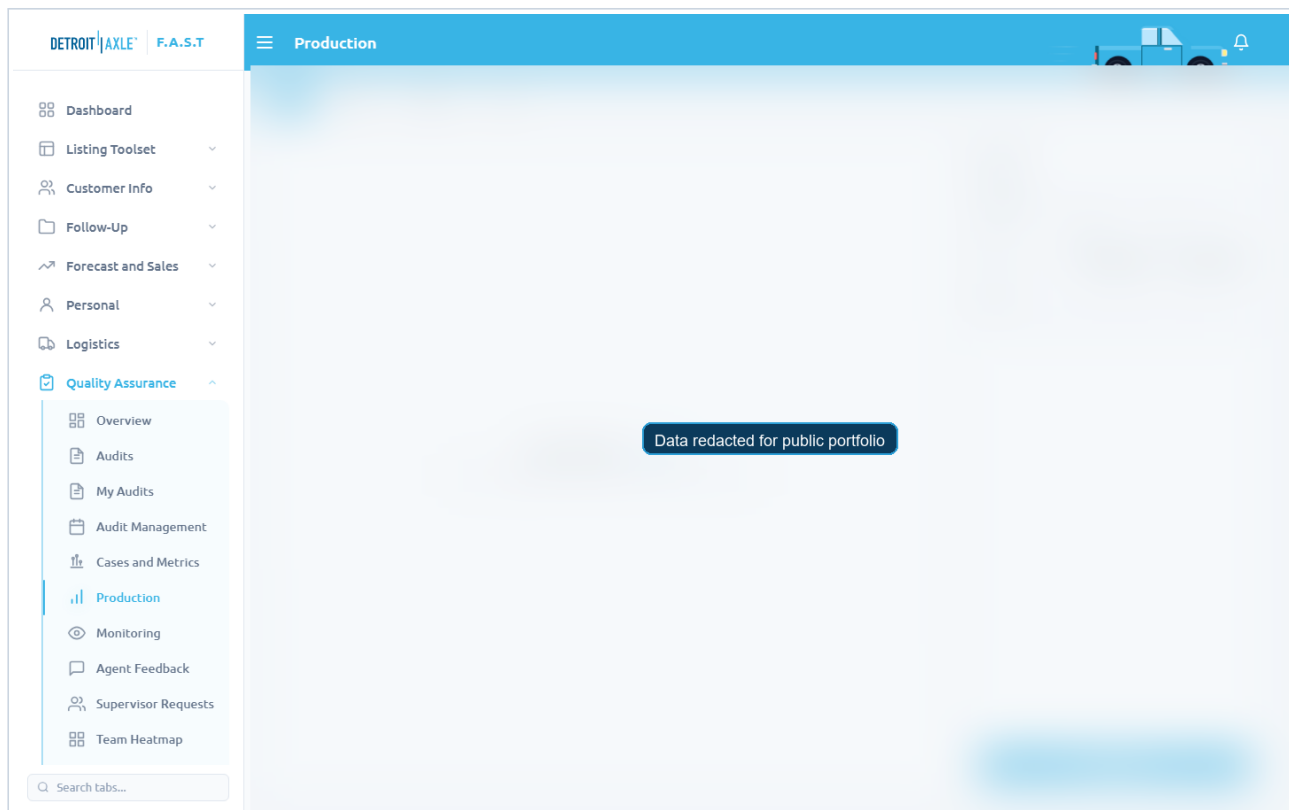

Figure — QA Production

Monitoring

Menu path: Quality Assurance → Monitoring

View ID: view-qa-monitoring

Permission: view-qa-monitoring / manage-qa-monitoring

What it is

Live/near-live monitoring items: list, detail, and create-monitoring wizard. Can integrate with Power Automate alerts.

Main UI areas

- 1 Monitoring item list + detail
- 1 Create monitoring wizard

What you can do

- 1 Browse open monitoring items.
- 2 Create a new monitoring case via the wizard.
- 3 Update status as coaching or remediation completes.

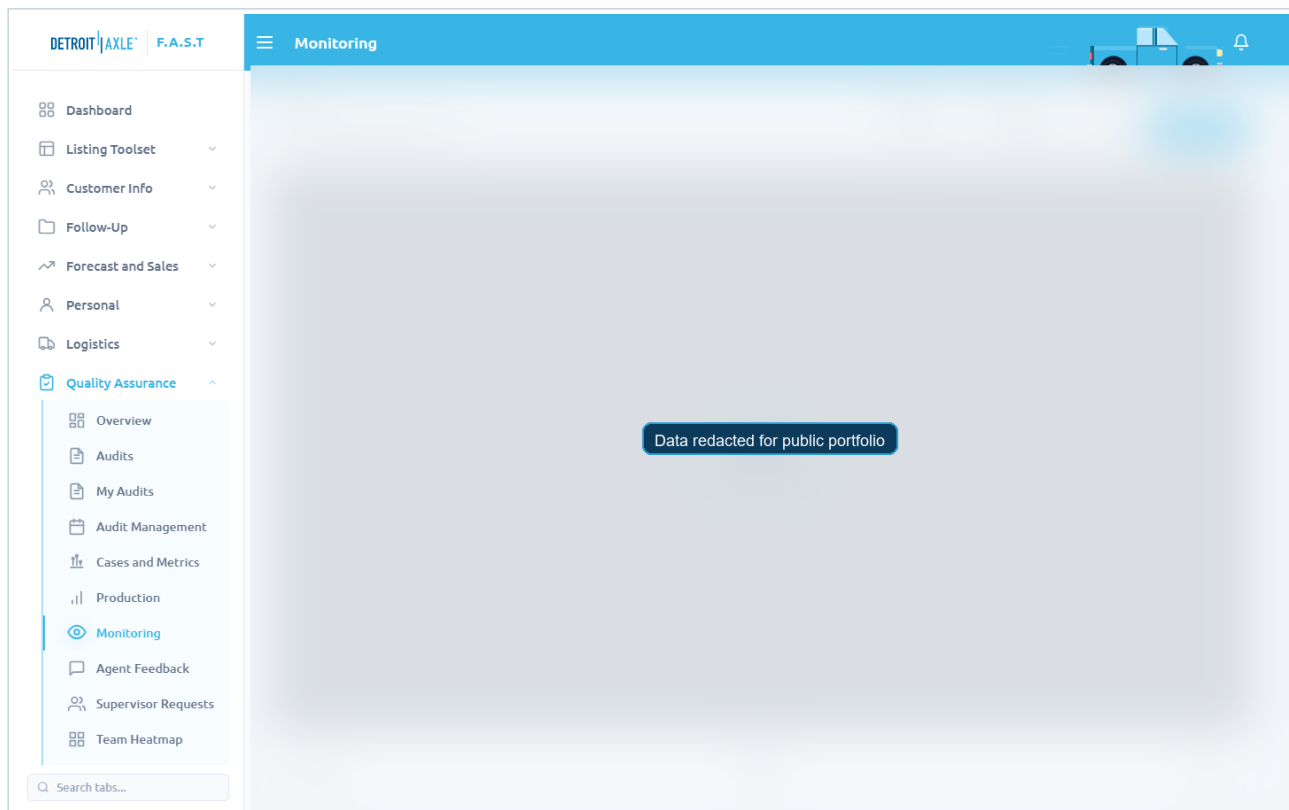

Figure — QA Monitoring

Agent Feedback

Menu path: Quality Assurance → Agent Feedback

View ID: view-qa-agent-feedback

Permission: view-qa-feedback / manage-qa-feedback

What it is

Coaching plans and agent feedback list with filters and create-plan wizard.

Main UI areas

- 1 Plans list + filters
- 1 Create Coaching Plan wizard

What you can do

- 1 Filter existing feedback / plans.
- 2 Create a coaching plan for an agent.
- 3 Track plan completion over time.

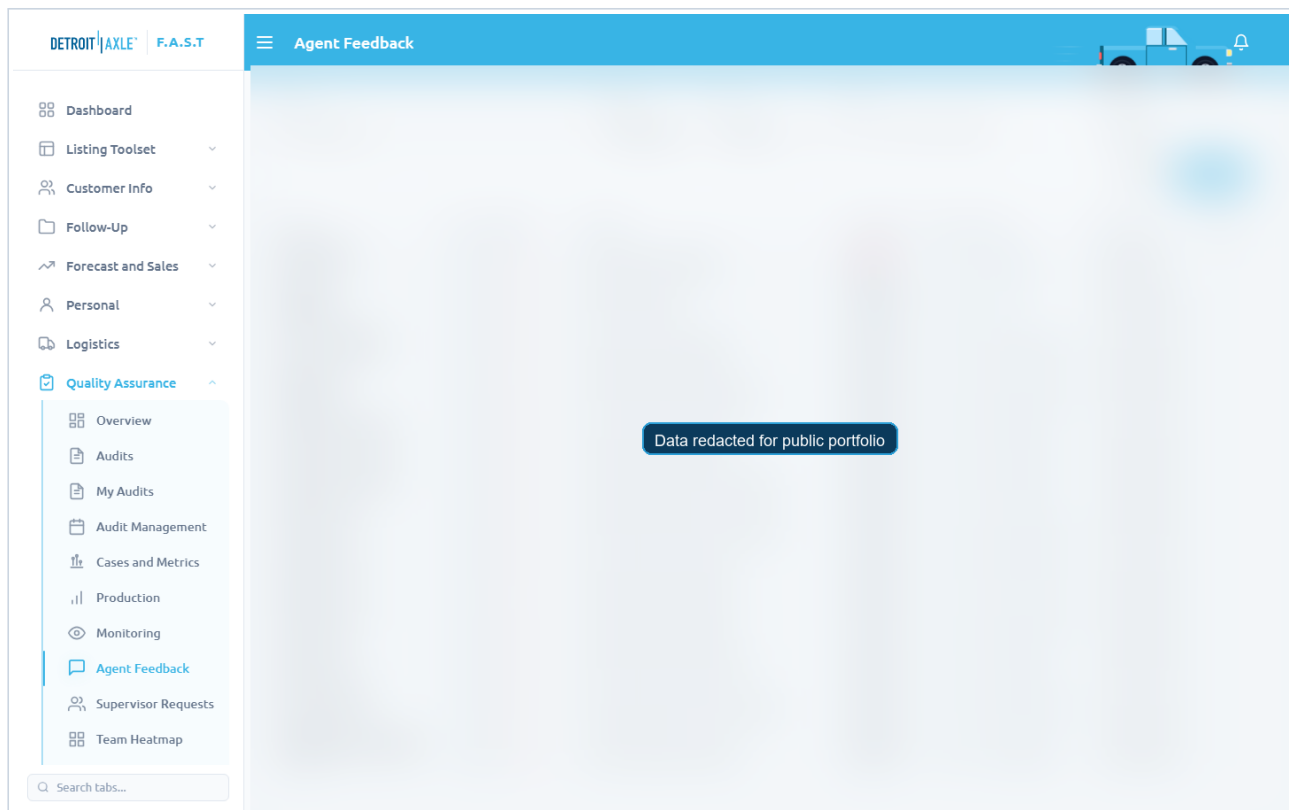

Figure — QA Agent Feedback

Supervisor Requests

Menu path: Quality Assurance → Supervisor Requests

View ID: view-qa-supervisor-requests

Permission: view-qa-supervisor-requests / manage-qa-supervisor-requests

What it is

Queue of supervisor requests raised from QA workflows; open detail to act.

What you can do

- 1 Review the supervisor request queue.
- 2 Open detail and resolve or escalate.

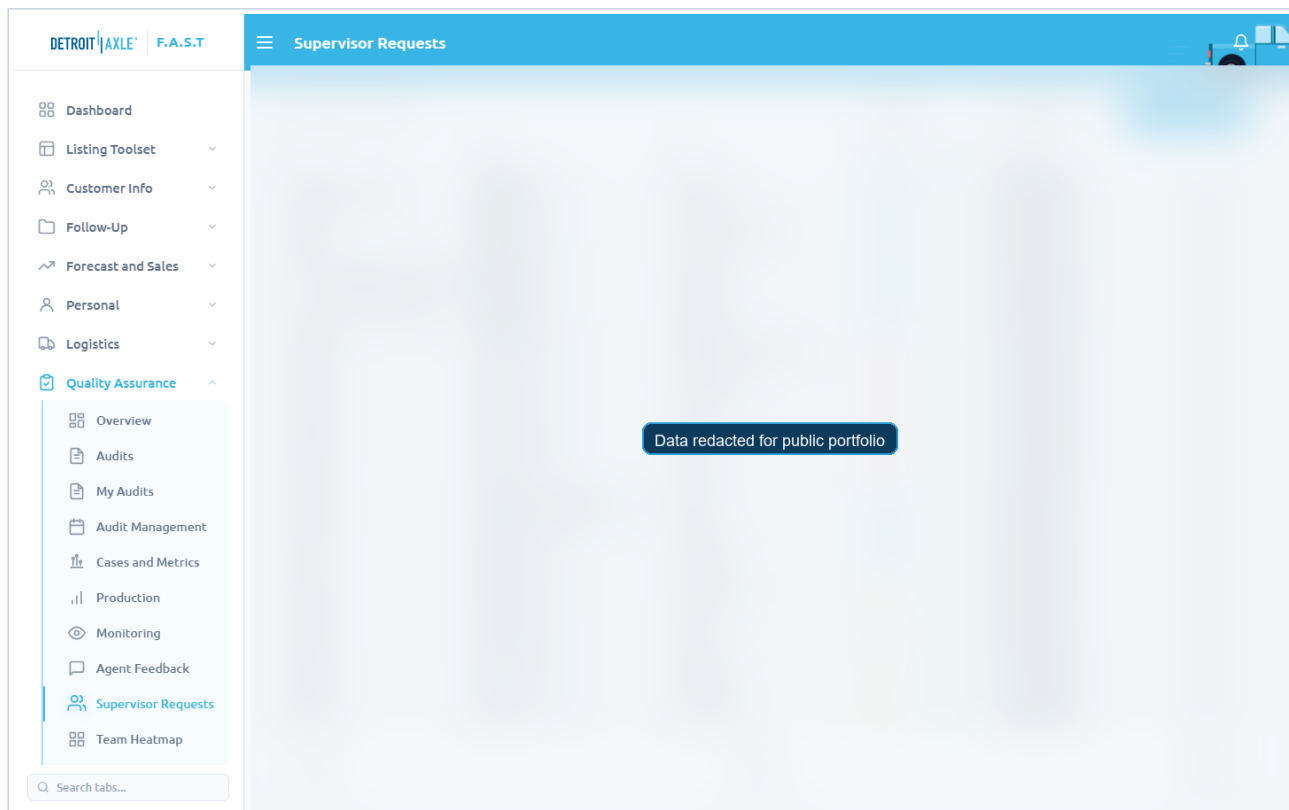

Figure — QA Supervisor Requests

Team Heatmap

Menu path: Quality Assurance → Team Heatmap

View ID: view-qa-team-heatmap

Permission: view-qa-team-heatmap

What it is

Visual heatmap of team QA performance dimensions for leadership review.

What you can do

- 1 Select team / period filters as available.
- 2 Identify hot/cold performance cells for coaching focus.

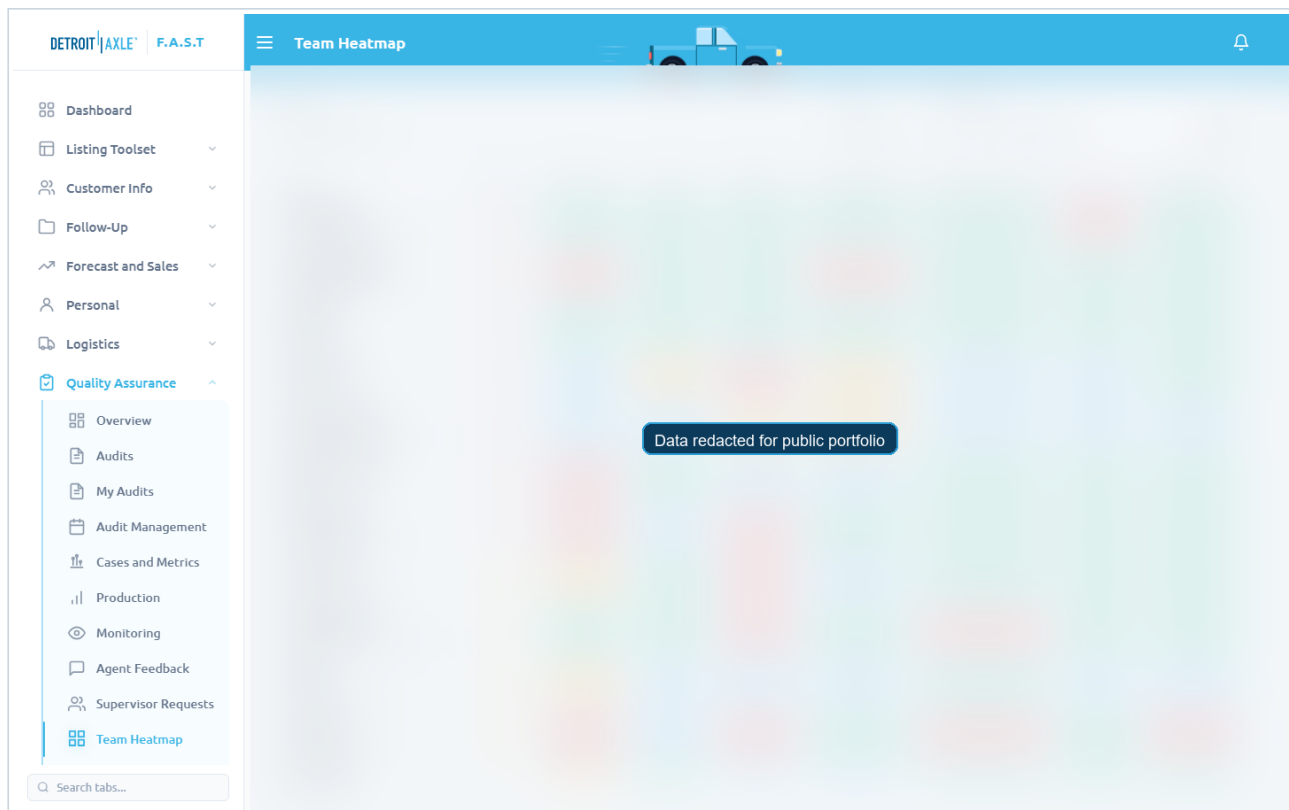

Figure — QA Team Heatmap

QA Team Tracking

Menu path: Quality Assurance → QA Team Tracking

View ID: view-qa-team-tracking

Permission: view-qa-team-tracking

What it is

Team tracking board for QA workload and progress across agents/auditors.

What you can do

- 1 Monitor assignments and progress on the board.
- 2 Rebalance work based on visible load.

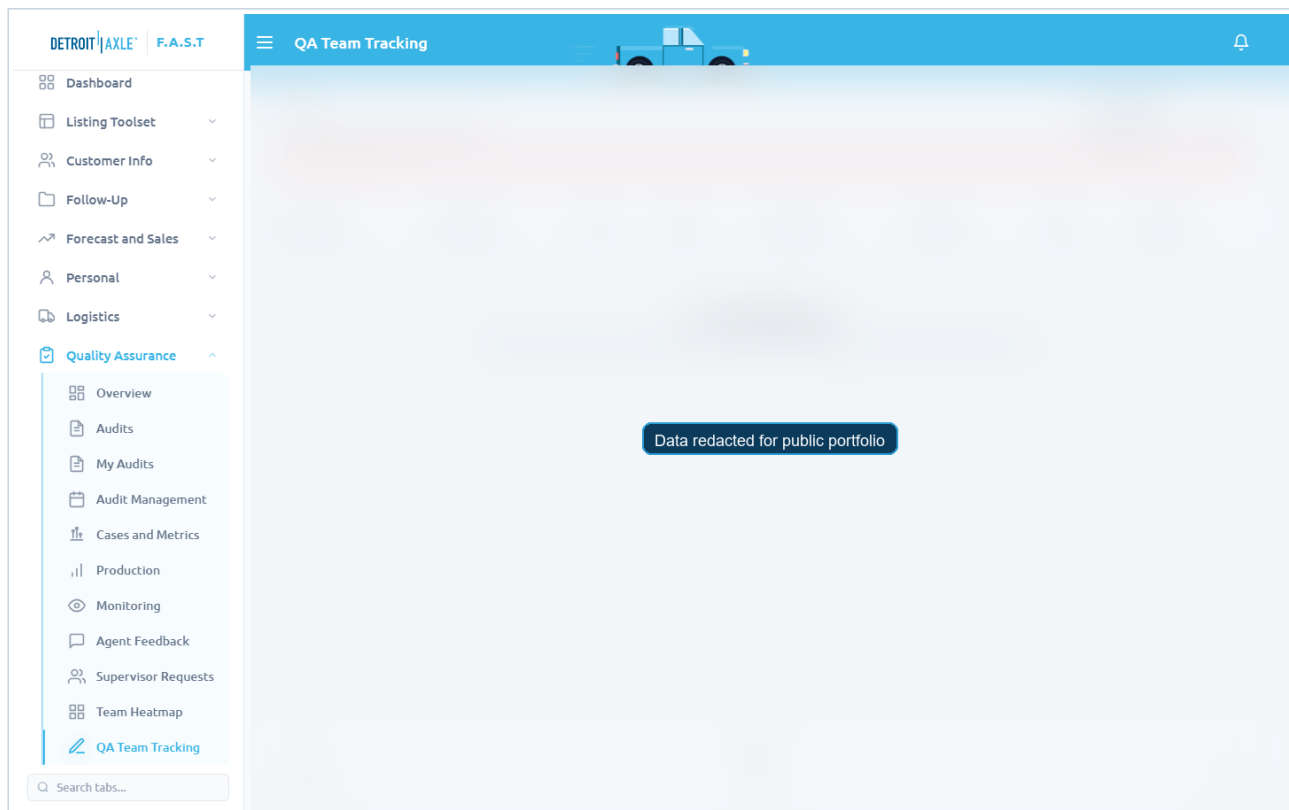

Figure — QA Team Tracking

Coachings

Menu path: Quality Assurance → Coachings

View ID: view-qa-coachings

Permission: view-qa-coachings (related: view-qa-my-coaching)

What it is

Coaching records history for agents and supervisors.

What you can do

- 1 Browse coaching records.
- 2 Open a record for detail and follow-up actions.

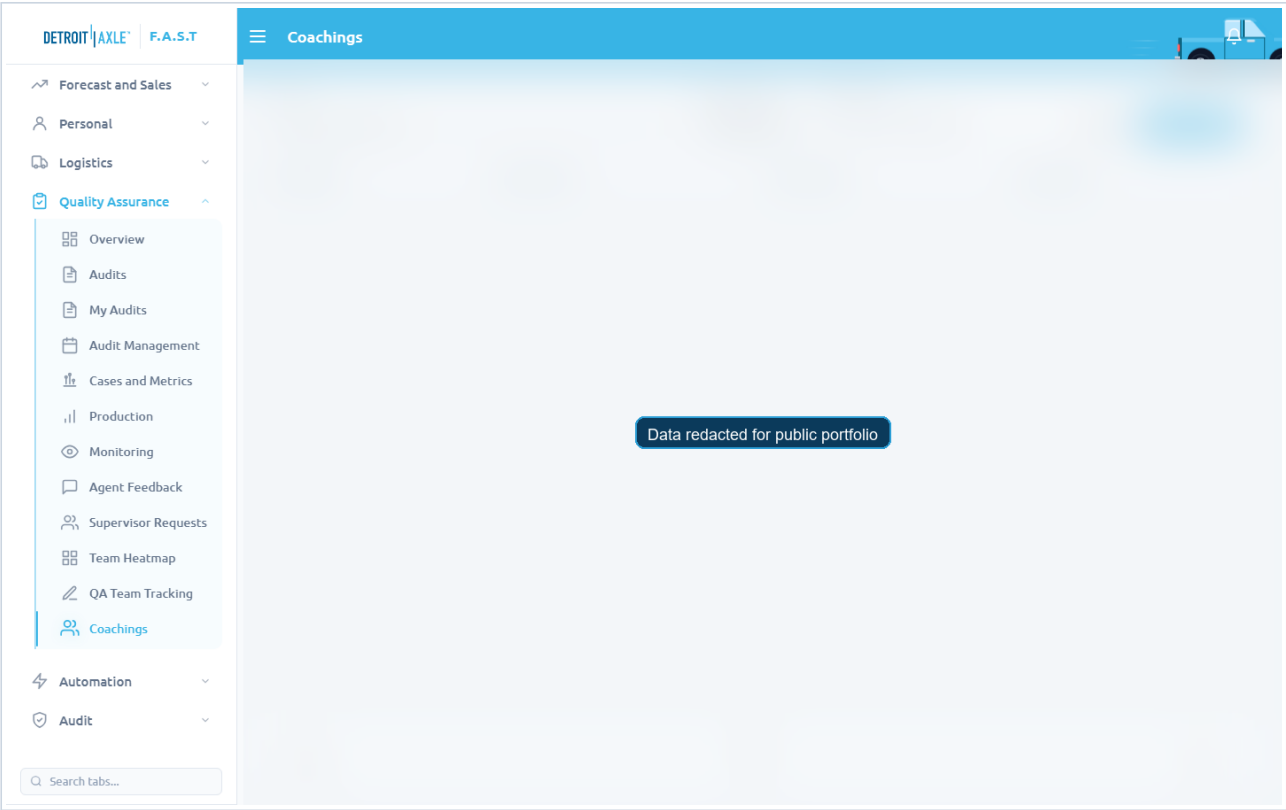

Figure — QA Coachings

10. Automation

File-drop tools that process listing price updates, mapping/BOM kits, and master catalog files.

Update Prices

Menu path: Automation → Update Prices

View ID: view-automation-update-prices

Permission: view-automation-update-prices

What it is

Drop listing price files and process automated price updates.

Main UI areas

- 1 File drop zone
- 1 Process / job status feedback

What you can do

- 1 Drop the listing price file(s).
- 2 Run processing and confirm success / error feedback.
- 3 Re-upload corrected files if the job reports issues.

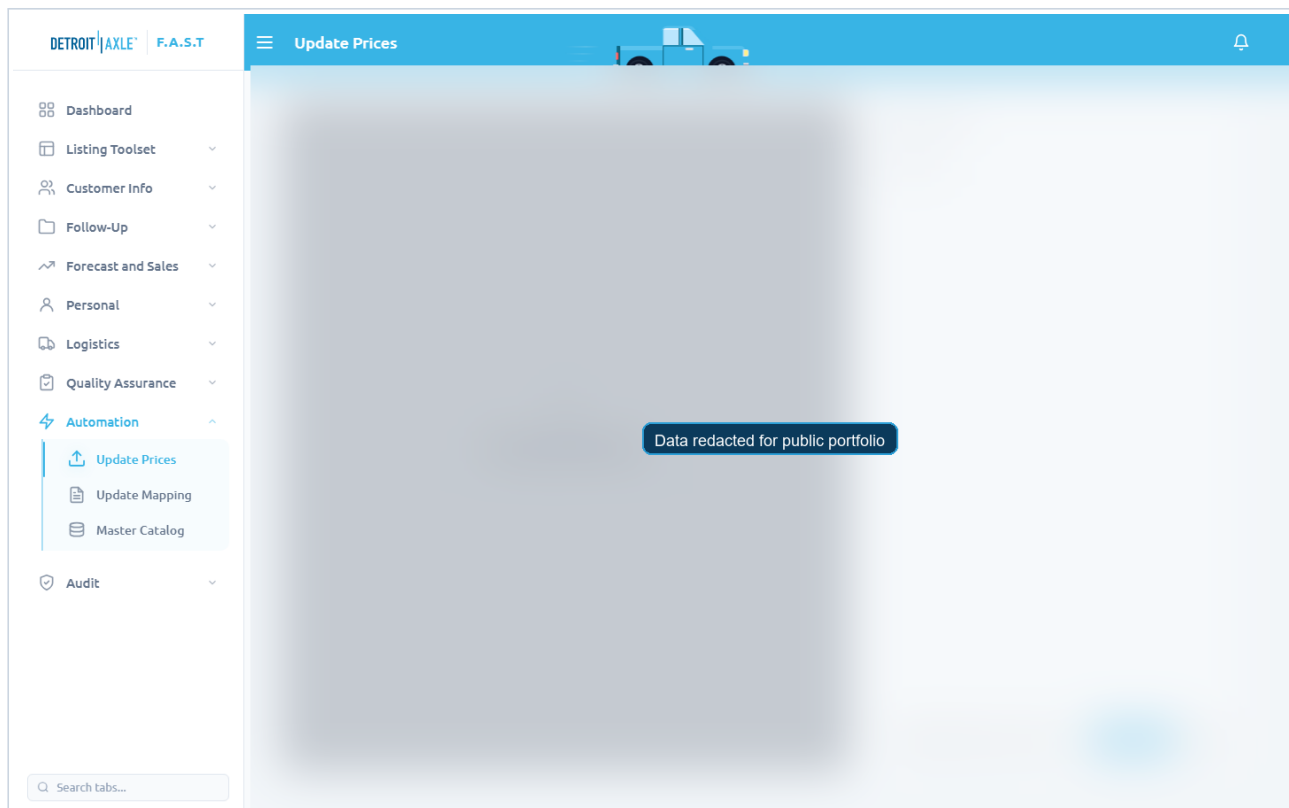

Figure — Update Prices

Update Mapping

Menu path: Automation → Update Mapping

View ID: view-automation-update-mapping

Permission: view-automation-update-mapping

What it is

BOM KIT/MAP update drop zone with optional email attachment handling via automation.

Main UI areas

- 1 Mapping / BOM file drop
- 1 Optional email attachment path

What you can do

- 1 Upload KIT/MAP mapping files.
- 2 Trigger the mapping update job.
- 3 Rely on Power Automate email intake when configured.

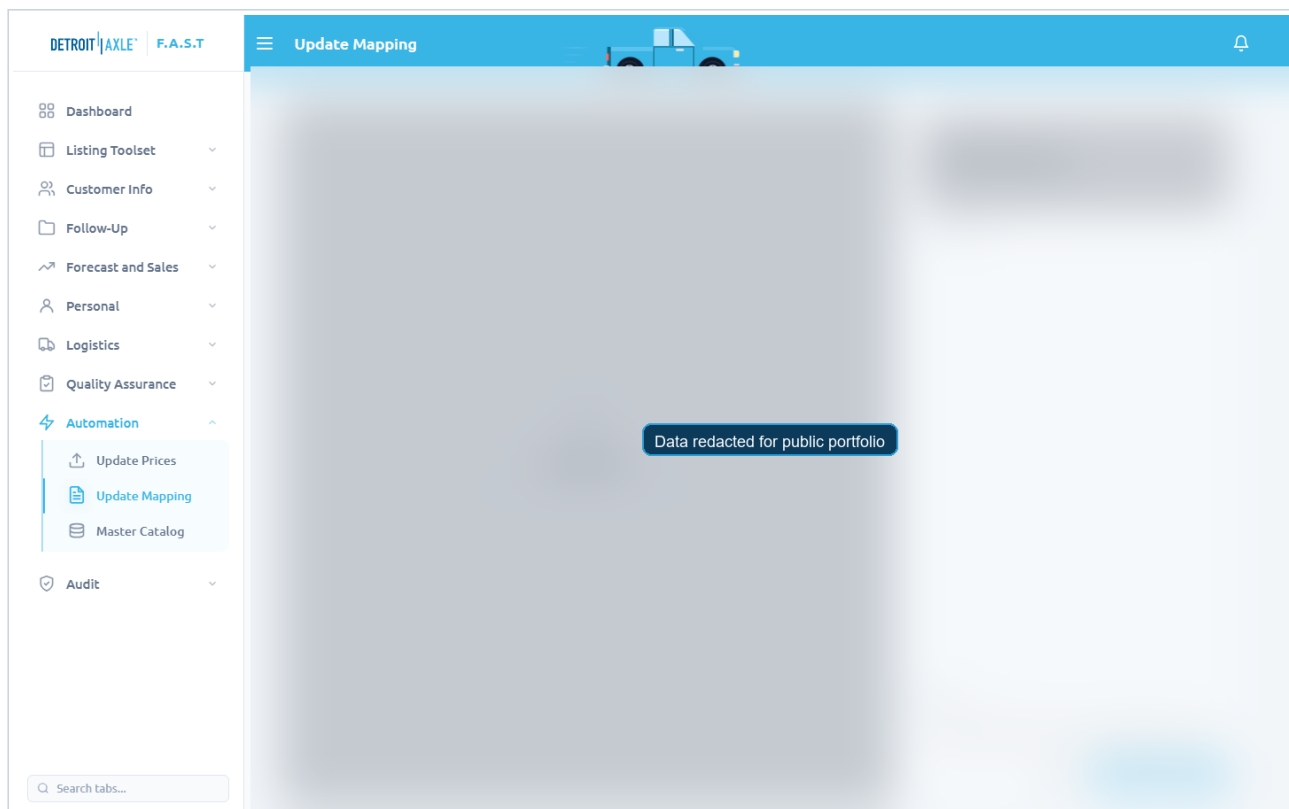

Figure — Update Mapping

Master Catalog

Menu path: Automation → Master Catalog

View ID: view-automation-master-catalog

Permission: view-automation-master-catalog

What it is

Master Catalog file upload automation for catalog refresh jobs.

Main UI areas

- 1 Master Catalog file upload control
- 1 Job status

What you can do

- 1 Upload the Master Catalog file.
- 2 Confirm the automation completes successfully.

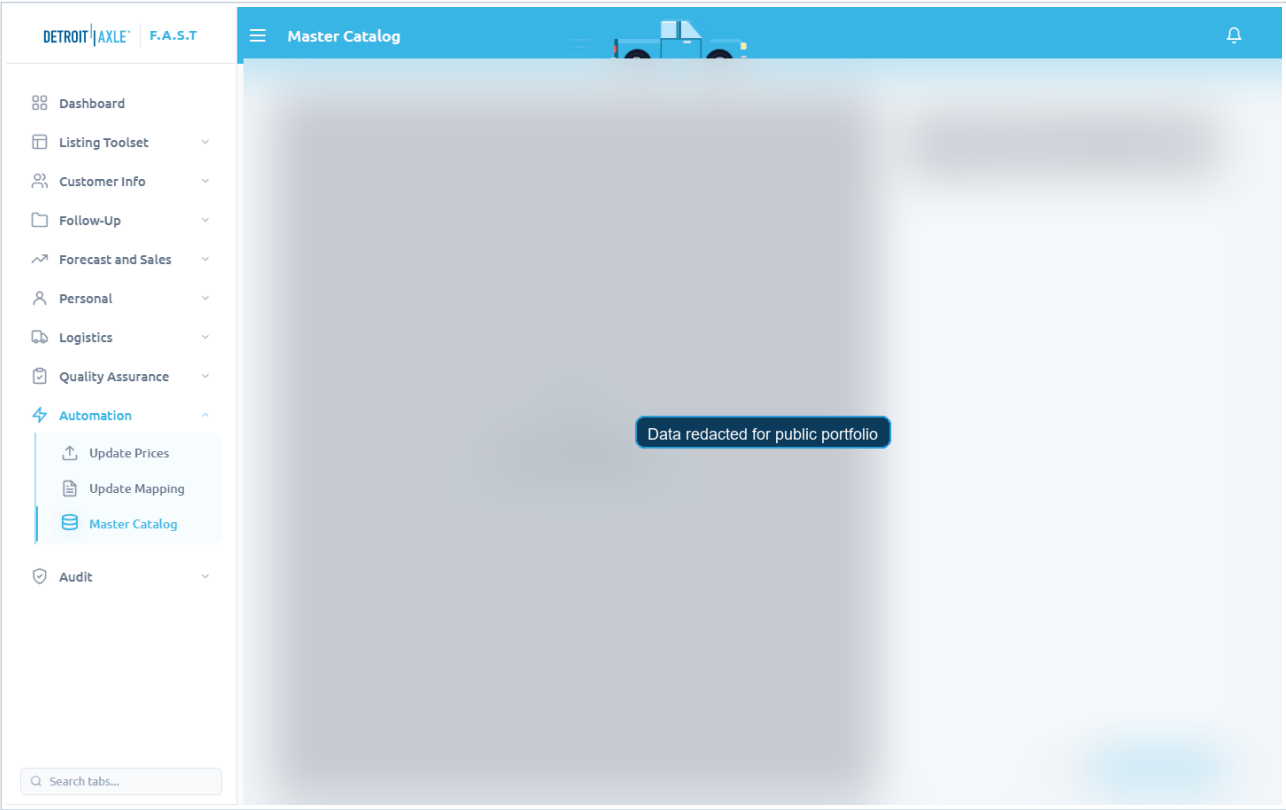

Figure — Master Catalog

11. Audit

FedEx bill disputes, ACES row browsing, and fraud document analysis.

FedEx Bill

Menu path: Audit → FedEx Bill

View ID: view-fedex-bill

Permission: view-fedex-bill

What it is

FedEx bill dispute workflow: search and filter invoice lines, pick columns, export CSV, and drive dispute packages (including SharePoint / Power Automate paths documented in ops docs).

Main UI areas

- 1 Search + filters
- 1 Column picker
- 1 Results table
- 1 Export CSV

What you can do

- 1 Search FedEx bill lines by the available filters.
- 2 Customize visible columns.
- 3 Export CSV for dispute packages.
- 4 Follow the dispute pipeline for SharePoint handoff when your team uses it.

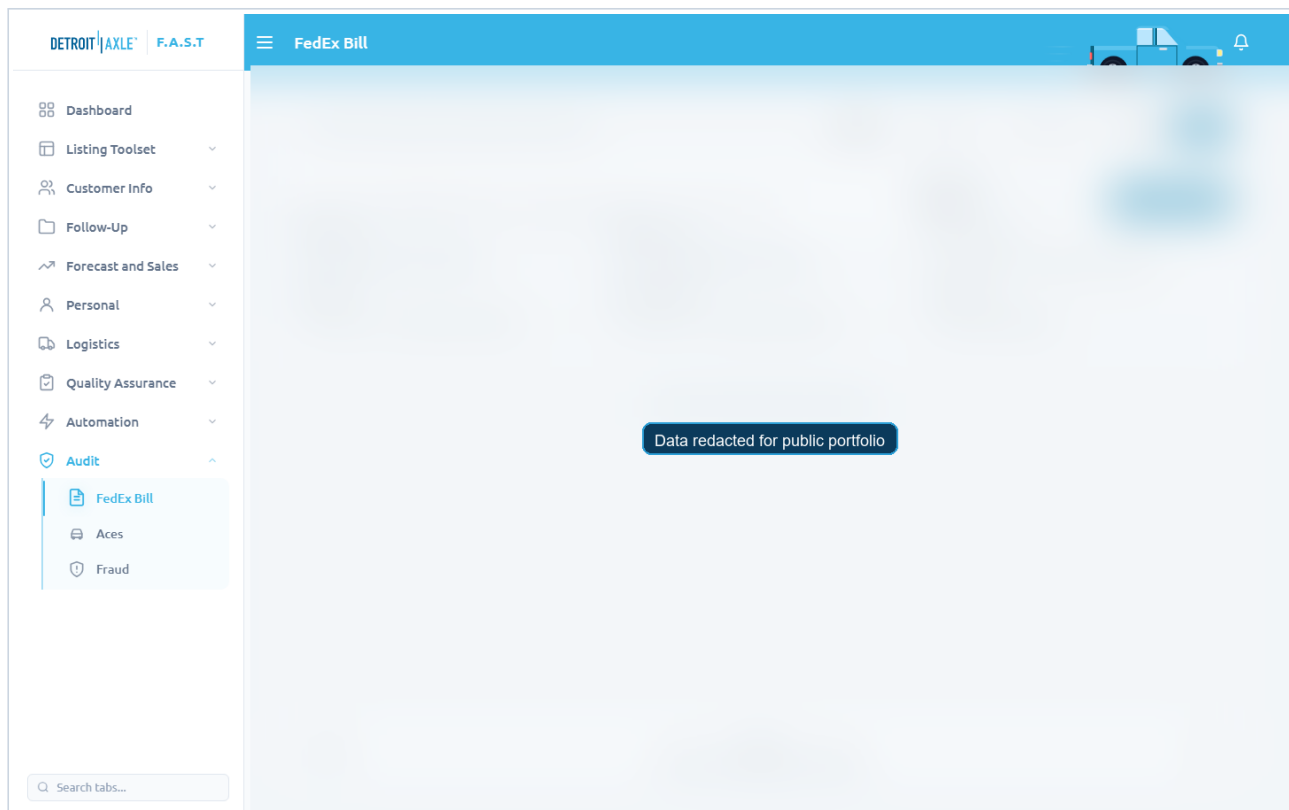

Figure — FedEx Bill

Aces

Menu path: Audit → Aces

View ID: view-aces

Permission: view-aces

What it is

ACES rows browser with search (App ID / YMM / part), marketplace filter (Website / Amazon / Walmart), infinite scroll, and download menu.

Main UI areas

- 1 Search fields
- 1 Marketplace filter
- 1 Scrollable results
- 1 Download menu

What you can do

- 1 Search by App ID, YMM, or part.
- 2 Narrow by marketplace.
- 3 Download the filtered ACES extract.

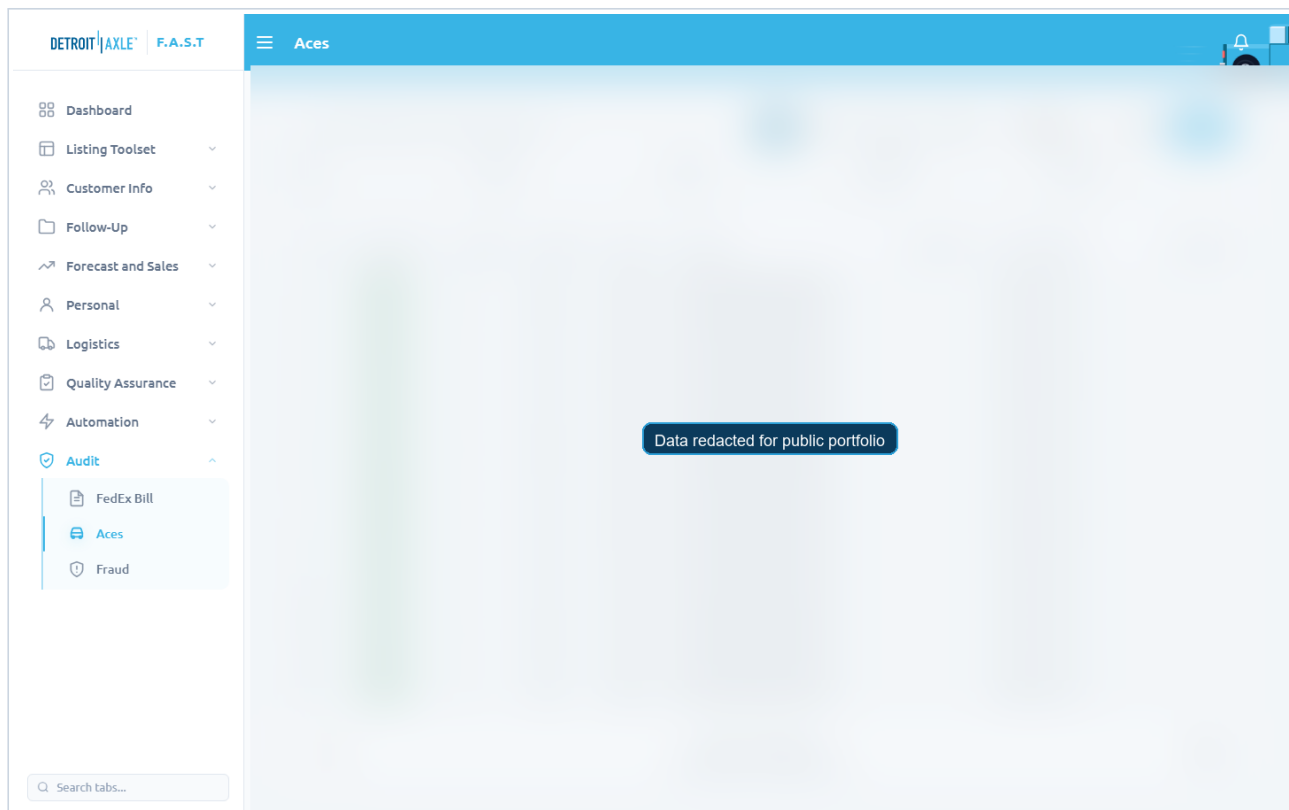

Figure — Aces

Fraud

Menu path: Audit → Fraud

View ID: view-audit-fraud

Permission: view-audit-fraud

What it is

Fraud document analyze-on-upload: drop Braintree Trans.xlsx/csv, run analyze, review flagged results, and export.

Main UI areas

- 1 File upload (Braintree Trans.xlsx / csv)
- 1 Analyze action
- 1 Flagged results table + export

What you can do

- 1 Upload the Braintree transactions file.
- 2 Run **Analyze**.
- 3 Review flagged rows and export for investigation.

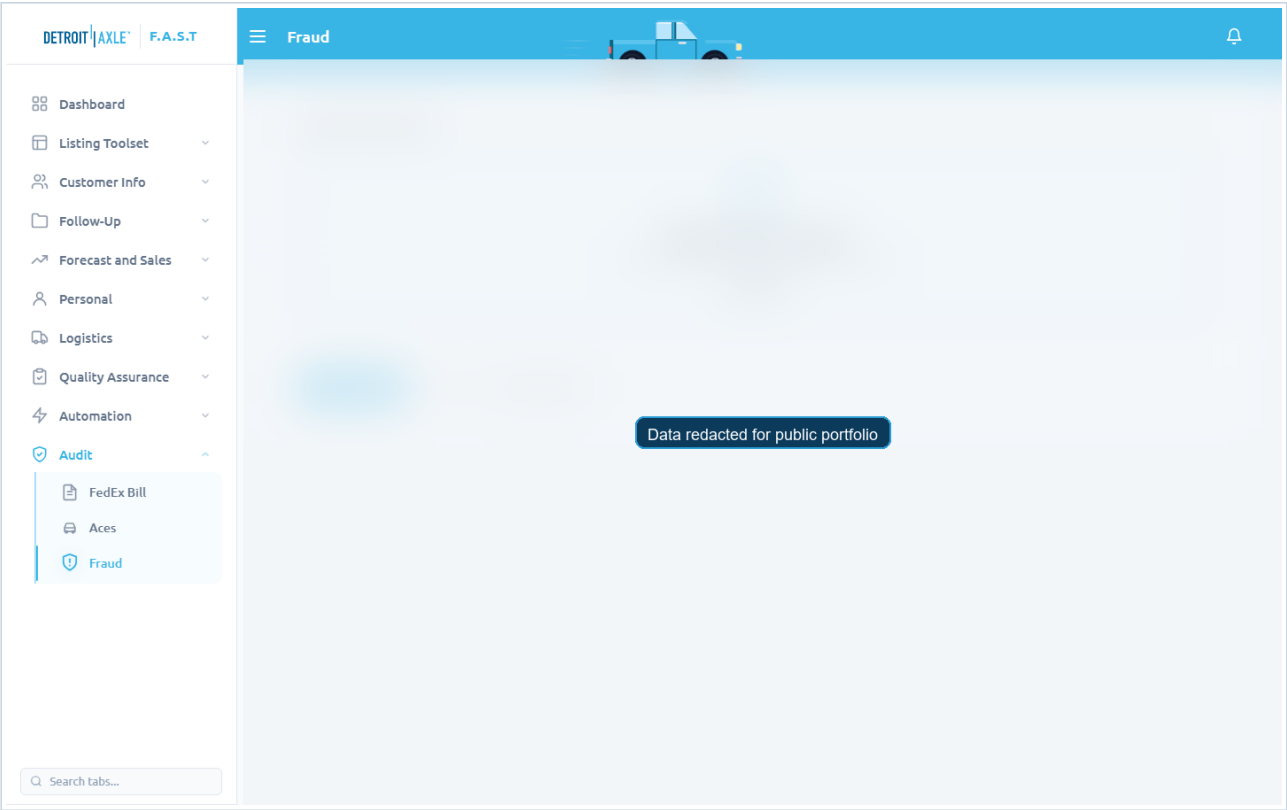

Figure — Fraud

12. External portals and special pages

These surfaces sit outside the main sidebar SPA. Some are secure partner links (ISF / freight forwarder); others are auth helpers or deep-link pages.

Note: Partner upload pages require a secure link issued by logistics. Screenshots below show the public gate / shell without private shipment payloads.

Login and password flows

Path	Purpose
/login	Sign in
/login/forgot-password	Request password reset email
/login/first-login-password	Forced password change on first login
/login/set-password	Set password from email link
/logout-all	Sign out of all sessions (security)

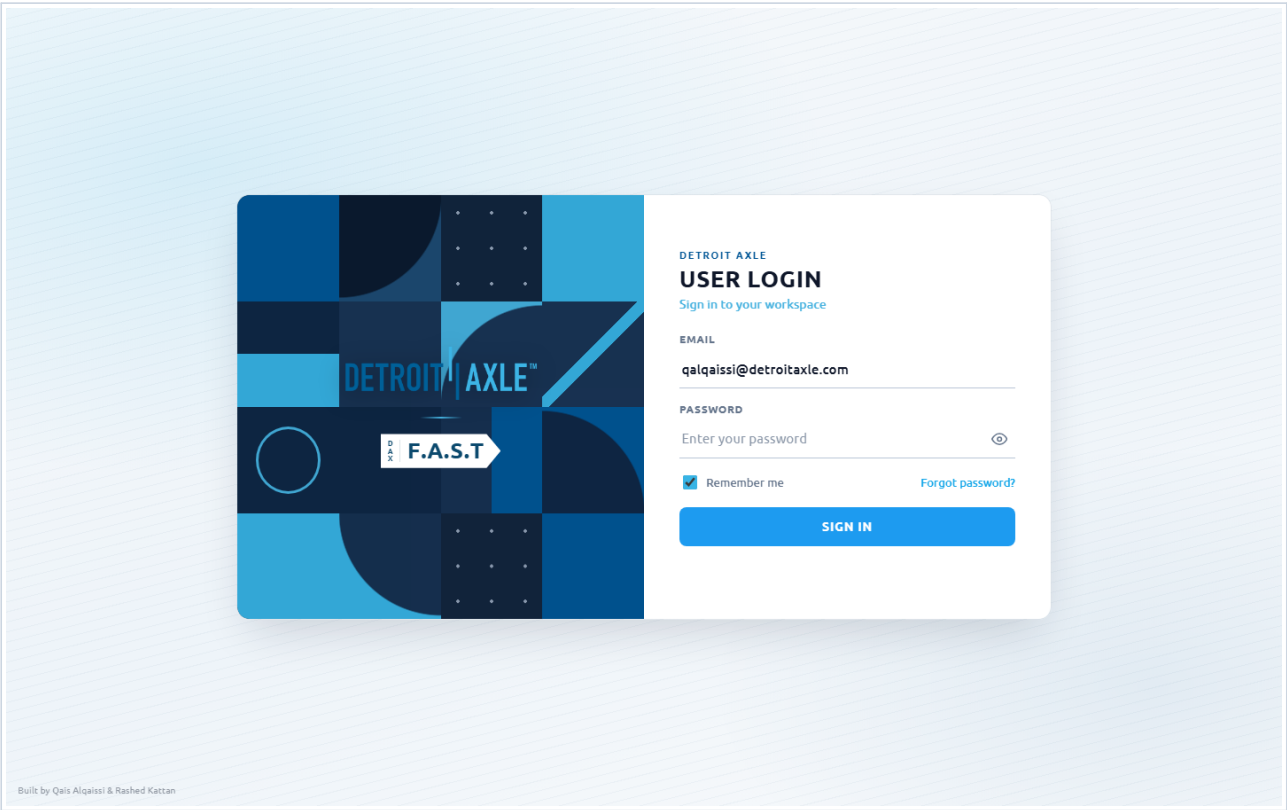

Figure — Login

Factory Intake portal

Paths: /factory-intake, /factory-intake/login

Permissions: view-factory-intake / review-factory-intake

What it is

Partner portal for factories to submit intake / production response packages. Detroit Axle reviewers with review permission process submissions (often tied to Container Tracking factory review).

What partners can do

- 1 Sign in on the factory portal login page.
- 2 Upload or update intake documents per the on-screen wizard.
- 3 Track submission status from the portal UI.

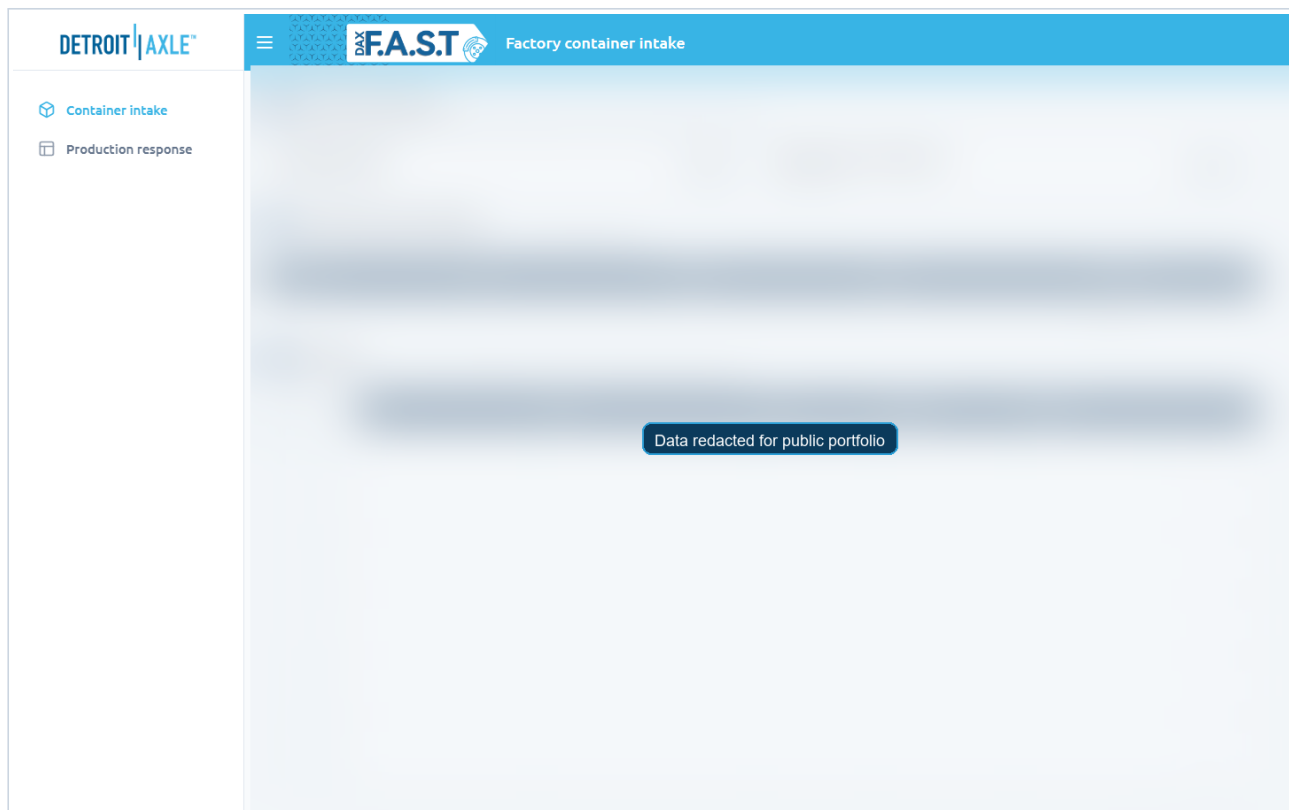

Figure — Factory Intake

ISF broker upload

Path: /isf-broker/upload (tokenized)

What it is

Broker-facing ISF (Importer Security Filing) upload page with context banner for the linked shipment/container.

What brokers can do

- 1 Open the secure link provided by Detroit Axle logistics.
- 2 Upload the ISF package for the referenced container.
- 3 Confirm upload success on the page.

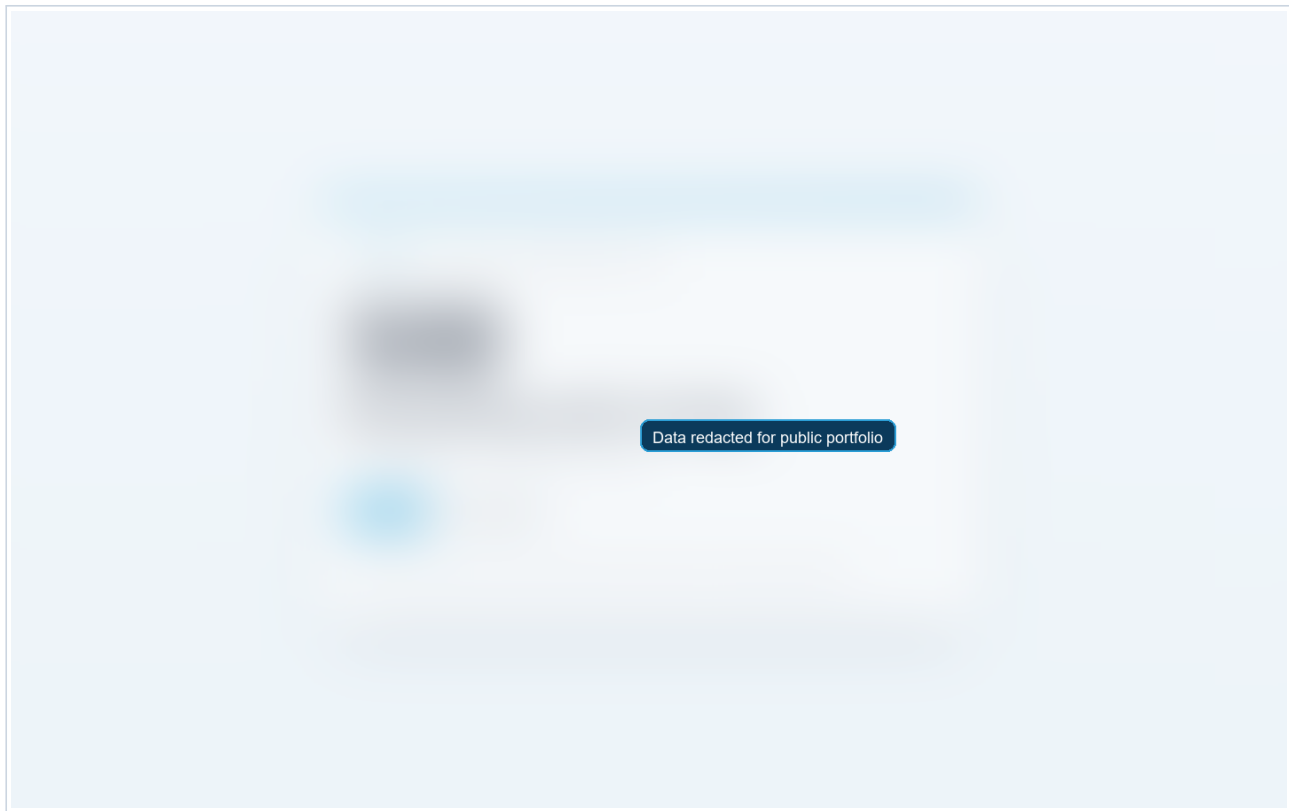

Figure — ISF broker upload

Freight forwarder — delay update

Path: /ff-delay/update (tokenized)

What it is

Freight-forwarder page to report or update shipment delays for a linked container/move.

What forwarders can do

- 1 Open the secure delay-update link.
- 2 Enter delay reason / ETA updates.
- 3 Submit so Container Tracking / logistics can react.

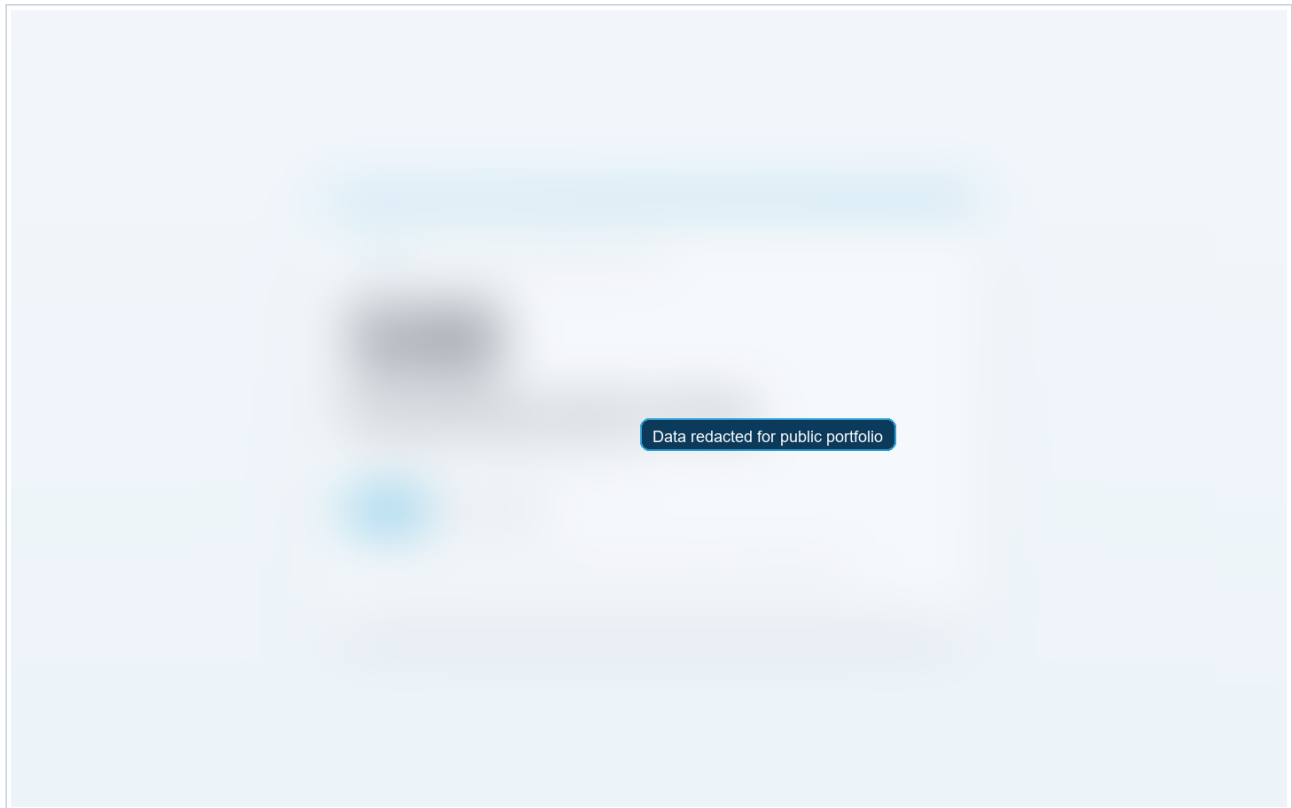

Figure — FF delay update

Freight forwarder — BOL upload

Path: /ff-bol/upload (tokenized)

What it is

Freight-forwarder Bill of Lading upload for the linked shipment.

What forwarders can do

- 1 Open the secure BOL upload link.
- 2 Attach the BOL file(s).
- 3 Submit for logistics document intake (may flow to SharePoint / container docs).

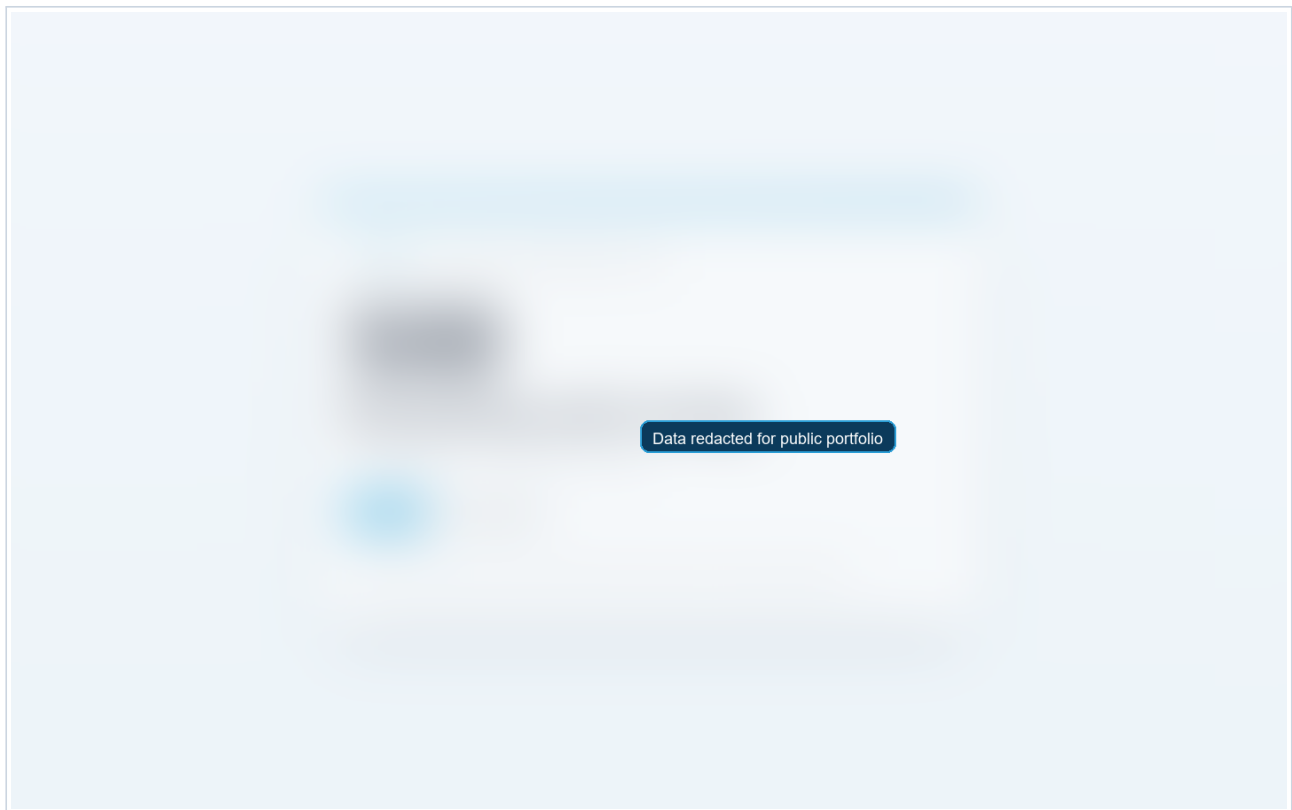

Figure — FF BOL upload

Break QR scan

Path: /break/scan

What it is

Floor / kiosk page that scans or accepts a break QR to check employees in/out of breaks without using the full SPA.

What you can do

- 1 Open the scan page on a floor device.
- 2 Scan the employee/manager QR from Breaks.
- 3 Confirm the break event registered.

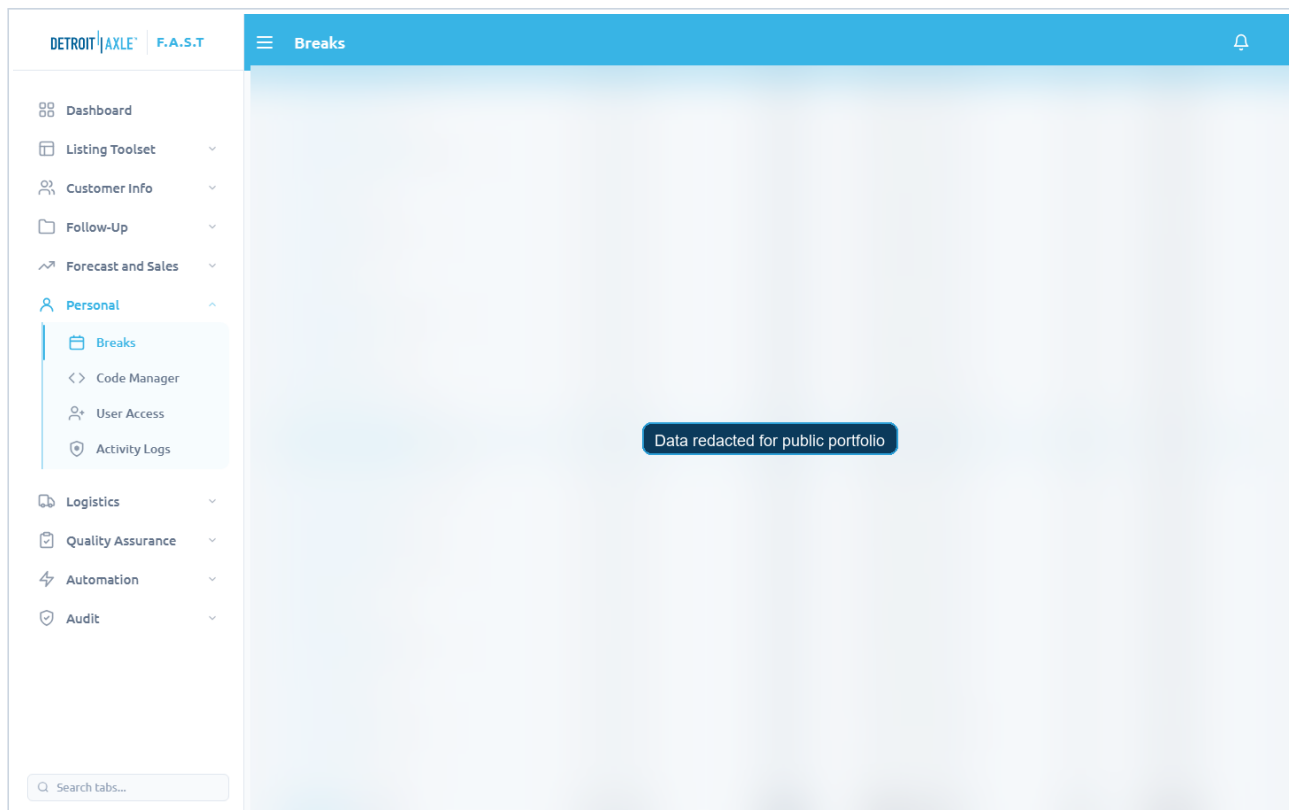

Figure — Break QR scan

DC3 order detail and wrap-up

Paths: /dc3/order, /dc3/wrapup

What it is

Focused DC3 pages for a single order's detail and wrap-up completion, used when CS needs a deep link without the full Customer Info chrome.

What you can do

- 1 Open order detail from a notification or case link.
- 2 Complete wrap-up fields on /dc3/wrapup.

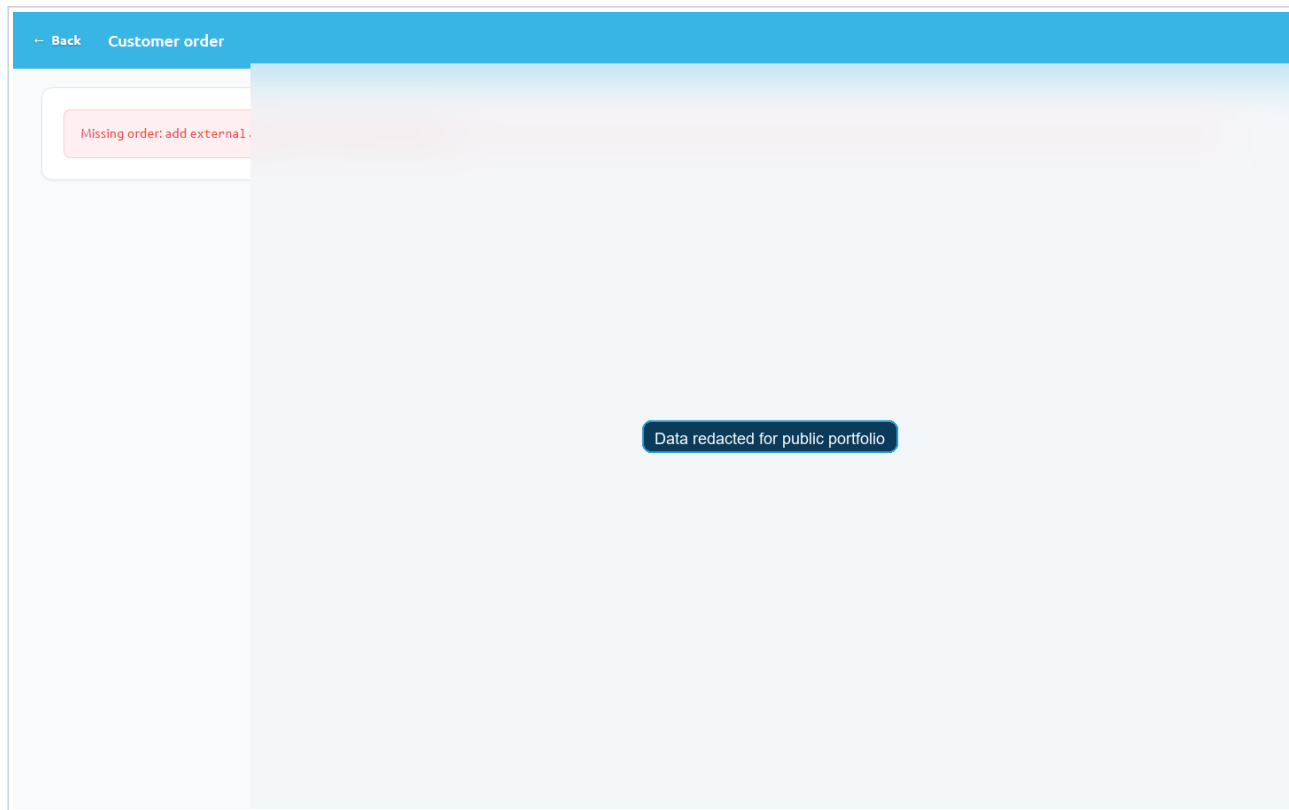

Figure — DC3 order detail

Kit mapping

Path: /kit-mapping

What it is

Standalone kit mapping utility page (companion to Kit Builder / listing kit workflows).

What you can do

- 1 Open /kit-mapping while logged in.
- 2 Map kit relationships as the tool UI directs.

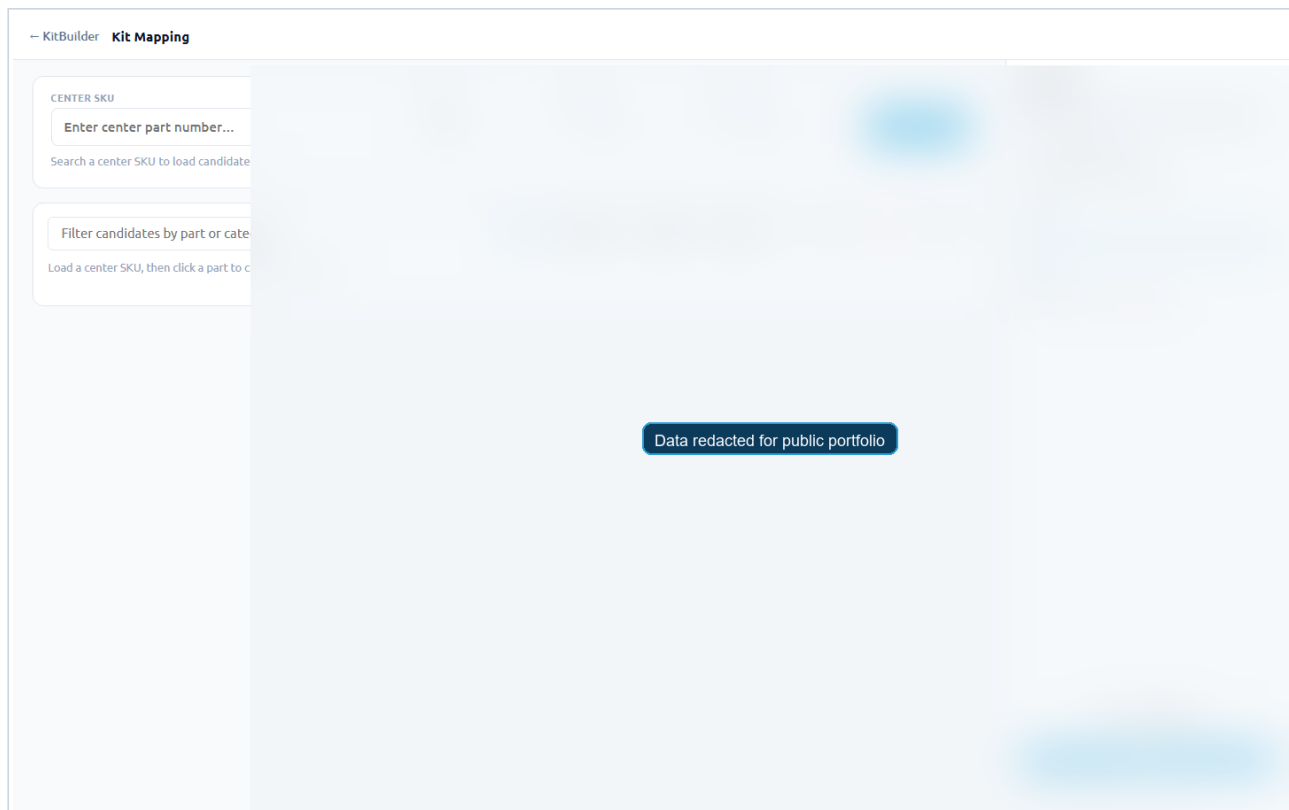

Figure — Kit mapping

Training SSO

Paths: /training, /T+T+B (and related landing templates)

What it is

Bridge into Detroit Axle training / LMS. Unlinked accounts see a dedicated “unlinked” landing until HR/IT maps the user.

What you can do

- 1 Click Training from F.A.S.T. when offered.
- 2 Complete SSO; if unlinked, follow the on-screen instructions to get linked.

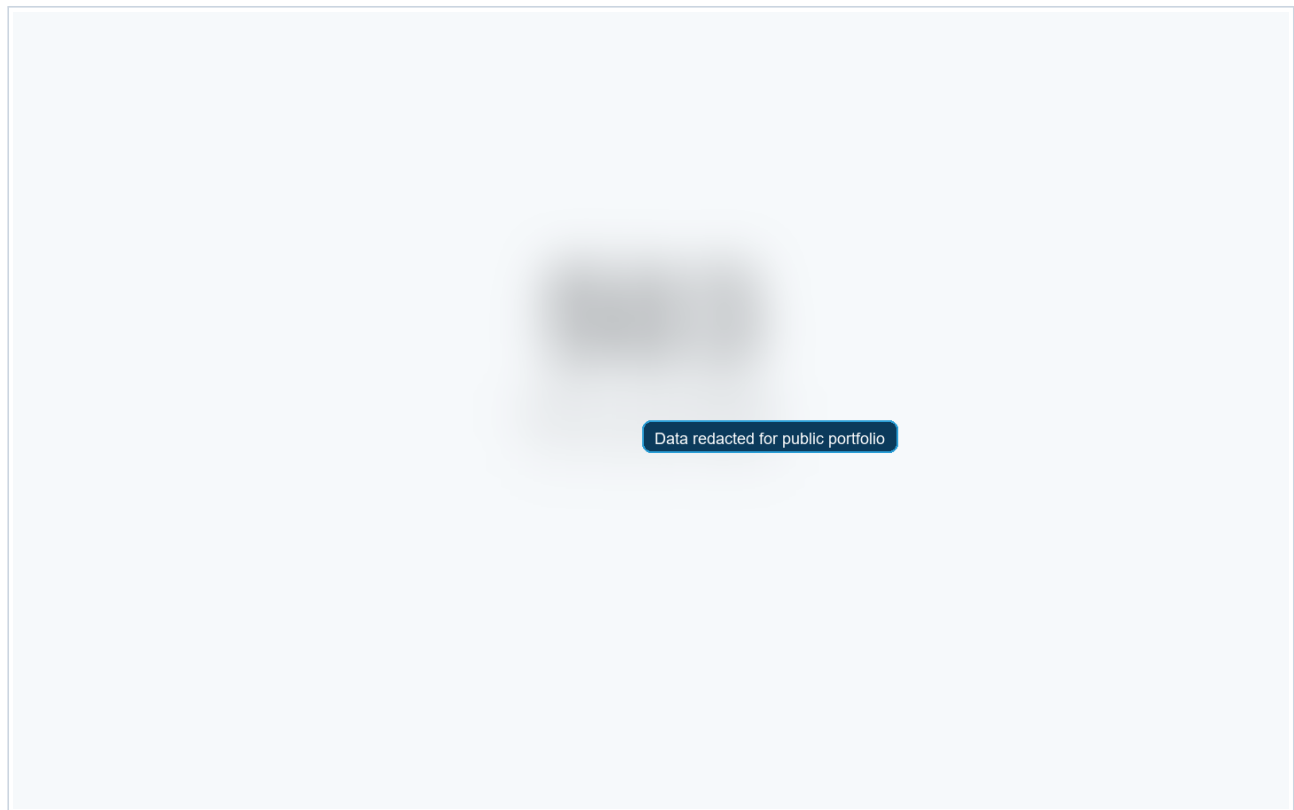

Figure — Training SSO

Interview portal

Paths: Interview enter / portal / error templates (interview_portal*.html)

What it is

Candidate interview experience hosted alongside F.A.S.T. (tokenized session). Availability depends on deploy configuration.

What candidates can do

- 1 Open the invite link.
- 2 Enter the interview portal and complete prompts.
- 3 See an error page if the token is invalid or expired.

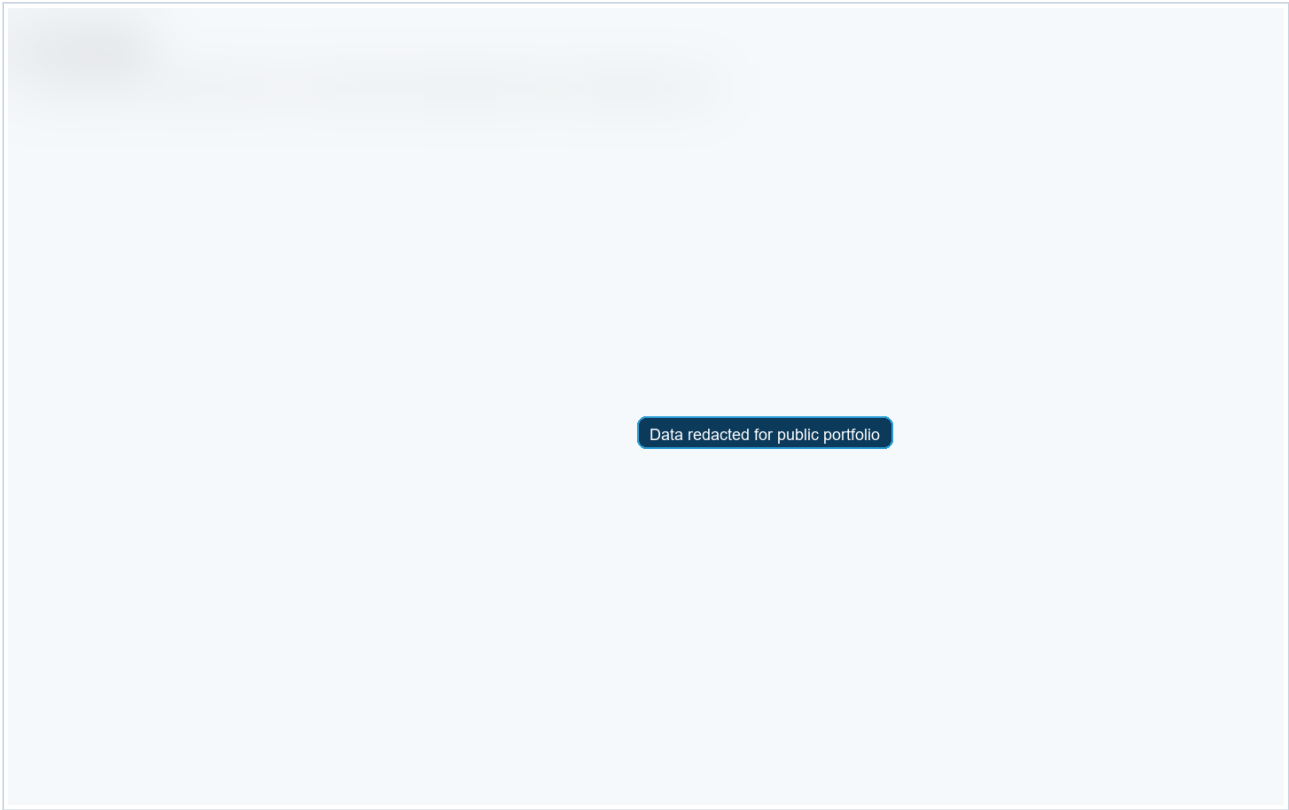

Figure — Interview portal

13. Appendix

Deep-link cheat sheet

Use `/?start_view=<id>` after login. Listing subtabs also set data-subtab from the sidebar button.

View	start_view
Dashboard	view-dashboard
Fitment	view-fitment-v2
Fitment Check	view-listing (+ subtab fitment-check)
Rules	view-rules-v2
Auto-Parts	view-listing (+ auto-part-pro)
Part Search	view-part-search
Upload pictures	view-listing (+ upload-pictures)
Tags & Combinations	view-listing (+ tags-combinations)
New Kits	view-listing (+ new-kits)
Kit Builder	view-kit-builder-v2
DC3	view-dc3
CS Support	view-customer-service-support
Archived Requests	view-cs-support-archived
Price Matching	view-price-matching
eBay Retention	view-ebay-retention
Follow-Up Email's	view-follow-up-emails
Templates	view-follow-up-templates

Permission groups (assignable)

Permissions are seeded to match the live sidebar. Admins assign them under **User Access**. Major groups:

- 1 **Dashboard** — view-dashboard, manage-dashboard
- 1 **Listing** — Fitment, Fitment Check, Rules, Auto-Parts, Part Search, Upload pictures, Tags & Combinations, New Kits, Kit Builder (+ manage/review variants)
- 1 **Customer** — DC3, CS Support, Price Matching (+ refund/tax), eBay Retention
- 1 **Follow-Up** — Emails, Templates, Cases, Classify orders
- 1 **Forecast and Sales** — Statistical Projection, Sales Report/Dashboard, MSA, Amazon Market Report
- 1 **Personal** — Tasks, Breaks, Code Manager, User Access, Activity Logs
- 1 **Logistics** — Bay Logistics, Container Tracking, Netsuit Parser, Audit PT Invoice, Locations, Factory Intake / Review
- 1 **Quality Assurance** — Overview, Audits (+ manage/delete), Audit Management, Cases and Metrics, Production, Monitoring, Feedback, Supervisor Requests, Reports, Heatmap, Team Tracking, Coachings, Evidence, portals
- 1 **Audit** — FedEx Bill, Aces, Fraud
- 1 **Automation** — Update Prices, Update Mapping, Master Catalog
- 1 **System** — view-settings (profile/gear; Deposco sync and session/version settings)

Glossary

Term	Meaning
SPA	Single-page application shell at /
YMM	Year / Make / Model vehicle fitment
ACES	Aftermarket Catalog Exchange Standard fitment data
DC3	Customer/order case workflow in Customer Info
MSA	Market Share Analyzer
PT	Product / purchase invoice audit context (Audit PT Invoice)
321	Price-reference CSV used with PT invoice audit

FIR	Factory / inbound review artifacts on containers
Terminal49	Ocean tracking provider integrated with Container Tracking
Deposco	WMS sync controlled from Settings / scheduled jobs

Maintaining this guide

- 1 Edit Markdown under docs/product_guide/chapters/.
- 2 Replace PNGs in docs/product_guide/screenshots/ (see SCREENSHOT_CHECKLIST.md).
- 3 Run `py -3 docs/product_guide/build_pdf.py` to regenerate FAST_Product_Guide.pdf.
